

Name: _____ Teacher: _____ School: _____

Grade 4: Lesson 16 Division with Remainders

Answer each question.

1. Olivia bakes 53 mini-loaves of banana bread to be sliced for snacks at a craft fair. She will place an equal number of loaves in 6 different locations.

a. How many loaves will be at each location?

b. Will any loaves be left over? If so, how many?

2. Ed carves 22 small wooden animals to sell at the craft fair. He displays them in rows with 4 animals in each row.

a. How many rows will he have?

b. How many animals will not be in equal rows?

3. Teresa is making sock puppets. She needs 5 buttons to make each puppet. If she has 53 buttons, how many sock puppets can she make? Will she have any buttons left over? If so, how many?

4. A teacher plans for groups of her students to eat lunch at 5 tables. She has 34 students in her class. How many students can sit at each table? Explain how to use the quotient and remainder to answer the question.
