

MEDICATION ADMINISTRATION FOR UNLICENSED PERSONNEL

Tennessee
Department of Intellectual and Developmental Disabilities

Training Curriculum

Expectations

- Act in a professional manner.
- Disruptive behavior, cheating, lying, or failure to comply with class requirements are grounds for dismissal from class.
- Cell phones OFF and out of sight
- Classroom rules and etiquette. . .

Certification

- 20 hours of classroom instruction.
- A minimum score of 80% is required for written test.
- A minimum score of 80% is required for skills test.
- Renewal of certification can be achieved by completion of the above or by successful completion of Test-Out and is required every 3 years.
- Expires at midnight 3 years from certification date.
- The certified staff is responsible for maintaining current certification.
- The employing agency is responsible for maintaining current certification of staff.

By administering medications you are introducing chemical substances into the body that are used to:

- maintain health (vitamins),
- diagnose (barium - for swallow study),
- treat (antibiotics),
- prevent disease (vaccines: measles, mumps, etc),
- relieve symptoms (antiemetic: nausea/vomiting),
- or to alter body processes (hormones).

ANY MEDICATION CAN
CAUSE HARM TO A
PERSON!

Administering medications
is a serious responsibility.

Administration by the oral route is
the slowest way for medication to
reach the body's cells.

The oral route may be referred to
as PO or by mouth.

It is very important for you to understand
your limitations of authority and responsibility:

You must NEVER attempt to perform tasks
for which you are not trained.

If your employer asks you to perform tasks,
which are beyond the scope of your training,
you must refuse.

CERTIFICATION vs. DELEGATION

CERTIFICATION allows you to perform the skills that you
learn in this class.

DELEGATION allows you to perform a specific skill when a
nurse trains/delegates that skill under their license
(nebulizer breathing treatments, oxygen, etc.).

Your role and your scope of practice as unlicensed personnel administering medication includes:

1. Administration of medications by the following routes: oral, eye, ear, inhaler, nasal, topical, vaginal and rectal in accordance with the safe standards of practice.
2. Following written practitioner orders for administering medications.
3. As a certified staff you **CANNOT TAKE VERBAL OR PHONE ORDERS.**
Only licensed staff (RN or LPN) can take orders.

Version 10.01.18
© Tennessee Department of Intellectual and Developmental Disabilities
9

Medication Administration

Administer – To give medication to a person.

Each agency must have specific policies and procedures for the administration of medications and has an obligation to educate employed unlicensed personnel to these policies and procedures.

Version 10.01.18
© Tennessee Department of Intellectual and Developmental Disabilities
10

REMEMBER:

**YOU ARE RESPONSIBLE
FOR YOUR ACTIONS**

Version 10.01.18
© Tennessee Department of Intellectual and Developmental Disabilities
11

- Observe and report ANYTHING out of the ordinary for the person.
 - unusual sign/symptom or change
 - change in behavior
 - accident or injury

Version 10.01.18
© Tennessee Department of Intellectual and Developmental Disabilities
12

Side Effect – Any action/reaction other than the intended effect of a drug.

By recognizing and reporting anything that is different or unusual for the person, you could be identifying a side effect of a drug.

Additionally, agency training includes recognizing a medical emergency including:

- that a 911 call must not be delayed
- initiation of first aid procedures
- providing information to medical staff
- notification of provider supervisory staff

MAR

used for

Transcription – Transferring a practitioner’s order to the MAR.

Always transcribe order EXACTLY as it is written by the practitioner.

Documentation – Creating an immediate record of medications administered or actions taken.

Never document that the medication has been taken before it is administered.

Medication Administration Record

- The person administering medications must accurately document meds that were given on the MAR.
- Remember that the MAR is confidential and its contents should neither be shown nor discussed with anyone not administering care to the person. (HIPAA-Protects health information)
- The MAR lists all medications that have been administered to the person during a particular month.

Practitioner orders may be received in many different forms:

- prescription pad
- office printout
- consult form
- ER record
- fax
- pharmacy generated order (e-script)

Medications are:

Prescribed – by the practitioner

Dispensed – by the pharmacist

Administered – by certified staff or nurses

Guiding Principles for Medication Administration

- Safe, clean and proper storage of various types of medications.

Medication taken by mouth

must be stored separately from

Medication administered topically;

(All other routes of administration)

- **ALL** Over-the-Counter (OTC) drugs must be ordered by treating practitioner.

- **ALL** medications must be labeled by a pharmacist.

– Exception: An OTC that falls within the parameters of the manufacturer's label.

Example:

Ordered - Tylenol 325 milligrams (mg) 2 tablets every 4 hours as needed temperature above 101°F.

Package Label –

325 milligrams (mg) 2 tablets every 4-6 hrs.

- Refer to agency policy for specific rules regarding labels.

Additional Information:

STAT – now

PRN – as needed

H or h – hour

NPO – Nothing by Mouth

Based on the following orders: Is a pharmacy label required?

Tylenol 325mg 2 tabs q 4 h
PRN NO

Tylenol 325mg 2 tabs q 6 h
PRN NO

Tylenol 325mg 1 tab q 6 h
PRN YES

Tylenol 325mg 2 tabs q 3 h
PRN YES

Drug Facts (continued)
Stop use and ask a doctor if
● pain gets worse or lasts more than 10 days in adults
● pain gets worse or lasts more than 5 days in children under 12 years
● fever gets worse or lasts more than 3 days
● new symptoms occur ● rashness or swelling is present
These could be signs of a serious condition.
If pregnant or breastfeeding, ask a health professional before use.
Keep out of reach of children.
Overdose warning: In case of overdose, get medical help or contact a Poison Control Center right away. (800) 222-1222
Quick medical attention is critical for adults as well as for children as on 8/10/18 do not notice any signs or symptoms.

Directions
● do not take more than directed (see overdose warning)
● adults and children 12 years and older ● take 2 tablets every 4 to 6 hours while symptoms last
● do not take more than 10 tablets in 24 hours
● do not use for more than 10 days unless directed by a doctor
● children 6-11 years ● take 1 tablet every 4 to 6 hours while symptoms last
● do not take more than 5 tablets in 24 hours
● do not use for more than 5 days unless directed by a doctor
children under 6 years ● ask a doctor

- Any OTC that is ordered with specific times, dosages, etc., that do **not** correspond with the manufacturer's label, indicates that labeling by the pharmacy is necessary.

- The practitioner must label "Sample" medications with instructions regarding use.

Eight Rights

- Right PERSON
- Right DRUG/MEDICATION
- Right DOSE
- Right ROUTE
- Right TIME
- Right DOCUMENTATION
- Right POSITION
- Right TEXTURE

Common Dosages of Medication

mg – milligram
mcg – microgram
ml – milliliter (liquid measure)

**As an unlicensed person
administering medications,
always seek professional
assistance when in doubt**

**Including abbreviations that you
are unfamiliar with**

Standard Precautions

Always maintain Standard Precautions during medication administration.

- Proper **Hand Washing** – is the MOST effective method to prevent and control the spread of disease.
- Use gloves when contact with medication, blood or other body fluids is anticipated. Change gloves and wash hands between individual contacts, before and after administering medications.

Safe Practice of Medication Administration

- Order, MAR and medication label **MUST** match.
- Medication, dose, route, time, (texture and position if indicated) must be ordered by the practitioner and be transcribed to the MAR.
- **Medication must remain in original container.**
- Meds must be identifiable up to the point of administration.
- **AVOID DISTRACTIONS.**

Safe Practice of Medication Administration

- Read each MAR carefully. If not clear, refer to the practitioner order or call for clarity.
- Read the med label carefully checking to see that the MAR and label are exactly the same.
- Perform '3 Checks'.
PRIOR TO ADMINISTRATION
 1. Compare MAR to label **when taking from supply**
 2. Compare MAR to label **when preparing medication**
 3. Compare MAR to label **just prior to administration**

Safe Practice of Medication Administration

- Never give a medication unless label is present and clearly readable, including any warnings.
- Keep containers tightly closed. Report any change in color, consistency or odor.
- Do not touch pills, capsules, or patches without gloves.
- Do not prepare medications until ready to give.
- Always identify person by picture.
- Provide privacy as appropriate for the situation.

Safe Practice of Medication Administration

- Give only medications which you have prepared yourself and document only the medications which you administer.
- Do not leave medications unattended.
- Always check on the person within 30 minutes of administering medications.

Safe Practice of Medication Administration

- Know the purpose of the med being given, any reactions, warnings, usual dose and specific directions.
- Be familiar with the condition/diagnosis and allergies of the person receiving meds.
- Medications are not to be crushed or placed in foods or beverages unless specified by practitioner orders.
- Never give a medication past its expiration date.
- Meds prepared and not given must never be returned to the container.

Skeletal System

Consists of bones, ligaments and cartilage to support and protect the body.

Skeletal System

Common diagnoses/conditions

- Fracture
- Osteoporosis (brittle bones)
- Arthritis

Associated medications

- Analgesics (pain reliever)
- Non-steroidal Anti-inflammatory Drugs (NSAIDS)
- Steroids
- Narcotic Analgesics (controlled substances)

REGULATORY AGENCY

DEA

(Drug Enforcement Agency)

Enforces the importation, use, sale, manufacture and distribution of **controlled substances** which are habit forming and are assigned a Schedule classification.

CONTROLLED SUBSTANCES

➤ MUST be double locked

➤ MUST be counted

includes pills and liquids

REGULATORY AGENCY

FDA

(Food and Drug Administration)

Regulates the importation, use, sale, manufacture and distribution of all drugs in the U.S.A.

Warning Labels/Stickers

May be printed on medication label or applied as sticker indicating generic substitution, side effects, or specific instructions.

Medication Preparations

Cap - Capsule: Small container made from gelatin.

Tab - Tablet: Most common form used. Pressed in molds.

- Coated or Enteric Coated: Because of bitter taste, time release or to prevent irritation to the lining of the stomach.
- **May not be broken, crushed or chewed.**

Additional Information:

Buccal – Route of administration in which the drug is placed and held in the pocket of the cheek until dissolved.

Transcription

- Always use **BLACK** ballpoint pens (**never pencil, felt tip pen, colored ink or gel pen**).
- Always write neatly.
- Do not erase or use “white-out”;
 - line through the error, initial and date.

Disposal of Medications

Medications that are expired or no longer needed are to be destroyed.

Follow agency policy regarding medication disposal.

Endocrine System

Consists of glands which secrete chemicals called hormones; e.g., thyroid, pancreas.

Endocrine System

Common diagnoses/conditions

- Diabetes
- Thyroid (hyper/hypo)

Associated medications

- Hormones
- Antidiabetic agents

Additional info:

- x or X – abbreviation for **times**
- SL - Sublingual – route of administration in which a drug is placed and held under the tongue until dissolved; **should always be administered last**. Do not immediately follow SL med with water.
- Mucous Membrane – Moist membrane lining body cavities and canals that may allow substances to pass through into the body tissues.

Jane Smith

Month 4, YYYY

Metformin 500 mg 1 tab po bid for diabetes

Vitamin B12 500 mcg ii tabs SL q day as supplement

Bob Jones, M.D.

Muscular System

Consists of muscles which shape the body and allows the joints to move.

Muscular System

Common diagnoses/conditions

- Muscle Spasm
- Muscle Strain

Associated medications

- Analgesic (used to relieve pain)
- Non-steroidal Anti-inflammatory Drugs (NSAIDS)
- Muscle relaxants

Order/Prescription

CLINIC
000 S. Justen Lane
Anywhere, TN 33333
Phone 000-000-0000
Dr. Bob Jones

Jane Smith Month 4, YYYY

Indocin 25 mg 1 cap po tid for tendonitis

Ibuprofen 200 mg 2 tabs po qid for pain right shoulder

Bob Jones, MD

Nervous System

Consists of the brain, spinal cord
and nerves to control and
coordinate body activities.

Nervous System

Common diagnoses/conditions

- Seizures
- Stroke
- Trauma (Concussion, Contusion)
- Dementia/Alzheimers
- Bipolar disorder

Associated medications

- Anticonvulsants/antiepileptics
- Psychotropics (affect mental state)
- Antidepressants
- Antianxiety/Sedatives

Cumulative Effect

Many medications associated with the nervous system may
take several days or weeks for the drug to reach an effective
level.

TD (Tardive Dyskinesia)

- Tardive Dyskinesia is a side effect of psychotropic medications.
- Usually occurs after the person has taken the medication for a long period of time.
- Person has involuntary and constant movements of the tongue, jaw, lips or eyes.

Neuroleptic Malignant Syndrome/ Serotonin Syndrome

- Life threatening reaction to **psychotropic** medications.
- May begin within hours of administration or can happen at any time the person is on the drug.
- High fever, stiff muscles, irregular heart rate, excessive sweating, excessive saliva and unstable consciousness along with other abnormal signs.

Liquid medications

Drugs that have been dissolved in water or alcohol.

Suspensions: Fine undissolved particles of drug mixed with liquid.

Must be shaken vigorously before giving.

Sprays: Drugs prepared for administration by reducing a liquid to a fine mist.

ALL LIQUID MEDICATIONS MUST BE SHAKEN

Common Liquid Medication Measurements

- 5 ml - 1 tsp (teaspoon)
- 15 ml - 1 tbsp (tablespoon)
- 30 ml - 1 oz (ounce)

Never use ordinary kitchen spoons

Integumentary (Skin) System

Common diagnoses/conditions

- Cellulitis (skin infection)
- Scabies/Lice/Bed bugs
- Rash
- Burns
- Decubitus (pressure sores)

Associated medications

- Anti-itch creams
- Medicated ointments
- Topical anti-infectives
- Anti-fungals

Topical medications:

(Medications administered by all routes other than by mouth)

Creams/Ointments are applied locally to the skin or mucous membrane.

Drops/Sprays are administered in eyes, ears, and nostrils.

Suppository: Drug in a base that melts at body temperature, molded for insertion into the rectum or vagina. May need refrigeration.

Additional Info:

Stop Date - Date last dose of medication is to be given

Order/Prescription

Clinic

Dr. Bob Jones

Jane Smith

Month 9, YYYY

Keflex 250 mg i cap po qid x VII d for cellulitis

Hydrocortisone cream 2.5% apply thin layer to rash on left arm bid

Bob Jones, MD

Topical (skin) Administration

- Route of administration in which a drug is placed on the skin or mucous membrane.

- Identify person.
- Clean the area if indicated (clean away from the affected area). Do not double wipe.
- If using applicator, do not 'double dip'.
- Use gloves if applying directly.
- Spread thin layer of medication on affected area.
- Do not let tip of container touch affected area.
- Cover affected area if indicated.

Sensory System

Consists of eyes, ears, nose mouth and skin to provide sight, hearing, taste, smell and touch.

Sensory System

Common diagnoses

- Eye
 - Conjunctivitis (pink eye)
 - Cataracts
 - Glaucoma
 - Dry eyes

Associated medications

- Ophthalmic (Eye) drop (gtt)

Sensory System

Function:
1. Hearing
2. Balance
3. Smell
4. Taste

Common diagnoses

- Ear
 - Otitis Media (Ear Infection)
 - Excess ear wax

Associated medications

- Otic (Ear) drops (gtts)

Order/Prescription

000 S. Justen Lane
Anywhere, TN 33333
Phone 000-000-0000
Dr. Ann Lents

Jane Smith

Month 10, YYYY

Artificial Tears 2 gtts both eyes bid for dry eyes

Ann Lents, OD

Topical (eye) Administration

- Identify person.
- Wipe from inner corner outward if needed.
- Use clean wipe for each wipe.
- Shake the medication.
- Position with head back and looking upward.
- Separate lids using forefinger for upper and thumb for lower.
- Approach eye from below.
- Instill drops as ordered. Avoid contact with eye.
- Apply near the center of lower lid.
- Do not wipe tip.

Order/Prescription

Clinic
000 S. Justen Lane

Phone 000-000-0000
Dr. Bob Jones

Jane Smith

Month 10, YYYY

Debrox 2 gtts both ears bid X 3 days for excess ear wax

Bob Jones, M.D.

Topical (ear) Administration

- Identify person.
- Tilt head or lie on side until ear is as horizontal as possible.
- Shake the medication.
- Administer by pulling the ear gently up and back.
- Instill drops as ordered. Do not touch ear canal with dropper/container.
- Maintain position for 2 or 3 minutes.
- If to be instilled in both ears, wait at least 5 min before putting in other ear.
- Do not wipe tip.

Respiratory System

Consists of the mouth, nose, trachea and lungs to provide air (oxygen) to the body's cells.

Respiratory System

Common diagnoses/conditions

- Pneumonia
- Upper Respiratory Infection (URI)
- Allergies
- Chronic Obstructive Pulmonary Disease (COPD)
- Sinusitis/Common Cold/Flu
- Asthma
- Bronchitis

Associated medications

- Bronchodilators (increases air flow to lungs)
- Antibiotics (kill bacteria)
- Antihistamines (treat allergies)
- Anti-inflammatories

Aspiration Pneumonia

Infection in the lungs
caused by
breathing in liquids or food.

Order/Prescription

Clinic
000 S. Justen Lane
Anywhere, TN 33333
Phone 000-000-0000
Dr. Bob Jones

Jane Smith

Month 11, YYYY

Flonase 50 mcg 2 sprays each nostril q day for allergies

Bob Jones, MD

Nasal Administration

- Identify person.
- Instruct to blow nose.
- Position sitting with head tilted down.
- Shake the medication.
- Place tip of container just inside the nostril. Close off the other nostril. Instruct to sniff as the container is squeezed.
- Repeat in other nostril if ordered.
- Wipe tip between nostrils and after administration.

GERD

GastroEsophageal Reflux Disease

The backflow of stomach contents into the esophagus.

Positioning

Additional Information:

-“R” or “r” – rectal

-Supp – suppository

-Enteral route (by tube) is administration by way of the stomach or intestines and is

**NOT covered by the exemption
(you cannot administer enteral meds)**

Order/Prescription

Clinic
000 S. Justen Lane
Anywhere, TN 33333

Dr. Tom Bass

Jane Smith

Month 12, YYYY

Dulcolax supp 1 R q3days in the pm for constipation

Fleet enema 1 bottle R q 7 days in the am for constipation

Tom Bass, MD

Rectal Administration

- Identify person.
- Position on left side, right leg bent.
- Lubricate suppository if necessary.
- Insert suppository into the rectum along the rectal wall well beyond the sphincter pushing gently with double gloved finger.
- or
- Shake then insert Fleet type enema tip and slowly squeeze contents from container.
- Slowly withdraw finger or enema tip.

Urinary System

Consists of kidneys, ureters, bladder and urethra;
removes waste from the blood by producing urine.

Urinary System

Common diagnoses/conditions

- UTI (Urinary Tract Infection)
- Cystitis (bladder infection)
- Urinary Retention (unable to urinate)
- Urinary Incontinence (cannot control)

Associated medications

- Muscle Relaxants
- Analgesics
- Antibiotics

Order/Prescription

Clinic
000 S. Justen Lane
Anywhere, TN 33333
Phone 000-000-0000
Dr. Bob Jones

Jane Smith

Month 14, YYYY

Amoxil 250 mg 2 caps po stat and 1 cap po tid X 10 days
for UTI

Bob Jones, MD

- PRN medications may only be administered for the reason ordered.
- A PRN medication ordered for an elevated temperature cannot be given for a headache.

DMHSAS Policy and Planning Council 109

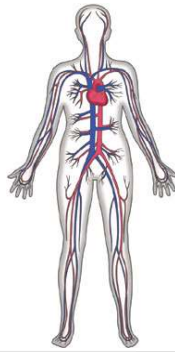

Circulatory System

Also known as the Cardiovascular System

Consists of the heart, blood vessels, blood and lymph system and carries nutrients and oxygen to the body's cells.

Version 10.01.18
© Tennessee Department of Intellectual and Developmental Disabilities 110

Circulatory System

Common diagnoses/conditions

- Hypertension (high blood pressure)
- High Cholesterol
- Excess fluid (edema)
- Angina (chest pain)
- Blood Clots

Associated medications

- Antihypertensives (lower blood pressure)
- Diuretics (decrease fluid by increasing urination)
- Antiarrhythmics (regulates heart rate)
- Cholesterol meds (decreases cholesterol levels)
- Nitrates (treat chest pain)
- Anticoagulants (blood thinner-treats blood clots)

Transdermal Administration

- Route of administration in which a drug is absorbed continuously through the skin into the bloodstream.

- Identify person.
- Gloves must be worn to...
- ...Remove old patch, clean area to remove residue.
- Change to clean gloves.
- Patch must be labeled with date, time and initials.
- Place directly on the skin at the specified area.
- Patch should not be placed in the same spot each application.

Injectable Epinephrine

Life saving measure covered under exemption for severe allergic reaction.

Medication can be in different types of auto-injectors.

Epinephrine Administration

When epinephrine injection is needed:

If coworker is available have them
Call 911.

If no one available to call 911
Administer epinephrine

Epinephrine Administration

If you are responsible for a person who has an epinephrine auto-injector you should review and be familiar with the instructions that come with the medication.

Be sure you know how to use before an emergency happens.

Keep epinephrine auto-injector with you at all times.

Epinephrine Administration

When you are ready to administer:

- Remove auto-injector from case
- Remove cap/s from auto-injector
- With tip (needle end) facing down
 - Hold auto-injector in fist of dominate hand
 - Keep fingers away from either end
- Press the auto-injector firmly against the outer thigh at 90° angle until clicks or fires
- Hold in place for at least 3 seconds
- Remove and massage area

Epinephrine Administration

During Administration:

- **Hold leg still to prevent injury**
- **Do not swing auto-injector which can result in missing the intended location or twisting the device, possibly breaking the needle.**

Following administration:

- **Call 911 if contact not already made.**
- **Make sure auto-injector is given to medical personnel.**
- **Remember to get epinephrine refill.**
- **Document administration on MAR.**

Order/Prescription

Epinephrine 0.3 mg inject PRN for bee sting

Tim Ware, MD

Routine Insulin Administration

- Allowed by exemption but requires additional specialized individual specific training.
- Does not include drawing up of insulin.
- Does not include sliding scale insulin.

Administering medications is a serious responsibility.

Medication Variance

- Medication variances and omissions can occur during transcribing, preparing, administering or in the documentation of a medication. A medication variance occurs at any time that a medication is given in a way that is inconsistent with how it was ordered by the prescribing practitioner and in accordance with the “Eight Rights” (i.e., right dose, right drug, right route, right time, right position, right texture, right person and right documentation).

Medication Variance

- Medication variances and omissions are to be reported on the medication variance form and are categorized according to severity (Categories A-I).
- POTENTIAL - Categories A and B have the potential to cause harm but the medication did not reach the person.
- ACTUAL - In categories C to I, the medication actually reached the person and has the capacity to cause harm, therefore the prescribing practitioner or hospital emergency room shall be contacted.

Medication Variance

- Categories E-I require a Reportable Incident Form, with a copy of the Medication Variance Form.
- In all cases, medication administration by someone who was not certified requires investigator notification.

IMPORTANCE OF REPORTING A MEDICATION VARIANCE

- to recognize trends
- to improve safe medication administration

Medication Variance

Category

Potential

- A Could result in a variance. Situation caught prior to being transcribed to MAR.
- B Identified prior to actual administration. Situation caught while preparing to administer medication.

Actual

- *C No harm or unlikely to cause harm. Variance occurred; person received drug, practitioner notified and states 'no harm'.
- *D Additional Monitoring. Variance occurred; practitioner notified and ordered additional monitoring.
- *E Intervention. Seen by practitioner; office, ER, etc.
- *F Hospitalization. Admitted to hospital and recovered completely.
- *G Permanent harm. Admitted to hospital, recovered but has lasting effects.
- *H Near death event. Required intervention necessary to sustain life.
- *I Death. Variance resulted in or contributed to death.

Practitioner Notified - Required for any actual variance; category C-I.
Reportable Incident Form Completed - Required for any variance falling in category E-I. Completion of a reportable incident form and investigator notification is required anytime a variance involved someone who was not certified.
Investigator Notified - Required for staff not certified.
Signature/Title-Date - Completed by person filling out the form.
Outcome-Signature/Title-Date - Completed by person responsible for reviewing, tracking and trending of medication variances for the agency.

Medication Variance

- Jane received an order on the 14th for Amoxil 250 mg po 2 tablets STAT and then Amoxil 250 mg 1 tablet tid times 7 days.
- Staff who works with her at the day program administered Amoxil 250 mg 1 tablet as the STAT dose at 2 pm.

Written Test

The written test will consist of multiple choice questions and transcription of practitioner orders to MAR

Skills Test

The skills test requires you to demonstrate administration of medications at the time listed on the top of the MAR.

Skills Test

Trainer will observe your skills:

- Enter testing area as you would enter med area at persons home
- Check MAR for medication due at time listed on test
- Prepare medication
- Administer
- Document

MEDICATION ADMINISTRATION RECORD
