Re: Phase 3 (Borrow Areas) Characterization Report for the Environmental Management Disposal Facility, Oak Ridge, Tennessee

Dear Mr. Japp:

The Tennessee Department of Environment and Conservation (TDEC) – Division of Remediation received the subject report on October 1, 2019. The transmittal letter states that the report provides characterization data for three potential borrow areas for the proposed Environmental Management Disposal Facility (EMDF).

TDEC appreciates the U.S. Department of Energy (DOE) providing this information. As noted in TDEC's March 6, 2019 letter (Attachment 1), documents associated with this effort are pre-decisional before a Record of Decision (ROD) authorizes construction of an onsite landfill and demonstrates that it will achieve the threshold criteria of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA).¹ Therefore, TDEC will review this report following TDEC approval of a final decision document.

In the meantime, TDEC remains committed to helping DOE expedite cleanup of environmental contamination in the ORR and is focusing its available resources on the effort to ensure the forthcoming ROD meets CERCLA criteria. In this context, TDEC continues to seek and encourage innovative solutions to CERCLA waste disposal challenges on the Oak Ridge Reservation. Based on DOE's April 4, 2019 letter (Attachment 2), TDEC understands that DOE has elected to perform pre-decisional work at its own financial and schedule risk.

¹ Threshold criteria include overall protection of human health and the environment and compliance with applicable or relevant and appropriate requirements (ARARs).

Please direct any questions or comments regarding the contents of this letter to Brad Stephenson at 865-220-6587.

Sincerely

Re:

- 1) Site Preparation Plan for the Proposed Environmental Management Disposal Facility for Comprehensive Environmental Response, Compensation, and Liability Act Oak Ridge Reservation Waste Disposal, Oak Ridge, Tennessee (DOE/OR/01-2805&D1)**
- 2) Phase 3 (Borrow Areas) Field Sampling Plan for the Proposed Environmental Management Disposal Facility for Comprehensive Environmental Response, Compensation, and Liability Act Oak Ridge Reservation Waste Disposal, Oak Ridge, Tennessee (DOE/OR/01-2808&D1)**

Dear Mr. Japp,

The Tennessee Department of Environment and Conservation (TDEC) – Division of Remediation received the Site Preparation Plan (SPP) for the Central Bear Creek Valley (CBCV) site on January 3, 2019, and the Phase 3 Field Sampling Plan (FSP) for associated soil borrow areas on January 16, 2019. These documents concern the U.S. Department of Energy's (DOE's) proposed Environmental Management Disposal Facility (EMDF).

As noted in the minutes of the April 25, 2018 project team meeting, submittal of the SPP stems from DOE's desire to "have an early start" for "early site preparation activities" at the CBCV site. At that time, TDEC accepted the concept of an SPP if DOE elects to complete the planned work under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) and the Federal Facility Agreement (FFA) for the Oak Ridge Reservation. While the SSP and FSP are secondary documents that do not require TDEC approval, TDEC usually chooses to review and comment on secondary documents.

During September 2018, DOE issued the EMDF Proposed Plan identifying onsite disposal at the CBCV site as the preferred alternative. The Proposed Plan includes outstanding tasks to complete before deciding whether to build EMDF. Local community members provided numerous comments on the Proposed Plan, including the need to complete outstanding tasks before making a decision. In accordance with CERCLA, the remedial action decision is made and documented in a Record of Decision (ROD). Per the FFA, the ROD decision is made jointly by DOE, the U.S. Environmental

Protection Agency (EPA), and TDEC. A ROD has not been effectuated for this decision. Without a ROD authorizing construction of an onsite landfill, the SPP and FSP are pre-decisional documents.

The National Oil and Hazardous Substances Pollution Contingency Plan says a remedy may not be selected until it has been determined to meet CERCLA threshold criteria including overall protection of human health and the environment and compliance with applicable or relevant and appropriate requirements. It is the State's position that the seven key concerns identified in the State Acceptance section of the Proposed Plan must be resolved to demonstrate that threshold criteria are met. For these reasons, it would be premature for TDEC to review the SPP or the Phase 3 FSP before approving a ROD that selects onsite disposal of CERCLA waste.

Please direct any questions or comments regarding this letter to Brad Stephenson. You may reach him at the above address or by phone at (865) 220-6587.

Sincerely

Dear Ms. Jones and Mr. Young:

**RESPONSE TO THE U.S. ENVIRONMENTAL PROTECTION AGENCY AND
TENNESSEE DEPARTMENT OF ENVIRONMENT AND CONSERVATION LETTERS**

- References:
1. *Site Preparation Plan for the Proposed Environmental Management Disposal Facility for Comprehensive Environmental Response, Compensation, and Liability Act Oak Ridge Reservation Waste Disposal, Oak Ridge, Tennessee (DOE/OR/01-2805&D1)*
 2. *Phase 3 (Borrow Areas) Field Sampling Plan for the Proposed Environmental Management Disposal Facility for Comprehensive Environmental Response, Compensation, and Liability Act Oak Ridge Reservation Waste Disposal, Oak Ridge, Tennessee (DOE/OR/01-2808&D1)*

The U.S. Department of Energy (DOE) acknowledges receipt of your notifications indicating that you will not review nor provide comments on the subject documents regarding site preparation activities that are to support the proposed Environmental Management Disposal Facility (EMDF).

These documents were prepared consistent with Federal Facility Agreement tri-party discussions and agreements reached in Integrated Project Team meetings. DOE will continue planning and performing activities to minimize delays in implementation of the proposed remedial action supportive of the continued remediation of the Oak Ridge National Priorities List Site in a safe, efficient, and effective manner. These planning activities include characterization of borrow area soils needed to support design of the facility (addressed in both the referenced documents). Field work described in the Site Preparation Plan (e.g., road re-routes and extension of utility services to the site) will not be undertaken prior to an approved Record of Decision.

**RESPONSE TO THE U.S. ENVIRONMENTAL PROTECTION AGENCY AND
TENNESSEE DEPARTMENT OF ENVIRONMENT AND CONSERVATION LETTERS**

Your timely and constructive comments are appreciated, and do not constitute approval of the proposed EMDF. DOE intends to continue moving forward with activities described in these documents, recognizing that proactive, parallel planning is required to ensure that discussions surrounding the proposed EMDF do not unnecessarily and inappropriately interrupt or impede the Oak Ridge Site cleanup schedule.

If you have any questions concerning this letter or if we can be of further assistance, please contact John Michael Japp at (865) 241-6344 or Brian Henry at (865) 241-8340.

Sincerely,

Brian T. Henry
