STATE OF TENNESSEE DEPARTMENT OF FINANCE AND ADMINISTRATION STATE CAPITOL NASHVILLE, TENNESSEE 37243-0285

MARK A. EMKES COMMISSIONER

March 29, 2011

To the Honorable Bill Haslam, Governor of the State of Tennessee, Members of the Legislature, and Citizens of the State of Tennessee.

Tennessee Code Annotated 4-3-1007 requires the Department of Finance and Administration to maintain a system of general accounts embracing all the financial transactions of state government. As a part of the carrying out of this responsibility, I am pleased to submit the Comprehensive Annual Financial Report of the State of Tennessee for the fiscal year ended June 30, 2010.

Management assumes full responsibility for the completeness and reliability of the information contained in this report, based upon a comprehensive framework of internal control that it has established for this purpose. Because the cost of internal control should not exceed anticipated benefits, the objective is to provide reasonable, rather than absolute, assurance that the financial statements are free of any material misstatements.

State statutes require an annual audit of all financial statements of the state. The Office of the Comptroller of the Treasury, Division of State Audit, has issued an unqualified ("clean") opinion on the State of Tennessee's financial statements for the year ended June 30, 2010. The independent auditor's report is located at the front of the financial section of this report.

As part of the audit of these financial statements, the Division of State Audit conducted an organization-wide audit as described in the Single Audit Act of 1984, as amended, and Office of Management and Budget Circular A-133, Audits of State, Local Governments, and Non-Profit Organizations. The audit included tests of compliance with applicable federal laws and regulations, as well as, a study and evaluation of internal controls, including internal accounting and administrative controls used in administering federal financial assistance programs. The results of this single audit are published under separate cover by the Division of State Audit.

Management's discussion and analysis (MD&A) immediately follows the independent auditor's report and provides a narrative introduction, overview, and analysis of the basic financial statements. MD&A complement this letter of transmittal and should be read in conjunction with it.

Profile of the Government

The State of Tennessee was admitted to the union in 1796, as the sixteenth state. Tennessee has 42,146 square miles and a population estimated to be 6.3 million. The state has three branches of government, Executive, Legislative and Judicial. The Governor, who appoints commissioners to lead the various departments, heads the Executive branch. The Legislative branch is bicameral, with 99 members of the House of Representatives and 33 Senators. The Representatives serve two-year terms. The Senators serve four-year terms, with about one half being elected every two years. The Judicial branch rules on the constitutionality of laws enacted by the Legislature and the legality of administrative policies and regulations of the Executive branch.

The State of Tennessee provides a full range of services including education, health and social services, transportation, law, correction, safety, resources, regulation, and business and economic development. Its financial reporting entity includes all the funds of the primary government as well as all its component units. Component units are legally separate entities for which the primary government is financially accountable. The determination of "financial accountability" is based on criteria established in Governmental Accounting Standards Board Statement No. 14. Note 1.A to the financial statements explains more fully which organizations are included in the reporting entity.

State legislation requires the Governor to present his proposed budget to the General Assembly at the beginning of each annual session. Annual budgets are adopted for the general fund, special revenue funds (except Fraud and Economic Crime and the Dairy Promotion Board), and debt service fund. The General Assembly enacts the budget through passage of specific departmental appropriations, the sum of which may not exceed estimated revenues. Before signing the Appropriations Act, the Governor may veto or reduce any specific appropriation, subject to legislative override. Once passed and signed, the budget becomes the state's financial plan for the coming year.

Budgetary control is maintained at the department level. Budget revisions during the year, reflecting program changes or interdepartmental transfers of an administrative nature, may be affected with certain executive and legislative branch approval. Only the legislature, however, may transfer appropriations between departments.

Local economy

Situated in the eastern south-central United States, Tennessee is within a day's drive from 75 percent of the major markets that represent 50 percent of the entire United States population. Its central location, along with a strong transportation infrastructure (including 1,062 miles/1,609 km of navigable waterways), makes it a strategic choice for business. In the last four years more than fifty new corporate headquarters have decided to call Tennessee home. With over a 41 percent land base in farmland (nationally, Tennessee ranks 8th in the number of farms), Tennessee's business community is diverse, representing a wide range of companies in manufacturing, technology, back office, and agriculture. In all, Tennessee is home to nine Fortune 500 companies, and seven hundred thirty four foreignowned subsidiaries representing thirty six countries. Tennessee offers one of the lowest per capita tax burdens in the nation and consistently ranks among the top ten states for business climate.

While the "Great Recession" technically ended in June 2009, and the economy is finally moving in the right direction, the slow pace of expansion for the nation translates into slow growth for the Tennessee economy as well. Most measures of economic activity, including employment and taxable sales, remain well below their pre-recession peaks. Still, as Tennessee entered 2010, the state saw modest and preliminary indications of an economy that was on the mend. Tennessee's seasonally-adjusted unemployment rate peaked at 10.9 percent in June, July, and August of 2009, and with some backward movement along the way, the state's unemployment rate has edged down since then, reaching a 9.4 percent low in late 2010. In addition, while revenue levels are still below collections from fiscal year 2008, Tennessee, much like the southeast and the nation, saw promising tax revenue collections in the second half of 2010.

The recession is expected to have long-term effects on both national and state labor markets. Between December 2007 and November 2010, the nation lost 7.4 million jobs reflecting 5.4 percent of total employment. Only two states posted employment gains over this period, while Tennessee endured losses of 6.6 percent. In 2000, just before the onset of the 2001 recession, the state unemployment rate was only 4 percent; in 2007, unemployment in the U.S. and Tennessee was under 5 percent. Following the start of the recession in December 2007, unemployment increased to great heights. In 2010, Tennessee's unemployment rate averaged 10 percent which was higher than the national average of 9.6 percent, but compares favorably to most states in the southeast region. Looking forward, the annual unemployment rate in both the U.S. and Tennessee is expected to slowly decline but remain elevated throughout the decade. Overall nonfarm employment in Tennessee is expected to grow at 1.3 percent compound annual growth rate between 2010 and 2020. Sectors expected to grow the fastest are professional and business services, natural resources, mining and construction, and education and health services. Job creation remains a top priority of the state, with strategies tailored to the unique assets of each region of the state and a heavy focus on rural job creation.

Over the next ten years, inflation adjusted state gross domestic product is projected to grow at a 2.8 percent compound annual growth rate, slightly below the rate of growth for the output of the nation, but well above the historical record between 2000 and 2010. Likewise, nominal personal and per capita incomes in Tennessee are expected to grow over the next decade at rates near those for the nation (4.9 and 4.1 percent, respectively).

The tepid economic growth that is finally emerging in Tennessee is building on the longest and deepest economic downturn in modern history. Unlike most recessions, the "Great Recession" that began in 2007 and ended in 2009 will continue to have a significant impact on economic performance for many years to come. The decade ahead will represent a period of significant adjustment and restructuring for both the state and national economies. Economists believe the near-term outlook for the state to be largely positive, but expect relatively modest rates of expansion compared to recovery from other historic recessions. Nonfarm employment is expected to advance 1.3 percent in 2011, the first annual gain since 2007; and, after averaging 10 percent in 2010, the unemployment rate is expected to drop to 9.1 percent in 2011 and to 8.8 percent in 2012. This slow but steady improvement in economic conditions should help support improvement in taxable sales activity.

Long-term financial planning

The state has a careful multi-year budget planning process that is designed to preserve core services to the people of Tennessee. The recession has caused the state's revenue base to be reduced. The budget planning process has addressed the effect through a combination of program reductions and the use of reserves. Recurring base budget reduction plans in general fund programs throughout state government are being implemented during 2011, as they were in 2010. Non-recurring funds from state sources (for example, capital project cancellations and funding changes, program reserves, and the revenue fluctuations reserve), as well as U.S. economic recovery sources, will be used to preserve core services and help state agencies and local service providers implement the reductions thoughtfully over a one-year or multi-year period. Under the current plan, budgeted expenditures will match revenue projections (which have been based on a slow economic recovery) without the use of non-recurring revenues.

Relevant financial policies

In 1996, legislation was enacted that determined the allocation goal for a reserve for revenue fluctuations to be five percent of the estimated state tax revenues to be allocated to the general fund and education trust fund. The revenue fluctuation reserve allows services to be maintained when revenue growth is slower than estimated in the budget. Amounts in the revenue fluctuation reserve may be utilized to meet state tax revenue shortfalls. Subject to specific provisions of the general appropriations bill, an amount not to exceed the greater of \$100 million or one-half (1/2) of the amount available in the reserve may be used to meet expenditure requirements in excess of budgeted appropriation levels. At June 30, 2010, the balance in this reserve was \$453.1 million.

In recent years, subject to the specific provisions of an appropriation act, state legislation was also passed that allows certain funds, reserve accounts or program carry forwards to be denied, and allows for the transfer of funds from the same, for purposes of meeting the requirements of funding the operations of state government. Certain reserve funds specific to the TennCare program (one of the largest government-run managed healthcare organizations in the country) have been preserved in an effort to prevent sudden financial instability from federal financing changes beyond the state's control.

The Governor may effect spending reductions to offset unforeseen revenue shortfalls or unanticipated expenditure requirements for particular programs. These spending reductions can take the form of deferred equipment purchases, hiring freezes, and similar cutbacks. If necessary, the Governor may reduce portions of administrative budgets prior to allotment. Furthermore, the governor is authorized to call special sessions of the General Assembly at any time to address financial or other emergencies.

Major initiatives

Tennessee maintains education as the state's top priority, considering it the key to the future success of the state. The state applied for and won a \$501.8 million grant in the competitive American Recovery and Reinvestment Act (ARRA) federal program called Race to the Top. This grant will be used for implementing a plan for comprehensive education reform. Key areas of reform are administration, standards and assessments, data systems, teachers and leaders, and school turn-around. The state continues to fund the Basic Education Program formula, which provides an equitable state share of K-12 public education funding to local education agencies.

ARRA funds in 2011, totaling \$1.3 billion, will assist in maintaining state services and will provide additional non-recurring support in federal grant programs.

Awards and acknowledgements

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the State of Tennessee for its comprehensive annual financial report (CAFR) for the fiscal year ended June 30, 2008. This was the thirtieth consecutive year that the state has received this prestigious award. In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements. A Certificate of Achievement is valid for a period of one year only. We believe that our current comprehensive annual financial report meets the Certificate of Achievement Program's requirements and we are submitting it to the GFOA to determine its eligibility for another certificate.

The Tennessee Consolidated Retirement System was awarded a Certificate of Achievement for Excellence in Financial Reporting for its comprehensive annual financial report for the fiscal year that ended June 30, 2009. This was the twenty-second consecutive year that the System received this prestigious award. In addition, for the seventeenth year, the state received GFOA's Distinguished Budget Presentation Award for its annual budget document for fiscal year 2009-2010. In order to receive this award, a governmental unit must publish a budget document that meets program criteria as a policy document, an operations guide, a financial plan, and a communications device.

The preparation of this report would not have been possible without the professionalism and dedication demonstrated by the entire staff of the Division of Accounts in the Department of Finance and Administration; and, the cooperation of all state agencies and branches. My sincerest appreciation is extended to all of the contributing staff and organizations.

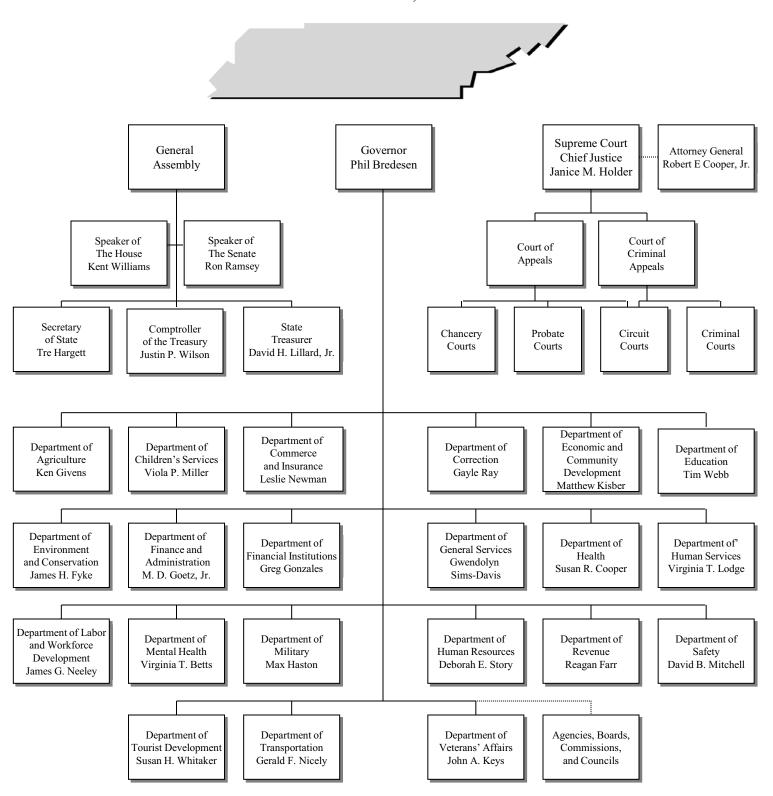

Respectfully submitted,

mala, Ember

Independent Auditor's Report

March 29, 2011

To the Members of the General Assembly of the State of Tennessee and The Honorable Bill Haslam, Governor of the State of Tennessee

Ladies and Gentlemen:

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Tennessee as of and for the year ended June 30, 2010, which collectively comprise the State's basic financial statements as listed in the table of contents. These financial statements are the responsibility of the State of Tennessee's management. Our responsibility is to express opinions on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in generally accepted government auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinions. Tennessee statutes, in addition to audit responsibilities, entrust certain other responsibilities to the Comptroller of the Treasury. Those responsibilities include serving as a member of the board of directors of the Baccalaureate Education System Trust, Board of Claims, Board of Standards, Chairs of Excellence, Local Education Insurance Committee, Local Government Insurance Committee, State Building Commission, State Funding Board, State Insurance Committee, Tennessee Consolidated Retirement System, Tennessee Housing Development Agency, Tennessee Local Development Authority, Tennessee Student Assistance Corporation, and the Tennessee State School Bond Authority. We do not believe that the Comptroller's service in these capacities affected our ability to conduct an independent audit of the State of Tennessee.

Page 2 March 29, 2011

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Tennessee as of June 30, 2010, and the respective changes in financial position and cash flows, where applicable, thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 4 to the financial statements, the State implemented the Governmental Accounting Standards Board's statement No. 51, Accounting and Financial Reporting for Intangible Assets, and statement No. 53, Accounting and Financial Reporting for Derivative Instruments.

The management's discussion and analysis, the schedule of revenues, expenditures and changes in fund balances – budget and actual, infrastructure assets reported using the modified approach, other post employment benefits schedule of funding progress for primary government, other post employment benefits schedule of funding progress for component units, and AccessTN Insurance Fund – ten-year claims development table are not a required part of the basic financial statements but are supplementary information required by accounting principles generally accepted in the United States of America. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit the information and express no opinion on it.

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the State of Tennessee's basic financial statements. The introductory section, combining and individual nonmajor fund financial statements and schedules, and the statistical section are presented for purposes of additional analysis and are not a required part of the basic financial statements. The combining and individual nonmajor fund financial statements and schedules have been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, are fairly stated in all material respects in relation to the basic financial statements taken as a whole. The introductory section and statistical section have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we express no opinion on them.

In accordance with generally accepted government auditing standards, we have issued our report dated March 29, 2011, on our consideration of the State of Tennessee's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters in the *Tennessee Single Audit Report*. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with generally accepted government auditing standards and should be considered in assessing the results of our audit.

Sincerely,

Division of State Audit

AAH/tlk

MANAGEMENT'S DISCUSSION AND ANALYSIS

Our management discussion and analysis (MD&A) of the State of Tennessee's (the State's) financial performance provides an overview of the State's financial activities for the year ended June 30, 2010. Please read it as a narrative introduction to the financial statements that follow. The information included here should be considered along with the transmittal letter which can be found on pages 3-6 of this report. MD&A includes a description of the basic financial statements for government, condensed financial information along with analyses of balances and financial position, descriptions of significant asset and debt activity, discussions of budgetary matters and significant issues affecting financial position.

FINANCIAL HIGHLIGHTS

• Government-wide:

Net Assets - The assets of the State exceeded its liabilities at June 30, 2010, by \$26.95 billion (reported as net assets). Of this amount, \$1.4 billion may be used to meet the State's obligations not funded by restricted net assets. However, \$23.36 billion of this amount represents *invested in capital assets, net of related debt*, which cannot be used to fund ongoing activities of the government.

Changes in Net Assets - The State's net assets increased by \$575.73 million. This increase was largely the result of an increase in capital assets.

Component units - Component units reported net assets of \$5.58 billion, an increase of \$536.9 million.

Fund Level:

At June 30, 2010, the State's governmental funds reported combined ending fund balances of \$3.78 billion, an increase of \$2.3 million (see discussion on page 18) compared to the prior year. Of the combined fund balance approximately \$1.6 billion is available for spending at management's discretion (unreserved fund balance); however, \$453.1 million of this amount is designated for revenue fluctuations.

• Long-Term Debt:

The State's total debt increased by \$214.96 million during the fiscal year to total \$1.930 billion. This change primarily results from the State's decision to issue general obligation bonds during the fiscal year to obtain long-term financing for capital projects.

USING THIS ANNUAL REPORT

This annual report consists of a series of financial statements. The Statement of Net Assets and the Statement of Activities (on pages 25 and 26-27) provide information about the activities of the State as a whole (government-wide statements) and present a longer-term view of the State's finances. Fund financial statements start on page 30. For governmental activities, these statements tell how services were financed in the short term as well as what remains for future spending. Fund financial statements also report the State's operations in more detail than the government-wide statements by providing information about the State's most significant funds. The remaining statements provide financial information about activities for which the State acts solely as a trustee or agent for the benefit of those outside of the government.

Reporting the State as a Whole

The Statement of Net Assets and the Statement of Activities

Our analysis of the State as a whole begins on page 15. One of the most important questions asked about the State's finances is, "Is the State as a whole better off or worse off as a result of the year's activities?" The Statement of Net Assets and the Statement of Activities report information about the State as a whole and about its activities in a way that helps answer this question. These statements include all assets and liabilities using the *accrual basis of accounting*, which is similar to the accounting used by most private-sector companies. All of the current year's revenues and expenses are taken into account regardless of when cash is received or paid.

These statements report financial information about the entire government except fiduciary activities. The statements distinguish between the primary government and its component units, and also distinguish between governmental activities and business-type activities of the primary government. The Statement of Net Assets displays all the State's financial and capital resources in the format of assets minus liabilities equal net assets. The Statement of Activities reports the State's operations by function to arrive at net revenue (expense). The statement reports what type revenue (either program revenue or general revenue) funds the government operations. The State functions that are identified on this statement correspond to the functions used for budgetary purposes:

- Governmental activities—general government; education; health and social services; law, justice and public safety; recreation and resources development; regulation of business and professions; transportation; intergovernmental revenue sharing; payments to fiduciary funds and interest on long-term debt.
- Business-type activities-employment security, insurance programs, loan programs and other.
- Component units—significant component units include the Tennessee Housing Development Agency, the Tennessee Education Lottery Corporation, the Tennessee Board of Regents, and the University of Tennessee. Although these and other smaller entities are legally separate, these "component units" are important because the State is financially accountable for them.

Reporting the State's Most Significant Funds

Fund financial statements

Our analysis of the State's major funds begins on page 18. The fund financial statements begin on page 30 and provide detailed information about the most significant funds—not the State as a whole. Some funds are required to be established by State law and by bond covenants. However, the State establishes many other funds to help it control and manage money for particular purposes (like capital projects) or to show that it is meeting legal responsibilities for using certain taxes, grants, and other money. The State's two kinds of funds—governmental and proprietary—use different accounting approaches.

Governmental funds focus on the near-term inflows and outflows of funds and the balances left at year-end available for spending. The *modified accrual basis of accounting* is used for these funds, which means that we measure cash and all other financial assets that can readily be converted to cash. These statements provide a short-term view of the State's basic general government operations. One can determine whether there are more or fewer financial resources that can be spent in the near future. The governmental activities in the Statement of Net Assets are reconciled to the governmental funds in the fund financial statements in a reconciliation at the bottom of the fund financial statements.

Proprietary funds report the government services that charge service fees to its customers. Proprietary funds include enterprise funds (serving citizens) and internal service funds (serving state agencies). The enterprise funds are the same as the business-type activities reported in the government-wide statements, but provide more detail; whereas, the internal service funds are included in the governmental activities.

Notes to the financial statements. Notes to the financial statements are also included and provide necessary information to understand the financial statements. They are an integral part of the financial statements and focus on the primary government and its activities. Some information is provided for significant component units.

The State as Trustee

Reporting the State's Fiduciary Responsibility

Fiduciary funds are used to report resources held for the benefit of parties outside the government. Fiduciary funds are not reflected in the government-wide financial statements because the State cannot use these assets to finance its operations. Instead, the State is responsible for using the fiduciary assets for the fiduciary fund's intended purposes.

THE STATE AS A WHOLE

Government-wide Financial Analysis

Net assets may serve over time as a useful indicator of a government's financial position. In the case of the State, combined assets exceeded liabilities by \$26.95 billion as of June 30, 2010.

By far, the largest portion of the State's net assets (87%) reflects its investment in capital assets (e.g., land, infrastructure, structures and improvements, machinery and equipment) less any related debt used to acquire those assets that is still outstanding. The State uses these capital assets to provide services to its citizens; consequently, these assets are not available for future spending. Although the State's investment in its capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.

An additional portion of the State's net assets (8.01%) is restricted and represents resources that are subject to either external restrictions or legislative restrictions on how they may be used. The remaining balance is unrestricted net assets (\$1.4 billion) and may be used to meet the State's ongoing obligations to citizens and creditors not funded by resources that are restricted.

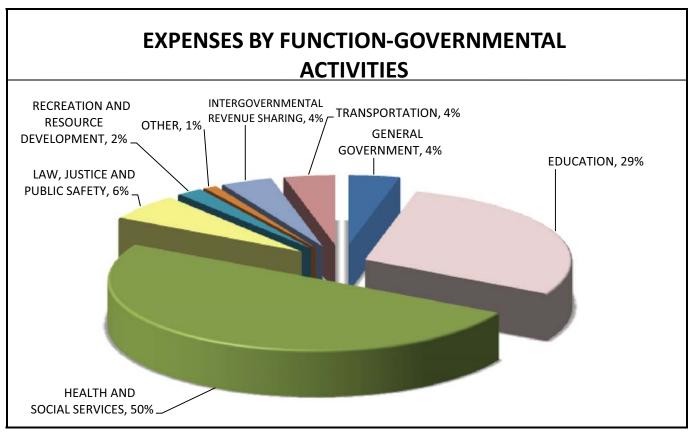

At the end of the current fiscal year, the State was able to report positive balances in all three categories of net assets, for the government as a whole, and for its separate governmental and business-type activities.

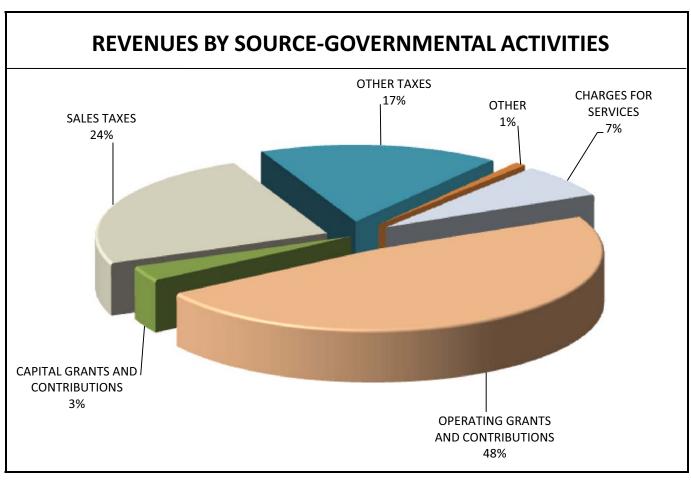

The State's net assets increased by \$575.7 million during the year ended June 30, 2010. A significant portion of this increase was attributable to the improvement of the economy during the second half of the fiscal year. This increase nearly corresponds to prior year's entire decline in net assets.

Governmental activities. Net assets of the State's governmental activities increased by \$532 million, which accounts for 92.5% of the total increase in net assets of the primary government. This increase is primarily due to the use of funds to increase capital assets and an 11% increase in total revenues. The primary revenue increase was from an increase in grants and contributions, mostly from federal sources.

Business-type activities. Net assets of the State's business-type activities increased by \$43.4 million, a 3% increase. The Sewer Treatment Loan program and Employment Security trust fund experienced an increase in net assets of \$63.8 million due to an increase in loan proceeds and in the collection of employer premiums, respectively. The Nonmajor Enterprise funds' activity resulted in a \$20.4 million decrease in net assets.

THE STATE'S FUNDS

Tax collections and expenditures increased overall for the year. Details are in the following paragraphs. The Revenue Fluctuation Reserve has been decreased to \$453.1 million or 2.7% of General fund expenditures.

General fund revenue collections increased for the year by \$1.59 billion. Contributing to this increase were federal reimbursements which increased by \$1.7 billion due to increased expenditures in the TennCare program and as a result of funds received through the American Recovery and Reinvestment Act (ARRA). Offsetting the increase in federal revenue was a \$141.7 million decline in revenues received from departmental services and a \$32 million decline in investment income. Revenues from sales taxes decreased by \$53.4 million from prior year but, revenues from business taxes were \$192.6 million more than prior year.

General fund expenditures increased approximately \$1.1 billion. TennCare expenditures increased by \$500 million and an increase in Human Services expenditures accounts for \$608 million of the total increase. These increases reflect the rising cost of community residential placements and associated medical costs as well as a continued increased demand for services in the health and social services function. In addition, a large percentage of ARRA funds were allocated to programs under these agencies.

Assets in the General fund increased by approximately 17%. The fund balance of the General fund increased by 6.89%. These increases are, in part, the result of increased revenue collections as mentioned in the above paragraph.

The Education Trust fund revenue collections increased approximately \$522 million for the year. The increase was primarily a result of additional federal reimbursements received through ARRA.

Education Trust fund expenditures increased overall by \$347 million or 5.5%. The overall increase was due to additional ARRA funds allocated to No Child Left Behind, School Nutrition, Special Education Services, and higher education programs. The increase was offset by a reduction in expenditures in other educational programs of approximately \$289 million because of budget reductions due to expected decline in tax collections.

Overall revenues and expenditures increased \$165 million and \$275 million, respectively for the highway fund. Revenues and expenditures increased primarily as a result of the increase of federal funds through the ARRA. Also contributing to the increase in revenues and expenditures was the increase in the collections and remittances of fuel taxes to local governments. The excess of expenditures over revenues was funded with state reserves in the highway fund.

The total plan net assets of the pension trust funds were \$28.6 billion, an increase of approximately \$2.2 billion from the prior year. As a result of the improvement in the performance of the financial markets, the pension trust funds incurred a net investment gain of \$2.7 billion.

General Fund Budgetary Highlights

A significant variance occurred in tax revenues in the General fund between original and final budget primarily because of the significant shortfalls in sales and privilege tax revenue collections. Total tax collections were \$67 million under estimates. Business tax collections were over estimates, offsetting a \$95.9 million shortfall in sales tax collections. Significant variances occurred between the federal and departmental revenue budgeted amounts and actual collections because a large majority of the ARRA funds included in budget estimates were not expended in the current year. Actual expenditures in the Tenncare program, Labor and Workforce Development, Economic and Community Development, Finance and Administration and Military were significantly less than was projected in the final budget primarily due to unexpended reserved amounts that were appropriated. The unspent ARRA funds previously mentioned also contributed to the variances in those programs and in Human Services programs. Another element in the favorable variance in Tenncare actual expenditures was the fact that payments to Nursing Homes and ICF/MR private facilities were lower than budgeted. Military and Economic and Community Development were also allotted funds for multi-year projects for energy projects and flood damage repair. These allotments were non-lapsing and carried forward into the next fiscal year.

Capital Asset and Debt Administration

Capital Assets

The State's investment in capital assets at June 30, 2010, of \$24 billion, net of \$1.38 billion accumulated depreciation, consisted of the following:

Capital Assets—Primary Government (Expressed in Thousands)

								Tot	Total

Total	\$_	24,046,140	\$	23,108,828 \$		\$_	\$	24,046,140 \$	23,108,828		

More detail of the activity during the fiscal year is presented in Note 5C to the financial statements.

Capital assets, including those under construction, increased from fiscal year 2009 to 2010 by approximately 4.06 percent. The change was primarily due to purchases of land for highway right-of-ways and completion of segments of infrastructure (highways and bridges). Infrastructure increased in total by \$361 million, the majority of which resulted from highway and bridge projects completed and capitalized. Construction in progress for highways and bridges increased by \$719.5 million and decreased (projects completed and capitalized) by \$362.9 million. Infrastructure right-of-way acreage increased the land classification by \$98.4 million. The structures and improvements increase of \$89.3 million consisted largely of the completion of a new Mental Health facility in West Tennessee for approximately \$41.9 million and \$12.4 million for a new welcome center and rest area. The net change in machinery and equipment of \$35.58 million resulted primarily from \$17.9 million in purchases by the Department of Transportation for the purchase of light duty vehicles and \$5.9 million to equip the new Data Center South in Murfreesboro. The state had several systems projects in the application development stage, accounting for the capitalization of \$37.3 million in software in development.

In accordance with generally accepted accounting standards, the State is eligible for and has adopted an alternative approach to depreciating its roadways and bridges. Under the *modified approach*, governments are permitted to expense the cost of preserving roadways and bridges rather than to record a periodic charge for depreciation expense. Under the depreciation method, preservation expenses are capitalized. The State is responsible for approximately 14,000 miles of roadway and 8,163 bridges. Differences between the amount estimated to be necessary for maintaining and preserving infrastructure assets at targeted condition levels and the actual amounts of expense incurred for that purpose during the fiscal period are the results of timing differences. The budgeting process and the fact that projects are started at different times during the year and take more than 12 months to complete, results in spending in one year amounts that were budgeted in a previous fiscal year(s).

The decision to use the modified approach was essentially made because the State has consistently maintained its infrastructure in what it considers to be a good condition. The most recent condition assessment, which is discussed in more detail in the Required Supplementary Information section (Page 109), indicated that bridges were rated at 7 points above the State's established condition level and roadways were 14 points above the State's benchmark level. Bridges are assessed biennially and roadways annually.

The State's capital outlay budget for the 2009-2010 fiscal year reflects a \$73 million decline from previous years. The capital outlay budget included funding for both capital outlay projects and capital maintenance projects. A significant portion of the budgeted amounts included allocations for the maintenance of higher education and correctional facilities. Other new projects included Infrastructure and Land and Right of Way expenses for the Wacker Chemie AG and West TN Mega-site projects.

Debt Administration

In accordance with the Constitution, the State has the authority to issue general obligation debt that is backed by the full faith and credit of the State. The Legislature authorizes a certain amount of debt each year and the State Funding Board has oversight responsibility to issue the debt for capital projects. Capital spending is also authorized by the Legislature and the State Building Commission has oversight responsibility for all capital projects exceeding \$100 thousand (for new construction) and maintenance to existing facilities. The State issues Commercial Paper as a short-term financing mechanism for capital purposes and the Commercial Paper is typically redeemed with long-term bonds. The unissued balance by function (expressed in thousands) follows:

<u>Purpose</u>	-	nissued 30, 2010
Highway Higher Education Environment and Conservation General Government		98,400 46,344 77 961,235
Total	\$ 2,0	06,056

More detail of the activity during the fiscal year is presented in Note 5H to the financial statements.

The State's outstanding general obligation debt consists of the following (expressed in thousands):

	<u>Ju</u>	Governmental Activity June 30, 2010 June 3								
Bonds, net Commercial Paper	\$	1,688,820 241,390	\$	1,538,942 176,308						
Total	\$	1.930.210	\$	1.715.250						

The State issued \$246.015 million in tax-exempt and taxable general obligation bonds during the fiscal year to redeem commercial paper, which is used to finance capital projects on a short-term basis, and to directly finance other capital projects. The state also issued \$43.985 million of tax-exempt general obligation refunding bonds to provide for the current refunding of \$42.95 million of general obligation bonds. Nearly two-thirds of the outstanding debt has been issued either for capital projects of two of the State's major Component Units-University of Tennessee and Tennessee Board of Regents-or provided to local governments as capital grants; assets acquired with this debt belong to those entities. The State has not issued bonds to fund infrastructure since 1976; infrastructure has been funded on a pay-as-you-go basis. Additional information on long-term obligations is presented in Note 5H to the financial statements.

The State's bonds are rated AAA, Aaa, and AA+ by Fitch Ratings, Moody's Investors Service, Inc., and Standard & Poor's Ratings Services, respectively. Under current State statutes, the general obligation debt issuances are subject to an annual legal debt service limitation based on a pledged portion of certain current year revenues. As of June 30, 2010, the State's annual debt service limit of \$489.1 million was well above the debt service required \$186.7 million, with a legal debt service margin of \$302.4 million.

FACTORS THAT WILL AFFECT THE FUTURE

Tennessee continues to be one of the most business-friendly states in the nation. Economic development trade publications have recognized that Tennessee has a business climate that encourages business expansion and relocation. In 2010, the editors of publications, such as *Site Selection, Southern Business and Development, Chief Executive Officer*, and *Business Facilities*, ranked Tennessee within the top three states in the nation for economic development, growth potential and doing business. Significant expansions and relocations that have occurred recently are discussed below.

In July 2010, NHK Seating of America announced plans to locate a \$54 million manufacturing facility for automotive parts in Murfreesboro, Tennessee.

In August 2010, SMW Automotive, a Tier 1 supplier of automotive chassis, suspension parts and subassemblies, will open a production facility in Shelbyville, Tennessee. The \$26 million facility will supply safety-critical parts such as brake and chassis components for a broad range of vehicles manufactured by companies such as Nissan and Volkswagen.

In September 2010, several companies announced expansions. Whirlpool Corporation is investing \$120 million in a new manufacturing facility to produce premium built-in cooking products in Cleveland, Tennessee. IB-Tech will invest \$50 million to manufacture high quality seat adjusters in Maury County, Tennessee. General Motors announced plans to expand the production of the next generation of its 4-cylinder engines at the company's Spring Hill plant, spending approximately \$483 million to install a third engine manufacturing line. General Mills announced its decision to invest \$100 million to expand the company's production facility in Murfreesboro, Tennessee. The plant manufactures products of General Mill's Yoplait brand.

In November 2010, Koyo Corporation announced the company's plan to invest \$30 million in its Washington County plant. Koyo is a Tier 1 and Tier 2 supplier of steering systems and drivelines for Toyota, Honda, Ford, GM and BMW.

Other major corporations also announced plans for increased investments and expansions. In December 2010, Olin Corporation announced their decision to invest \$160 million in new technology in its Charleston, Tennessee, plant. Olin will expand the production of potassium hydroxide and end its use of mercury cell technology in 2012 with this investment. Electrolux announced its decision to locate a \$190 million facility for the manufacture of major cooking appliances in Memphis, Tennessee. The plant will manufacture the company's Electrolux, and Frigidaire product lines, including ranges, wall ovens and cooktops. Amazon.com has finalized its commitment to establish two fulfillment centers in Tennessee, one in Chattanooga and one in Bradley County. Amazon.com plans to invest \$139 million to construct the two new facilities.

In March 2010, the Tennessee Department of Education won a four-year \$501.8 million grant from the federal government in its first phase of the Race to the Top competition to reform education. Each of Tennessee's 136 individual school districts submitted an individual budget plan, spanning the four years of the Race to the Top grant and outlining detailed reform efforts. The department is working with them to identify growth measures in untested subjects and grades to comply with the state's new evaluation requirements. The TN Department of Education proposed 15 student performance indicators that will be used to track progress toward meeting goals, along with ambitious targets for the level of student performance by 2019-20. As the result of the reforms, the state expects to see strong improvement in young students' academic readiness for school, high school graduates' readiness for college and careers, and higher rates of graduates' enrollment and success in postsecondary education. As part of this initiative, Tennessee has also placed its focus on recruiting and retaining top talent in schools across the state. In January 2011, several school systems were awarded competitive funds to assist in teacher recruitment and retention efforts.

Although sales tax revenues declined in fiscal years 2009 and 2010, beginning in April 2010 positive sales tax growth was recorded. Modest positive growth has been recorded since then through January 2011. The 2010 appropriations act included the use of \$195.8 million from the reserve in fiscal year 2010-2011, leaving an estimated balance of \$257.3 million in the reserve at June 30, 2011.

REQUESTS FOR INFORMATION

This financial report is designed to provide a general overview of the State of Tennessee's finances for all those with an interest in the State's finances. Questions concerning any of the information provided in this report or requests for additional financial information should be directed to the Department of Finance and Administration, Division of Accounts, 312 Rosa Parks Avenue, Suite 1400, Nashville, TN 37243.

GOVERNMENTAL FUNDS FINANCIAL STATEMENTS

General Fund—The General Fund is maintained to account for all governmental financial resources and transactions not accounted for in another fund.

<u>Education Fund</u>—The Education Fund is maintained to account for revenues and expenditures associated with programs involving the Departments of Education and Higher Education. Funding for these programs is accomplished primarily from the dedicated sales and services taxes and federal monies received from the U. S. Department of Education.

Highway Fund—This fund is maintained to account for revenues and expenditures associated with programs of the Department of Transportation. Funding of these programs is accomplished primarily from dedicated highway user taxes and funds received from the various federal transportation agencies. All federal funds accruing to the Highway Fund are received on a reimbursement basis covering costs incurred. It is the State's practice to appropriate matching dollars for jointly funded projects in the year of federal apportionment. This front-end state funding, together with multi-year disbursements on most projects, results in large cash balances in this fund. Effective July 1, 1986, the Department of Transportation began earning interest on certain unspent monies for a new highway construction program, while the General Fund earns the interest on the other highway program monies.

Nonmajor Governmental Funds—Nonmajor governmental funds are presented by fund type in the supplementary section.

State of Tennessee

Reconciliation of the Statement of Revenues, Expenditures, and Changes in Fund Balances of Governmental Funds To the Statement of Activities For the Year Ended June 30, 2010

(Expressed in Thousands)

Net changes in fund balances - total governmental funds	\$ 2,318
Amounts reported for governmental activities in the Statement of Activities are different because:	
Governmental funds report capital outlays as expenditures. However, in the Statement of Activities, the cost of those assets is allocated over their	
estimated useful lives as depreciation expense. This is the amount by which	
capital outlays exceeded depreciation in the current year.	840,233
Revenues in the Statement of Activities that do not provide current financial	
resources are not reported as revenues in the funds.	34,240
The issuance of long-term debt (e.g., bonds, commercial paper) provides	
current financial resources to governmental funds, while the repayment	
of the principal of long-term debt consumes the current financial resources	
of governmental funds. Neither transaction, however, has any effect on	
net assets. Also, governmental funds report the effect of issuance costs,	
premiums, discounts, and similar items when debt is first issued, whereas	
these amounts are deferred and amortized in the Statement of Activities.	
This amount is the net effect of these differences in the treatment of long-term	
debt and related items.	(183,614)
Some expenses reported in the Statement of Activities do not require the use	
of current financial resources and therefore are not reported as expenditures	
in governmental funds.	(134,912)
Internal service funds are used by management to charge the cost of certain	
activities, such as insurance and telecommunications, to individual funds.	
The net revenue (expense) of internal service funds is reported with	(25.06.1)
governmental activities.	(25,964)
Changes in net assets of governmental activities	\$ 532,301

The notes to the financial statements are an integral part of this statement.

PROPRIETARY FUNDS FINANCIAL STATEMENTS

<u>Sewer Treatment Loan</u>—Created in 1987, this fund provides loans to local governments and utility districts for the construction of sewage treatment facilities. The initial sources of the monies are federal grants and state appropriations.

Employment Security Fund—This fund is maintained to account for the collection of unemployment insurance premiums from employers and the payment of unemployment benefits to eligible claimants. Funds are also received from the federal government for local office building construction, supplemental unemployment programs and work incentive payments. As required by law, all funds not necessary for current benefit payments are placed on deposit with the U.S. Treasury. Interest earned from these monies is retained in the fund. Administrative and operational expenses incurred by the Department of Labor and Workforce Development are expenditures of the General Fund.

Nonmajor Enterprise Funds—Nonmajor Enterprise Funds are presented in the supplementary section.

<u>Internal Service Funds</u>—Internal Service Funds are presented in the supplementary section.

FIDUCIARY FUNDS FINANCIAL STATEMENTS

Pension (and other Employee Benefit) Trust Funds—These funds are presented individually in the supplementary section.

<u>Investment Trust Fund</u>—This fund was created in July 1980 to account for local government deposits with the state treasurer and the related interest earnings. Through this program, the participating local governments achieve higher investment income by pooling their funds than they could realize individually.

<u>Private-Purpose Trust Funds</u>—These funds are presented individually in the supplementary section.

Agency Funds—These funds are presented individually in the supplementary section.

NOTE 1 – Summary of significant accounting policies

A. Financial reporting entity

<u>Introduction</u> - As required by generally accepted accounting principles, these financial statements present the primary government (the State) and its component units, entities for which the State is considered to be financially accountable. Discretely presented component units are reported in a separate column in the government-wide financial statements to emphasize they are legally separate from the primary government.

Discretely presented component units

- 1. The <u>Tennessee Student Assistance Corporation</u> (TSAC) (Governmental Fund Type) is responsible for guaranteeing student loans under federal programs and administering federal and state grants and loans to students. The majority of the Board is either appointed by the Governor or are state officials. TSAC's budget is approved by the State.
- 2. The <u>Tennessee Community Services Agency</u> (Governmental Fund Type) provides coordination of funds and programs for the care of the citizens of the State. The Board of the agency is appointed by the Governor and the plan of operation and budget must be approved by the State.
- 3. The <u>Tennessee Housing Development Agency</u> (Proprietary Fund Type) is responsible for making loans and mortgages to qualified sponsors, builders, developers and purchasers of low and moderate income family dwellings. The Board of the agency consists of state officials, appointees of the Governor, and appointees of the Speakers of the House and Senate. The agency budget is approved by the State.
- 4. The <u>Tennessee Education Lottery Corporation</u> (Proprietary Fund Type) is responsible for the operation of a state lottery with net proceeds to be given to the State to be used for education programs and purposes in accordance with the Constitution of Tennessee. The corporation is governed by a board of directors composed of seven directors appointed by the Governor.
- 5. The <u>Tennessee Board of Regents</u> (Proprietary Fund Type) is responsible for the operation of six universities, thirteen community colleges and twenty-seven technology centers. The Board is comprised of state officials and appointees by the Governor and the State provides a substantial amount of funding.
- 6. The <u>University of Tennessee Board of Trustees</u> (Proprietary Fund Type) is responsible for the operation of the University of Tennessee, located primarily on four campuses across the State. The Board is appointed by the Governor and the State provides a substantial amount of the funding.
- 7. The <u>Tennessee Local Development Authority</u> (Proprietary Fund Type) provides financing assistance to local governments through the issuance of bonds and notes. In addition, the Authority assists non-profit corporations in the construction of mental health, mental retardation, or alcohol and drug facilities. The majority of the Board consists of state officials; therefore, the State can impose its will on the Authority.
- 8. The <u>Tennessee State Veterans' Homes Board</u> (Proprietary Fund Type) is responsible for the operation of nursing homes for honorably discharged veterans of the United States armed forces. The Board is appointed by the Governor and its budget is approved by the State. In addition, the issuance of bonds must be approved by the State Funding Board.
- 9. The <u>Tennessee State School Bond Authority</u> (Proprietary Fund Type) finances projects for the University of Tennessee, Tennessee Board of Regents and the Tennessee Student Assistance Corporation. The Authority also finances improvement projects for qualifying K-12 schools in the State in conjunction with a federal government program. The Board of the Authority consists primarily of state officials; therefore, the State is able to impose its will on the organization.

- 10. The <u>Tennessee Certified Cotton Growers' Organization</u> (Proprietary Fund Type) was formed to aid in the eradication of the Boll Weevil. The majority of the Board is appointed by the Commissioner of the Department of Agriculture, and the State provides a substantial amount of funding.
- 11. The <u>Access Tennessee</u> (Proprietary Fund Type) health insurance pool was established to offer health insurance coverage to eligible citizens of the state who are considered uninsurable because of health conditions. The Board of the insurance pool consists of state officials, appointees of the Speakers of House and Senate, and appointees of the Commissioner of Finance and Administration. The funding plan and plan of operation of the insurance pool are approved by the State.

Complete financial statements for each of the individual component units may be obtained at the following addresses:

Tennessee Housing Development Agency 1114 Parkway Towers 404 James Robertson Parkway Nashville, TN 37243

Suite 1600, James K. Polk Building Nashville, TN 37243

Tennessee State Veterans' Homes Board 345 Compton Road Murfreesboro, TN 37130 Tennessee State School Bond Authority Suite 1600, James K. Polk Building Nashville, TN 37243

B. Government-wide and fund financial statements

The government-wide financial statements (i.e., the statement of net assets and the statement of activities) report information on all of the nonfiduciary activities of the primary government and its component units. For the most part, the effect of interfund activity has been removed from these statements. *Governmental activities*, which normally are supported by taxes and intergovernmental revenues, are reported separately from *business-type activities*, which rely to a significant extent on fees and charges for support. Likewise, the *primary government* is reported separately from legally separate *component units* for which the primary government is financially accountable.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment is offset by program revenues. *Direct expenses* are those that are clearly identifiable with a specific function or segment. *Program revenues* include 1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as *general revenues*.

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though the latter are excluded from the government-wide financial statements. Major individual governmental funds and major individual enterprise funds are reported as separate columns in the fund financial statements.

C. Measurement focus, basis of accounting, and financial statement presentation

The government-wide financial statements are reported using the *economic resources measurement focus* and the *accrual basis of accounting*, as are the proprietary fund and fiduciary fund financial statements except for agency funds which have no measurement focus. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Governmental fund financial statements are reported using the *current financial resources measurement focus* and the *modified accrual basis of accounting*. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be *available* when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. Debt service expenditures, as well as expenditures related to compensated absences and claims and judgments, are typically recorded only when payment is due. Also, agency funds, custodial in nature, do not recognize revenues and expenditures and do not present the results of operations or have a measurement focus.

Generally, sales and gross receipt taxes, as well as petroleum and vehicular related taxes and fees and other similar measurable fines, are considered to be available if received in the first 60 days of the new fiscal year. Federal grants, departmental services, and interest associated with the current fiscal period are all considered to be available if received in six months, however, tobacco settlement monies are considered to be available if received in twelve months. All other revenue items are considered to be measurable and available only when cash is received by the State.

The State reports the following major governmental funds:

The *general fund* is the State's primary operating fund. It accounts for all financial resources of the general government, except those required to be accounted for in another fund.

The *education fund* accounts for the financial resources associated with programs involving the Departments of Education and Higher Education.

The *highway fund* accounts for the financial resources associated with the programs of the Department of Transportation.

The State reports the following major proprietary funds:

The sewer treatment loan fund accounts for loans made to local governments and utility districts for the construction of sewage treatment facilities.

The *employment security fund* accounts for the collection of unemployment insurance premiums from employers and the payment of unemployment benefits to eligible claimants.

Additionally, the State reports the following fund types:

Internal service funds account for services provided to other departments or agencies of the State, or to other governments, on a cost reimbursement basis. Internal service fund services include the provision of information technology, facilities management, fleet services, risk management, employee health insurance, accounting services, and purchasing services. Other services include printing, food, postal, records management, supplies, and products provided by Department of Correction inmates.

The *fiduciary fund types* are used to account for resources legally held in trust. Fiduciary activities include the employee pension plan and a flexible benefits plan. Also included is *Baccalaureate Education*, a trust created to permit the purchase of tuition units that may be used at certain higher education institutions. *Children in State Custody* is a fund used to hold monies for the benefit of children in State custody. *Oak Ridge Monitoring* is a trust funded by the federal government for the purpose of monitoring the Oak Ridge landfill for radioactive leakage. *TNInvestco* is a fund that accounts for proceeds held and used to carry out the provisions of the Tennessee Small Business Investment Company Credit Act. Three agency funds account for 1) funds distributed to local governments in the state, 2) refundable deposits and other receipts held in trust until the State is authorized to disburse the funds, and 3) premiums and claims expense of retired employees who participate in the state's healthcare plans.

Private-sector standards of accounting and financial reporting issued prior to December 1, 1989, generally are followed in both the government-wide and proprietary fund financial statements to the extent that those standards do not conflict with or contradict guidance of the Governmental Accounting Standards Board. Governments also have the *option* of following subsequent private-sector guidance for their business-type activities and enterprise funds, subject to this same limitation. The State has elected not to follow subsequent private-sector guidance.

As a general rule, the effect of internal activity, interdepartmental revenues and expenditures (both direct and indirect expenditures), has been eliminated from the government-wide financial statements. An exception is that interfund services provided and used between functions have not been eliminated.

Amounts reported as *program revenues* include 1) charges to customers or applicants for goods, services, or privileges provided, 2) operating grants and contributions, and 3) capital grants and contributions. Internally dedicated resources are reported as *general revenues* rather than as program revenues. Likewise, general revenues include all taxes.

Proprietary funds distinguish *operating* revenues and expenses from *nonoperating* items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. Operating expenses for enterprise funds and internal service funds include the cost of sales and services, administrative expenses, and depreciation on capital assets. Investment income of certain proprietary funds is classified as operating revenue because those transactions are a part of the funds' principal ongoing operations. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

When both restricted and unrestricted resources are available for use, it is the State's policy to use restricted resources first, then, unrestricted resources as they are needed.

Expenditures or expenses for on-behalf payments for local education agencies participating in the Teacher Group Plan and the Medicare Supplement Plan, and for component unit retirees participating in the Medicare Supplement Plan, reduce the Annual Required Contribution for the state's obligation to partially or fully fund the subsidized portion of the retiree's health insurance premiums.

D. Assets, liabilities, and net assets or equity

1. <u>Deposits and investments</u>—The State's cash and cash equivalents includes demand accounts, petty cash and monies in cash management pools. The liquidity of the cash management pools is sufficient to cover any withdrawal request by a participant. This classification also includes short-term investments with a maturity date within three months of the date acquired by the State. These short-term investments, which are not part of the State Cash Pool, are stated at fair value. Investments in the State Cash Pool are stated at cost or amortized cost as this pool is a 2a7-like pool. Collateral, as required by law, is pledged by the various banks and government securities dealers to guarantee state funds placed with them. It is the State's policy to include cash management pools as cash.

Investments not in the State Cash Pool are stated at fair value. Securities traded on a national or international exchange are valued at the last reported sales price at current exchange rates. Investments that do not have an established market are reported at estimated fair values. Investment income consists of realized and unrealized appreciation or depreciation in the fair value of investments. Interest income is recognized when earned. Securities and security transactions are recorded in the financial statements on trade-date basis.

2. <u>Receivables and payables</u>—All outstanding balances between funds are reported as "due to/from other funds." Any residual balances outstanding between the governmental activities and business-type activities are reported in the government-wide financial statements as "internal balances."

All receivables are shown net of an allowance for uncollectibles. Receivables in the State's governmental and fiduciary funds primarily consist of taxes, interest, departmental services and federal revenues, see Note 1C.

3. <u>Inventories and prepaid items</u>—Inventories of materials and supplies are determined by physical count and are valued at cost, principally using the first-in/first-out (FIFO) method. The average cost method is used for the Highway Fund (a Special Revenue Fund) and Motor Vehicle Management, Central Stores and General Services Printing (Internal Service Funds). The costs of governmental fund-type inventories are recorded as expenditures when consumed rather than when purchased.

Certain payments to vendors reflect costs applicable to future accounting periods and are recorded as prepaid items in both government-wide and fund financial statements.

4. <u>Restricted assets</u>—Proceeds of the State's general obligation commercial paper program that remain unspent at year end are classified as restricted cash on the Statement of Net Assets. The commercial paper program provides short-term financing for the State's capital projects.

Component units that issue revenue bonds – Tennessee Housing Development Authority, Tennessee State School Bond Authority, Tennessee Local Development Authority, and Veterans' Homes Board – report restricted cash and investments to 1) satisfy bond covenant requirements, 2) reflect unspent bond, commercial paper, or note proceeds, and 3) reflect resources set aside to meet future debt service payments.

5. <u>Capital assets</u>—Capital assets, which include property, plant, equipment, and infrastructure assets (e.g., roads, bridges, sidewalks, and similar items), are reported in the applicable governmental or business-type activities columns in the government-wide financial statements. Capital assets, with the exception of

infrastructure, are defined by the State as assets with an initial individual cost of \$5,000 or more and an estimated useful life in excess of two years. Infrastructure assets are capitalized regardless of cost or useful life. The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend assets' lives are not capitalized. Capitalized assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at estimated fair market value at the date of donation. Capitalized assets, except for land and infrastructure, are depreciated over their useful lives.

The State holds certain assets such as works of art, historical documents, and artifacts that have not been capitalized or depreciated because the collections are protected and preserved for exhibition, education, or research and are considered to have inexhaustible useful lives.

Major outlays for capital assets and improvements are capitalized as projects are constructed.

The State has elected to apply the modified approach to accounting for infrastructure—roadways and bridges. The modified approach is an alternative to depreciation that may be applied to infrastructure capital assets that meet certain requirements. Under the modified approach, depreciation expense is not recorded for these assets. Instead, costs for both maintenance and preservation of these assets should be expensed in the period incurred. Additions and improvements are capitalized.

Property, plant, and equipment of the primary government are depreciated using the straight line method over the following estimated useful lives:

<u>Assets</u>	Years
Buildings	50
Building improvements	20
Machinery and equipment	3-20

- 6. <u>Compensated absences</u>—It is the State's policy to permit employees to accumulate earned but unused vacation and sick pay benefits. There is no liability for unpaid accumulated sick leave since the State's policy is to pay this only if the employee is sick or upon death. All vacation pay is accrued when earned in the government-wide and proprietary fund financial statements.
- 7. Long-term obligations—In the government-wide financial statements, and proprietary fund types in the fund financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities, business-type activities, or proprietary fund type statement of net assets. Bond premiums and discounts, as well as issuance costs, are deferred and amortized over the life of the bonds using the straight-line method. Bonds payable are reported net of the unamortized bond premium or discount and, when applicable, the deferred amount on refunding. Bond issuance costs are reported as deferred charges and amortized over the term of the related debt.

In the fund financial statements, governmental fund types recognize bond premiums and discounts, as well as bond issuance costs, during the current period. The face amount of debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures.

8. <u>Net assets</u>—consists of three components: *Invested in capital assets, net of related debt* consists of capital assets (including restricted capital assets), net of accumulated depreciation and reduced by the outstanding balances of any bonds, notes or commercial paper, and leases that are attributable to the acquisition,

construction, or improvement of those assets. Unspent debt proceeds at year end are not included in this calculation.

Restricted net assets consist of net assets in which constraints are placed on the use of those net assets either by external entities, such as creditors (debt covenants), grantors, contributors, and laws or regulations of other governments; or by constitutional provisions or enabling legislation of the State. Restrictions imposed by enabling legislation could be changed by future legislative action. Of the \$2.2 billion restricted by the primary government, \$444.1 million was by enabling legislation.

Unrestricted net assets consist of net assets that do not meet the definition of "restricted net assets" or "invested in capital assets, net of related debt."

- 9. <u>Fund equity</u>—In the fund financial statements, governmental funds report reservations of fund balance for amounts that are not available for appropriation or are legally restricted by outside parties for use for a specific purpose. Reserves for statutory and other legal requirements include amounts reserved in connection with enabling legislation, constitutional provisions and other legal requirements. Designations of fund balance represent tentative management plans that are subject to change.
- 10. <u>Fiscal year end</u>—The fiscal year end of the primary government and component units is June 30, except for the Dairy Promotion Board, a special revenue fund; which has a December 31 year end. Also, the Certified Cotton Growers' Organization, a component unit, has a December 31 year end.
- 11. Comparative data/reclassifications—Comparative total data for the prior year have not been presented.

NOTE 2 – Reconciliation of government-wide and fund financial statements

A. Explanation of certain differences between the governmental fund balance sheet and the government-wide statement of net assets

The governmental fund balance sheet includes a reconciliation between *fund balance—total governmental funds* and *net assets—governmental activities* as reported in the government-wide statement of net assets. One element of that reconciliation explains, "Long-term liabilities, including bonds payable, are not due and payable in the current period and therefore are not reported in the funds." The details of this \$2,474.219 million difference are as follows (expressed in thousands):

Bonds payable	\$ 1,424,832
Plus: Premium on bonds issued (to be amortized as interest expense)	91,701
Less: Deferred charge for issuance costs (to be amortized over life of debt)	(1,353)
Less: Deferred charge for bond refundings (to be amortized as interest expense)	(23,933)
Commercial paper payable	171,283
Accrued interest payable	17,705
Capital leases payable	15,492
Claims and judgments	173,874
Compensated absences	231,330
Other post employee benefits	296,362
Pollution remediation	53,901
Other long-term liabilities and accounts payable	 23,025
Net adjustment to reduce fund balance—total governmental funds to arrive at	
net assets—governmental activities	\$ 2,474,219

B. Explanation of certain differences between the governmental fund statement of revenues, expenditures, and changes in fund balances and the government-wide statement of activities

The governmental fund statement of revenues, expenditures, and changes in fund balances includes a reconciliation between *net changes in fund balances – total governmental funds* and *changes in net assets of governmental activities* as reported in the government-wide statement of activities. One element of that reconciliation explains that "Governmental funds report capital outlays as expenditures. However, in the statement of activities the cost of those assets is allocated over their estimated useful lives as depreciation expense." The details of this \$840.233 million difference are as follows (expressed in thousands):

Capital outlay	\$	909,462
Depreciation expense	_	(69,229)
	' <u>-</u>	
Net adjustment to increase net changes in fund balances –		
total governmental funds to arrive at changes in net assets		
of governmental activities	\$_	840,233

Another element of that reconciliation states that "The issuance of long-term debt (e.g., bonds, commercial paper) provides current financial resources to governmental funds, while the repayment of the principal of long-term debt consumes the current financial resources of governmental funds. Neither transaction, however, has any effect on net assets. Also, governmental funds report the effect of issuance costs, premiums, discounts, and similar items when debt is first issued, whereas these amounts are deferred and amortized in the statement of activities." The details of this \$183.614 million difference are as follows (expressed in thousands):

Debt issued or incurred:	
Issuance of general obligation refunding bonds	\$ 43,985
Issuance of general obligation bonds	215,369
Issuance of commercial paper	199,663
Bond premium capitalized	26,359
Debt reduced:	
General obligation bonds/payments to escrow	(43,985)
General obligation debt	(101,804)
Commercial paper redeemed	(155,973)
Net adjustment to decrease <i>net changes in fund balances</i> – total governmental funds to arrive at changes in net assets of	
governmental activities	\$ 183,614

Another element of that reconciliation states that "Some expenses reported in the statement of activities do not require the use of current financial resources and therefore are not reported as expenditures in governmental funds." The details of this \$134.912 million difference are as follows (expressed in thousands):

Compensated absences	\$	(5,498)
Claims and judgments		47,316
Accrued interest		146
Capital lease		(685)
Other postemployment benefits		91,418
Pollution remediation		2,064
Amortization of deferred charge		40
Loss on disposal of capital assets		3,822
Amortization of issuance costs		180
Amortization of bond premiums		(6,303)
Amortization of deferred amount on bond refunding	_	2,412
Net adjustment to decrease <i>net changes in fund balances</i> – <i>total governmental funds</i> to arrive at <i>changes in net assets of</i>		
governmental activities	\$	134,912

NOTE 3 – **Deficit fund equity**

The Purchasing fund, an internal service fund, has a total net asset deficit of \$118 thousand. The Property Utilization fund, an enterprise fund, has a total net asset deficit of \$109 thousand. Both deficits occurred primarily as a result of the reporting of other post employment benefits at the fund level in accordance with GASB 45, Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions.

NOTE 4 – Accounting changes

The following schedule enumerates adjustments for the fiscal year ended June 30, 2010, (expressed in thousands):

	_	6/30/2009 Net Assets As Reported	Adjustments to Net Assets	_	6/30/2009 Net Assets As Restated
Government-wide statements: Component Units	\$_	5,030,034	\$ 11,703	\$_	5,041,737
Total component units	\$_	5,030,034	\$ 11,703	\$_	5,041,737

Adjustments to Net Assets

Component Units

- The University of Tennessee—\$9.795 million represents net assets of the University of Tennessee Research Foundation which is reported as a component unit of the University in this year's statements.
- Tennessee Housing Development Agency—\$1.908 million represents revenue earned on or before June 30, 2009, but received on or after July 1, 2009.

Changes in Accounting Principle

The state has implemented Governmental Accounting Standards Board's Statement 51, Accounting and Financial Reporting for Intangible Assets. The statement establishes accounting and financial reporting requirements for

intangible assets to reduce inconsistencies that have occurred in practice, thereby enhancing the comparability of such assets among state and local governments. Retroactive reporting is required for intangible assets acquired in fiscal years ending after June 30, 1980, except for those considered to have indefinite useful lives and those that would be considered internally generated. As of June 30, 2010, the state did not have any intangible assets that required retroactive reporting.

In addition, the state has also implemented Governmental Accounting Standards Board's Statement 53, Accounting and Financial Reporting for Derivative Instruments. The statement requires that the fair value of derivative instruments be reported in the financial statements of the state and local governments. The statement further requires that derivatives be categorized as either a hedging derivative or an investment derivative. All of the State's derivative exposures at June 30, 2010, are categorized as investment derivatives and therefore the hedge accounting provisions of the GASB Statement No. 53 are not applicable. Changes in fair values of investment derivative instruments have been reported within the investment revenue classification of the State's financial statements.

Reclassification

The state reclassified the Community Development Fund, previously reported as a nonmajor special revenue fund, to the General Fund. As a result, fund balance of \$10.176 million was reclassified to the General Fund.

NOTE 5 – Detailed notes on all funds

A. Deposits and investments

Primary Government

The State's cash includes deposits in demand accounts, petty cash and monies in cash management pools. State statutes provide that funds in the state treasury be invested by the State Treasurer. The State Pooled Investment Fund (SPIF) is established by *Tennessee Code Annotated*, Section 9-4-603 "for the purpose of receiving and investing any money in the custody of any officer or officers of the state unless prohibited by statute to be invested." Participants in the SPIF include the general fund of the State and any department or agency of the State which is required by court order, contract, state or federal law or federal regulation to receive interest on invested funds and which are authorized by the State Treasurer to participate in the SPIF. In addition, funds in the State of Tennessee Local Government Investment Pool (LGIP) investment trust fund are consolidated with the SPIF for investment purposes only. The primary oversight responsibility for the investment and operations of the SPIF rests with the Funding Board of the State of Tennessee (Funding Board).

The State Pooled Investment Fund is authorized by statute to invest funds in accordance with policy guidelines approved by the Funding Board. The current resolution of the Funding Board gives the Treasurer approval to invest in collateralized certificates of deposit in authorized state depositories, prime commercial paper, prime bankers' acceptances, bonds, notes, and treasury bills of the United States or other obligations guaranteed as to principal and interest by the United States or any of its agencies, repurchase agreements for obligations of the United States or its agencies, and securities lending agreements whereby securities may be loaned for a fee. Investments in derivative type securities and investments of high risk are prohibited.

In addition to the funds in the State Pooled Investment Fund, the Tennessee Consolidated Retirement System (TCRS), a pension trust fund; the Baccalaureate Education System Trust (BEST), a private-purpose trust; the Lottery for Education Fund, a part of the Education Fund, a special revenue fund; and the Chairs of Excellence (COE) Trust, a permanent fund; are authorized by statutes to invest in long-term investments, including bonds, debentures, preferred stock and common stock, real estate and other good and solvent securities subject to the approval of the applicable boards of trustees.

As of June 30, 2010, the State's investments for all funds were as follows (expressed in thousands):

PENSION TRUST, POOLED INVESTMENT, AND OTHER FUNDS INVESTMENTS

			United States ¹

^{1.} Includes obligations of the U.S. government or obligations explicitly guaranteed by the U.S. government and are not considered to have credit risk.

^{2.} A1 is the highest rating category for commercial paper.

^{3.} Includes securities that are implicitly guaranteed by the U.S. government but are not rated by Standard and Poor's or Moody's.

This Page Intentionally Left Blank

1. Credit Risk

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. Credit quality ratings for the State's investments in debt securities as of June 30, 2010, are included in the previous schedule. Securities are rated using Standard and Poor's and/or Moody's and are presented above using the Standard and Poor's rating scale. State statutes provide a process for financial institutions desiring to act as state depositories to be approved by the State Treasurer. Statutes also provide for the Commissioner of Financial Institutions to advise, on a timely basis, the Treasurer and the Commissioner of Finance and Administration of the condition of each state bank and state chartered savings and loan association, including his recommendations regarding its condition and safety as a state depository. Similar provisions apply to federally chartered banks and savings and loan associations designated as state depositories. This process ensures that institutions whose financial status is uncertain are monitored for collateral sufficiency. All certificates of deposit are required by policy to be placed directly with state depositories. All repurchase agreements are done with primary dealers in government securities which have executed a master repurchase agreement with the State. The SPIF's investment policy requires an AAA credit quality rating for the purchase of obligations of instrumentalities that are not fully guaranteed by the United States government. Prime banker's acceptances must be issued by domestic banks with a minimum AA long-term debt rating or foreign banks with an AAA long-term debt rating by a majority of the rating services that have rated the issuer. The short-term debt rating must be at least A1 or the equivalent by all of the rating services that rate the issuer. Commercial paper should be rated in the highest tier by all rating agencies that rate the paper. Commercial paper on a credit rating agency's negative credit watch list cannot be purchased under the SPIF's investment policy. The policy requires that a credit analysis report on the corporation be prepared prior to acquisition of the commercial paper.

The SPIF is not registered with the Securities and Exchange Commission (SEC) as an investment company but, through its investment policy adopted by the Funding Board, operates in a manner consistent with the SEC's Rule 2a7 of the *Investment Company Act of 1940*. Rule 2a7 allows SEC registered mutual funds to use amortized cost to report net assets in computing share prices. Likewise, the SPIF uses amortized cost accounting measures to report investments and share prices. During the fiscal year ended June 30, 2010, the State had not obtained or provided any legally binding guarantees to support the value of participant shares. The State of Tennessee has not obtained a credit quality rating for the SPIF from a nationally recognized credit ratings agency.

The TCRS' investment policy specifies that bond issues subject for purchase are investment grade bonds rated in the four highest ratings by one of the recognized rating agencies. In addition, the policy states that private placements that do not have an active secondary market shall be thoroughly researched from a credit standpoint and shall be viewed by TCRS' investment staff as having the credit quality rating equivalent of an AA rating on a publicly traded issue. For short-term investments, the TCRS' investment policy provides for the purchase of only the highest quality debt issues. Commercial paper should be rated in the highest tier by all rating agencies which rate the paper, with a minimum of two ratings required. Commercial paper cannot be purchased if a rating agency has the commercial paper on a negative credit watch. The investment policy also requires preparation of a credit analysis report on the corporation prior to purchasing commercial paper.

The COE Trust's investment policy states that the majority of investments should be placed in high quality debt securities to produce adequate income with minimal risk. In addition, for short-term investments, the investment policy states that only the highest quality short-term debt issues should be purchased.

The BEST investment policy states that the trust may acquire securities which are rated within the four highest grades at the time of acquisition by any of the recognized rating agencies. In addition, the policy requires that only the highest quality short-term debt issues, including commercial paper with ratings of A1 or P1, may be purchased. The policy further states that index funds may be utilized as an alternative to selecting individual securities.

The Lottery for Education Fund investment policy states that the fund may acquire securities which are rated within the four highest grades at the time of acquisition by any of the recognized rating agencies. Commercial

paper should be rated in the highest tier by all rating agencies which rate the paper, with a minimum of two ratings required.

2. Concentration of Credit Risk

A concentration of investments in any one single issuer of debt securities presents a greater risk for loss in the event the issuer fails on its obligations. An objective stated in the SPIF's investment policy is that the investment portfolio will be diversified to avoid incurring unreasonable and avoidable risks regarding specific security types or individual financial institutions. Acquisitions are monitored by policy to assure that no more than twenty percent (20%) of the book value of the pool, at the date of acquisition, is invested in a single United States government agency security and that such acquisition does not cause the SPIF's aggregate United States government agency holdings to exceed fifty percent (50%) of the total book value of the pool on such date.

In addition, the SPIF's investment policy limits the book value of prime banker's acceptances to five percent (5%) of the total book value of the pool and limits such investments in any one commercial bank to the lesser of five percent (5%) of the portfolio's book value or \$25 million. Prime commercial paper investments are limited to five percent (5%) of the total portfolio book value invested in any one single issuing corporation and the total holdings of an issuer's paper should not represent more than five percent (5%) of the issuing corporation's total outstanding commercial paper, with the maximum amount of a specific corporation's commercial paper limited to \$100 million, not including commercial paper maturing the next business day. Prime commercial paper shall not exceed forty percent (40%) of the total pool's book value. The TCRS' investment policy limits the maximum amount of a specific corporation's commercial paper that can be purchased to \$100 million. There are no other specific investment policies that limit the investments of the TCRS, the COE Trust, BEST, Lottery for Education Fund, or other State funds in any one issuer.

As of June 30, 2010, the combined SPIF, TCRS, COE Trust, BEST, Lottery for Education Fund, and other State funds held debt investments in certain organizations representing five percent (5%) or more of total investments, excluding those organizations whose issues are explicitly guaranteed by the United States government, and investments in mutual funds, external investment pools, and other pooled investments (expressed in thousands):

Issuer Organization	 Fair Value	Percentage
Federal National Mortgage Association	\$ 2,959,939	8.73

3. Interest Rate Risk

Interest rate risk is the risk that future changes in prevailing market rates of interest will have an adverse effect on the fair value of debt investments. The fair values of securities with long terms to maturity may be highly sensitive to interest rate changes. The SPIF's investment policy with respect to maturity states that the dollar weighted average maturity of the pool shall not exceed ninety (90) days and that no investment may be purchased with a remaining maturity of greater than three hundred ninety-seven (397) calendar days. In addition, it is the intent of the Funding Board that the market value of the SPIF not deviate more than 0.5 percent from amortized cost. If it does, actions may include, but not be limited to, selling securities whose market value substantially deviates from amortized cost, and investing in securities with ninety (90) days or less to maturity. Agency variable rate notes are permitted by investment policy provided they are indexed to treasury bill, commercial paper, federal funds, LIBOR or the prime rates. It is the intent of the Funding Board that variable rate notes must move in the same direction as general money market rates. Prime banker's acceptances must have an original maturity of not more than two hundred seventy (270) days to be eligible for purchase, with the intent to hold to maturity. Prime commercial paper shall not have a maturity that exceeds one hundred eighty (180) days, and individual repurchase agreement transactions shall not have a maturity that exceeds ninety (90) days. The days to maturity on certificates of deposit ranged from 7 to 275 days at June 30, 2010. Interest rates on certificates of deposit held at June 30, 2010, ranged from .30% to .50%. The days to maturity on U.S. Government Agencies ranged from 7 to 397 days at June 30, 2010. Interest rates on U.S.

Government Agencies held at June 30, 2010, ranged from 0% to 1.75%. The days to maturity on commercial paper ranged from 1 to 43 days at June 30, 2010. Interest rates on commercial paper held at June 30, 2010, ranged from .01% to .33%.

As of June 30, 2010, the combined SPIF portfolio and other state cash deposits and investments had the following weighted average maturities (expressed in thousands):

STATE POOLED INVESTMENT FUND WEIGHTED AVERAGE MATURITY

	Fair	Weighted Average
Deposit/Investment Type	 Value	Maturity (Months)
U.S. Government Agencies/Treasuries	\$ 3,899,062	4.27
Commercial paper	1,025,638	0.17

The TCRS' investment policy does not specifically address limits on investment maturities. The fixed income portfolio, however, is benchmarked against the Citigroup Broad Investment Grade Index and tends to have a duration within a range around that index.

TENNESSEE CONSOLIDATED RETIREMENT SYSTEM DEBT INVESTMENTS (expressed in thousands)

Investment Type	as c	Fair Value of June 30, 2010	Effective Duration (Years)			
Debt Investments

The investment policy for the COE Trust states that the maturity of its debt securities may range from short-term instruments, including investments in the State Pooled Investment Fund, to long-term bonds, with consideration of liquidity needs. However, the policy does not specifically address limits on investment maturities. The fixed income portfolio is benchmarked against the Barclays Aggregate Index and tends to have a duration within a range around that index.

CHAIRS OF EXCELLENCE DEBT INVESTMENTS (expressed in thousands)

Investment Type		Fair Value June 30, 2010	Effective Duration (Years)

Corporate Bonds		128,130	5.17
Total Debt Investments	\$	358,666	

The investment policy for BEST states that bonds generally will be purchased and held to maturity, but when necessary, the portfolio will be actively managed in times of volatile interest rate swings to shorten the average maturity and protect principal value. The effective duration for the SSgA Aggregate Bond Index Fund that BEST utilizes was 4.56 years at June 30, 2010.

<u>Asset-Backed Securities</u>-The TCRS invests in collateralized mortgage obligations which are mortgage-backed securities that are based on cash flows from interest and principal payments on underlying mortgages. Therefore, they are sensitive to prepayments by mortgagees, which may result from a decline in interest rates.

4. Foreign Currency Risk

Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of an investment or deposit. The TCRS' investment policy limits the asset allocation for international investments to twenty-five percent of total assets. The TCRS' exposure to foreign currency risk at June 30, 2010, was as follows (expressed in thousands):

Currency		Total Fair Value		Fixed Income		Equity	_	Cash
Australian Dollar	\$	211,803	\$	13,958	\$	195,247	\$	2,598

Total	\$	4,636,514	\$	1,108,361	\$	3,494,979	\$	33,174

5. Derivatives

The international securities in the TCRS' portfolio expose the TCRS to potential losses due to a possible rise in the value of the US dollar. The TCRS investment managers can reduce foreign currency exposure by selling foreign currency forward contracts, at agreed terms and for future settlement, usually within a year. The manager will reverse the contract by buying the foreign currency before the settlement date. A gain (loss) on this transaction pair will hedge a loss (gain) on the currency movement of the international security. The TCRS can sell up to 80% of its foreign currency exposure into US dollars. Any unrealized gain on foreign currency forward contracts has been reflected in the financial statements as an investment. The notional amount of the foreign currency forward contracts has been reflected in the financial statements as a receivable and a payable. Any unrealized loss on foreign currency forward contracts has been included in the payable established for the contracts.

The TCRS may buy or sell equity index futures contracts for the purposes of making asset allocation changes in an efficient and cost effective manner and to improve liquidity. Gains (losses) on equity index futures hedge losses (gains) produced by any deviation from the TCRS' target equity allocation. The gains and losses resulting from daily fluctuations in the fair value of the outstanding futures contract are settled daily, on the following day, and a receivable or payable is established for any unsettled gain or loss as of the financial statement date. As of June 30, 2010, the TCRS was under contract for fixed income and equity index futures and the resulting payable is reflected in the financial statements at fair value.

The TCRS is authorized to invest in To Be Announced (TBA) mortgage backed securities similar to the foreign currency forward contracts. The TCRS enters into an agreement to purchase pools of mortgage backed

securities prior to the actual security being identified. The TCRS will roll this agreement prior to settlement date to avoid taking delivery of the security. Any unrealized gain on TBA mortgage backed securities has been reflected in the financial statements as an investment. Any unrealized loss on TBA mortgage backed securities has been included in the payable established for mortgages. The notional amounts of these agreements have been included in the financial statements as a receivable and a payable. The TCRS invests in the derivatives to adjust its exposure to mortgage coupon risk and to replicate the return on mortgage backed securities portfolios without actually purchasing the security.

The TCRS is authorized to enter into option contracts and any income earned on option contracts has been included as investment income on the statements. The TCRS did have option contract activity during the year ending June 30, 2010; however, there were no option contracts outstanding at June 30, 2010.

The fair value balances and notional amounts of derivative instruments outstanding at June 30, 2010, classified by type, and the changes in fair values of such derivative instruments for the year ended as reported in the financial statements are as follows (expressed in thousands):

	Changes in	Fai	r Value	Fair Value at J	une	2010

Component Units

The various component units are generally governed by the same State statutes as the State's policies described above.

1. University of Tennessee

The University is authorized by statute to invest funds in accordance with the University investment policies. Funds, other than endowment, annuity, and life income funds, invest similarly to the State policies. Endowment, annuity, and life income funds can be invested in equity securities and various other securities given prudent diversification.

Credit Risk

The University has no investment policy limiting its investment choice based on ratings issued by nationally recognized statistical rating agencies. The University's securities are rated by Moody's. As of June 30, 2010, the University's investments were rated as follows (expressed in thousands):

			Credit Quality Rating										
Rated Debt		Fair	US Treasury/										
Instruments		Value	Agency		Aaa		Aa1		Aa2		Aa3		A1

Total	\$	5,459 \$	3,222	\$	2,533	\$	5,244	\$	1,018	\$	118	\$	892

Interest Rate Risk

The University does not have a formal policy that addresses interest rate risk. As of June 30, 2010, the University had the following debt investments and maturities (expressed in thousands):

				Investment Maturities (in years)										
Investment Type	Investment Type		Fair Value			1 to 5	_	_	More Than 10					
Investments														
U.S. Treasuries	\$	2,993	\$	592	\$	912	\$	625	\$	864				
U.S. Agencies		7,139		78		1,751		3,378		1,932				
Corporate Bonds		20,455		2,647		8,973		8,835						
Municipal Bonds		3,664				1,214		711		1,739				
Mortgages and Notes		299				299								
Bond Mutual Funds	_	32,350	_		_			27,203		5,147				
	\$	66,900	\$	3,317	\$	13,149	\$	40,752	\$	9,682				

University foundations' investments in the amount of \$109.296 million are not included in these disclosures because the foundations utilize private-sector accounting standards.

Alternative Investments

In its Consolidated Investment Pool, as part of its endowment assets, the University has investments in eighty-one limited partnerships, limited companies, corporations, and limited liability corporations. At June 30, 2010, the estimated fair value of these assets is \$301.3 million and total capital contributions, less returns of capital, equal \$332.3 million. These investments are not readily marketable, therefore, the estimated fair value is subject to uncertainty and may differ from the value that would have been used had a ready market existed; such differences could be material. The university's investment policy permits investment in various asset classes, such as these alternative investments, to ensure portfolio diversity. The fair values were estimated by the general partner of each limited partnership or manager of each corporate entity using various valuation techniques.

2. Tennessee Board of Regents System

Credit Risk

The System is authorized by statute to invest funds in accordance with the Tennessee Board of Regents' investment policies. Funds, other than endowment, invest similarly to the State policies. Endowment funds can be invested in equity securities and various other securities given prudent diversification. The System has no formal investment policy that limits its investment choices based on ratings issued by rating agencies. As of June 30, 2010, debt investments of the System and its foundations (that utilize governmental accounting standards) were rated by Standard and Poor's as follows (expressed in thousands):

				Credit Quality Rating								
			U.S.									
Rated Debt		Fair	Treasury/									
Instruments	_	Value	Agency	AAA	AA	A	BBB	BB		CCC	Not Rated	
U.S. Treasuries	\$	43,497 \$	43,497

Interest Rate Risk

The System does not have a formal investment policy that limits investment maturities as a means of managing its exposure to interest rate risk. As of June 30, 2010, debt investments and maturities of the system and its foundations (that utilize governmental accounting standards) follow (expressed in thousands):

	Investment Maturities (in years)											
		Fair		Less						More Than		
Investment Type	_	Value	_	Than 1	_	1 to 5	_	6 to 10	_	10		
U.S. Treasuries	\$	43,497	\$	21,269	\$	21,019	\$	1,182	\$	27		
U.S. Agencies		77,785		1,645		68,857		5,124		2,159		
Corporate Bonds		19,558		539		12,768		6,227		24

Total Debt Investments	\$	162,506	\$	23,813	\$	108,491	\$	18,823	\$	11,379		

The investments of certain foundations of the System are not included in these disclosures because these foundations utilize private-sector accounting standards. These foundations reported investments at fair value in the amount of \$184.249 million.

3. Tennessee Housing Development Agency (THDA)

The Agency is authorized to establish policies for its funds to meet the requirements of bond resolutions and State statute. Funds are invested similarly to State policies.

The Agency's investment policy states that its portfolios will be diversified in order to reduce the risk of loss resulting from over concentration of assets in a specific maturity, a specific issuer, or a specific class of securities. The Agency may invest one hundred percent of its portfolio in U.S. government securities due to the absence of credit risk. A minimum of five percent of the par value of total investments must mature within five years. No more than fifty percent of the par value of the combined portfolios can be invested in maturities greater than 15 years without approval of the Bond Finance Committee.

Credit Risk

The Agency's investments as of June 30, 2010, were rated by Standard and Poor's as follows (expressed in thousands):

						Credit Quality Rating							
D . 1D 1.				U.S.								37.	
Rated Debt		Fair		Treasury/								Not

Depreciation expense was charged to functions/programs of the primary government as follows (expressed in thousands):

Governmental activities:

General Government	\$ 3,265
Education	1,269
Health and Social Services	8,650
Law, Justice and Public Safety	26,758
Recreation and Resource Development	11,047
Regulation of Business and Professions	610
Transportation	17,630

Capital assets held by the government's internal service funds are charged to the various functions based on their usage of the assets

Total depreciation expense – governmental activities

\$\frac{43,499}{112,728}\$

<u>Highway Construction Commitments</u> — At June 30, 2010, the Department of Transportation had contractual commitments of approximately \$863.5 million for construction of various highway projects. Funding of these future expenditures is expected to be provided from federal grants (\$731.7 million) and general obligation bond proceeds (\$131.8 million).

Discretely Presented Component Units

Capital asset activity for the year ended June 30, 2010, for the discretely presented component units was as follows (expressed in thousands):

		Beginning			Ending
	_	Balance	Increases	Decreases	Balance
Capital assets, not being depreciated:					
Land	\$	159,847 \$	6,457	(9,121) \$	157,183

D. Interfund balances

1. Interfund balances at June 30, 2010, consisted of the following (expressed in thousands):

DUE FROM

		_	General	 Education	. <u>-</u>	Highway	. <u>-</u>	Employment Security	-	Nonmajor Governmental Funds	_	Nonmajor Enterprise Funds	 Internal Service Funds	 Total
D	General			\$ 234,518			\$	16,049	\$	59	\$	53		\$ 250,679
U	Education	\$	105											105
\mathbf{E}	Employment													
	Security		336											336
T	Nonmajor													
O	Governmental Fund	S						1						1
	Internal Service													
	Funds		3,277							20				3,297
	Fiduciary Funds	_	7,180	 279	\$_	811			_	234	_	2	\$ 203	 8,709
	Total	\$ =	10,898	\$ 234,797	\$	811	\$	16,050	\$	313	\$	55	\$ 203	\$ 263,127

Of the \$234.518 million due to the General Fund from the Education Fund, \$234.486 million resulted from a time lag between the dates the payments to local education agencies occurred and taxes are received in the Education Fund. The \$16.049 million due to the General Fund from Employment Security resulted from a time lag between the dates the funds are drawn and received from the Federal government. The amounts due to Fiduciary Funds resulted from a time lag in payment of payroll tax liabilities. The Office for Information Resources, an internal service fund, made loans of \$3.277 million to various general fund agencies for computer systems development. Of this amount, \$1.35 million is considered long term and not expected to be repaid within one year.

2. COMPONENT UNITS PAYABLES

Component Units accounts payable to the Primary Government at June 30, 2010, consisted of the following (expressed in thousands):

PAYABLE FROM COMPONENT UNITS

E. Transfers

Transfers between the various primary government funds for fiscal year ended June 30, 2010, are as follows (expressed in thousands):

Transfers In

Transfers Out	General	Е	ducation	Highway	Nonmajor vernmental Funds	ewer atment	En	onmajor terprise Funds	;	Internal Service Funds	I	Private Purpose ust Funds	Total
General Education		\$	997,600		\$ 78,728 402	\$ 471	\$	3,537	\$	32,091	\$	19,747	\$ 1,132,174 402
Highway	\$ 1,336												1,336
Nonmajor													
Governmental	100 150			Ф 100 600	27.707					1.40			245,695
Funds	109,150			\$ 108,600	27,786					149			245,685
Nonmajor Enterprise													
Funds	400												400
Internal Service													
Funds	8,677		168										8,845
Totals	\$ 119,563	\$	997,768	\$ 108,600	\$ 106,916	\$ 471	\$	3,537	\$	32,240	\$	19,747	\$ 1,388,842

Transfers are generally used to (1) move revenues from the fund that statute or budget requires to collect them to the fund that statute or budget requires to expend them, (2) move receipts restricted to debt service from the funds collecting the receipts to the debt service fund as debt service payments become due and (3) use unrestricted resources from the general fund to finance various programs accounted for in other funds in accordance with statute or budgetary authorizations.

In the fiscal year ended June 30, 2010, the general fund transferred \$1.132 billion to other funds in accordance with statute or budgetary authorizations for the following purposes: \$997.6 million to subsidize the activities of the education fund, \$70.4 million for capital outlay expenditures, \$56.5 million to provide appropriations to finance various programs in other funds, \$4.1 million for payments for interfund services used, and \$3.4 million to provide for debt service payments.

The highway fund received a transfer from the debt service fund for \$108.6 million to cancel authorized and unissued highway bonds. These authorizations were originally recorded in the highway fund to fund a portion of their budget.

F. Lease obligations

Operating Lease Obligations — The State has entered into various operating leases for land, buildings and equipment. Most leases contain termination clauses providing for cancellation after 30, 60 or 90 days' written notice to lessors. In addition, most leases contain appropriation clauses indicating that continuation of the lease is subject to funding by the legislature. It is expected that in the normal course of business most of these leases will be replaced by similar leases. The State has also entered into various operating leases, which have non-cancelable lease terms. Below is a schedule of future minimum lease payments under these leases (expressed in thousands).

For the Year(s) Ended June 30	 Noncancelable Operating Leases
2011	 22.017
2011	\$ 23,817
2012	18,658
2013	14,607
2014	9,101
2015	6,005
2016-2020	16,172
2021-2022	5,675
Total Minimum Payments Required	\$ 94,035

Expenditures for rent under leases for the years ended June 30, 2010 and 2009, amounted to \$59.5 million and \$61.8 million, respectively.

<u>Capital Lease Obligations</u> – The State leases office buildings and equipment that in substance are purchases and are reported as capital lease obligations. These leases are recorded as assets and liabilities at either the lower of fair value or the present value of the future minimum lease payments in the government-wide and proprietary fund statements. For capital leases reported in governmental funds, both the principal and interest portions of capital lease payments are recorded as expenditures of the applicable governmental function. The office building leases expire over the next 17 years. The effective interest rates for these leases range from 4.48% to 5%. Most of these leases contain at least one of the following options: (a) the state can, during the term of the lease or any period of extension or holdover, purchase the property or (b) the state can, at the end of the initial lease term, renew its lease or (c) terminate the lease for convenience at any time after the fifth year. The following is an analysis of the leased property under capital leases (expressed in thousands).

		Governmental Activities
Assets:		
Land	\$	350
Buildings	\$ 31,110	
Less: Accumulated		
Depreciation	(2,086)	29,024
	\$	29,374

At June 30, 2010, minimum annual lease payments are as follows (expressed in thousands):

For the Year(s)		Governmental Activities Lease
Ended June 30	_	Obligation Payable

Less - Executory Costs	_	(128)
Present value of net minimum	_	
lease payments	\$_	16,300

G. Lease receivables

<u>Capital Lease Receivable</u> — The State, as lessor, entered into a lease agreement with the Nashville/Davidson County Metropolitan Government (lessee) for the Farmers' Market Facility. The lease term is 20 years with an option to renew the lease for an unlimited period of time. The agreement was signed in June 1995; an initial cash payment was made and the first of 19 payments began in fiscal year 1997. The State is subsidizing a part of the cost of this building.

The State, as lessor, entered into a lease agreement with the Nashville/Davidson County Metropolitan Government (lessee) for the Post-Mortem Facility. The lease term is 20 years beginning July 15, 2001, with an option to renew the lease for an unlimited period of time for a nominal amount. The State is subsidizing a part of the cost of this building. Minimum future lease payments to be received as of June 30, 2010 (expressed in thousands):

Year Ended June 30	Total
2011	\$ 459
2012	458
2013	461
2014	458
2015	460
2016-2021	1,208
Total minimum future lease payments	\$ 3,504
Net investment in direct financing leases at June 30:	
Minimum lease payments receivable	\$ 3,504
Plus: deferred charges	372
Net investment in direct financing lease	\$ 3,876

H. Long term debt

1. General Obligation Bonds – Bonds Payable at June 30, 2010, are shown below (expressed in thousands):

	Amount
Governmental Activities:	_
General obligation bonds, 1.865% to 6.5%, due in generally decreasing amounts of principal	
and interest from \$120.571 million in 2011 to \$12.385 million in 2030	\$ 1,167,670
General obligation refunding bonds, 1999 Series A, 4.25% to 5%, principal and	
interest due in amounts from \$23.376 million in 2011 to \$5.398 million in 2015	77,401
General obligation refunding bonds, 2004 Series A, 4.91% to 5.1%, principal and interest	
due in amounts from \$1.632 million in 2011 to \$1.629 million in 2012	3,030
General obligation refunding bonds, 2004 Series C, 3.25% to 5.25%, principal and interest due	
in amounts from \$37.563 million in 2011 to \$11.388 million in 2018	208,594
General obligation refunding bonds, 2005 Series A, 3.5% to 5.25%, principal and interest	
due in amounts from \$10.631 million in 2011 to \$7.628 million in 2020	111,026
General obligation refunding bonds, 2009 Series B, 3% to 5%, principal and interest	
due in amounts from \$8.09 million in 2011 to \$7.544 million in 2022	104,183
General obligation refunding bonds, 2009 Series D, 1.865% to 5.589%, principal and interest	
due in amounts from \$2.001 million in 2011 to \$3.889 million in 2029	43,985
	1,715,889
Less: Unamortized bond refunding costs	(27,069)
Total Governmental Activities	\$ 1,688,820

General obligation bonds issued during the year ended June 30, 2010:

December 2009	Bond Series 2009C in the amount of \$235.89 million
	Bond Series 2009D in the amount of \$10.125 million
	Refunding Bond Series 2009D in the amount of \$43.985 million

The December 2009, bond series 2009C, general obligation bond issuance in the amount of \$235.89 million represents tax-exempt bonds maturing serially through 2030 at interest rates ranging from 2.5 percent to 5 percent. The bonds were sold at a premium of \$26.358 million. Proceeds of the bond issue and premium were used to redeem commercial paper and to directly finance other projects.

The December 2009, bond series 2009D, general obligation bond issuance in the amount of \$10.125 million represents taxable bonds maturing serially through 2029 at interest rates ranging from 1.865 percent to 5.589 percent. The bonds were not sold at a premium. Proceeds of the bond issue were used to redeem commercial paper.

In December 2009, the state issued general obligation refunding bonds, series 2009D, in the amount of \$43.985 million to provide for the current refunding of \$42.95 million of general obligation bonds issued in series 2004B. Proceeds from the current refunding were deposited in an irrevocable trust account with an escrow agent to provide for all future debt service payments of the refunded bonds. As a result, the bonds are considered defeased and the liability for those bonds have been removed from the government wide statement of net assets. The refunding bonds were not sold at a premium.

The net carrying amount of the refunded bonds was \$39.26 million. The refunding resulted in a difference between the reacquisition price and the net carrying amount of the old debt of \$4.725 million. This difference, reported in the accompanying financial statements as a reduction from bonds payable, is being charged to

operations through 2029 using the straight line method. The state completed the refunding to eliminate the possibility of higher interest rates due to the variable rate attached to the refunded bonds and to obtain a fixed interest rate going forward. As of the sale date, the refunding will increase the total debt service payments over the next 20 years by \$2.366 million and results in an economic loss (difference between present values of the old and new debt service payments) of \$1.361 million. However, if interest rates rise as expected, the loss may turn into a gain over the life of the new debt.

Prior-Year Defeasance of Debt

In prior years, the state defeased certain general obligation bonds by placing the proceeds of new bonds in an irrevocable trust to provide for all future debt service payments on old bonds. Accordingly, the trust account assets and the liability for the defeased bonds are not included in the state's financial statements. On June 30, 2010, \$139.865 million of bonds outstanding are considered defeased.

2. <u>General Obligation Commercial Paper</u> – Governmental Activities Commercial Paper Payable at June 30, 2010, is shown below (expressed in thousands).

Commercial Paper

241,390

General obligation commercial paper, interest rates ranging from .28% to .4% for tax exempt and .29% to .72% for taxable, varying maturities

The full faith and credit of the State, together with certain tax revenues, are pledged to secure all general obligation bonds and commercial paper listed above.

In March 2000, the State instituted a general obligation commercial paper program to provide interim or short-term financing of various authorized capital projects. Commercial paper may be issued as federally taxable or tax exempt and constitute bond anticipation notes. The commercial paper is sold at par as interest-bearing obligations in minimum denominations of \$100 thousand and integral multiples of one thousand in excess of such amount, with interest payable at maturity. The commercial paper has varying maturities of not more than 270 days from their respective dates of issuance. Interest rates vary depending on the market. The amount of principal outstanding may not exceed \$350 million.

The State has entered into a Standby Commercial Paper Purchase Agreement with the Tennessee Consolidated Retirement System under which TCRS is obligated to purchase newly issued commercial paper issued to pay the principal of other commercial paper. The Program expires and the Standby Purchase Agreement terminates on April 1, 2015. At June 30, 2010, \$241.39 million of commercial paper was outstanding (\$214.463 million tax exempt and \$26.927 million federally taxable). Commercial paper payable under this Program qualifies for reporting as a non-current liability because provisions in the Commercial Paper Resolution permit refinancing the paper on a long-term basis.

3. <u>Debt Service Requirements to Maturity</u> - Debt Service requirements to maturity for all general obligation bonds payable at June 30, 2010, are as follows (expressed in thousands):

For the Year(s)	_	General O	Total		
Ended June 30		Principal	Interest		Requirements
					_
2011	\$	137,093	\$ 66,773	\$	203,866
2012		132,791	61,287		194,078
2013		133,423	55,424		188,847
2014		127,193	49,610		176,803
2015		119,093	43,703		162,796
2016-2020		496,649	152,040		648,689
2021-2025		355,002	70,761		425,763
2026-2030		214,645	10,210		224,855
	\$	1,715,889	\$ 509,808	\$	2,225,697

The above principal for bonds does not reflect a \$27.069 million deduction from bonds payable for the deferred amount on refunding.

4. General Obligation Bonds Authorized and Unissued - A summary of general obligation bonds authorized and unissued at June 30, 2010, is shown below (expressed in thousands). It is anticipated that a significant amount of these bonds will not be issued but will be canceled because of sufficient fund balances.

Purpose	_	Unissued July 1, 2009	Authorized	Canceled	Unissued June 30, 2010
Highway Higher Education Environment and Conservation	\$	942,500 \$ 55,892	164,500 \$	108,600 \$ 9,548	998,400 46,344 77

Governmental activities include all governmental funds and internal service funds. Typically, agencies accounted for in the General Fund and Special Revenue Funds liquidate compensated absences and OPEB liabilities. Claims and judgments are obligations of Highway Fund (special revenue fund), Risk Management (internal service fund) and the General Fund.

I. Payables

Payables as of June 30, 2010, were as follows (expressed in thousands):

Change in Net Assets
Net Assets – July 1
Net Assets – June 30

Significant transactions between the major component units—Tennessee Board of Regents (TBR), University of Tennessee (UT) and the Tennessee Education Lottery Corporation (TELC)—and the primary government consist of the following:

State appropriations from the Education Fund in the amount of \$769.6 million were made to the TBR and \$517.2 million to the UT.

Capital project expenditures in the amount of \$131 million were made for the TBR and \$90 million to the UT in the form of expenditures in the capital projects fund for projects at these school systems.

The TBR paid the primary government \$42 million to reimburse the state for projects that were not a part of the capital appropriations.

The TELC generated net lottery proceeds of \$276 million for the State's Lottery for Education Account.

The most significant transaction among component units is that in which the Tennessee State School Bond Authority, a nonmajor component unit, makes loans to the University of Tennessee and the Tennessee Board of Regents to finance certain capital projects. At June 30, 2010, the Authority's loan receivable (expressed in thousands) consisted of:

	Current	Noncurrent
Tennessee Board of Regents	\$ 16,551 \$	510,022
University of Tennessee	17,077	528,079
Total	\$ 33,628 \$	1,038,101

K. Major component units – long term debt

Tennessee Housing Development Agency (THDA)

Bonds Payable and Notes Payable at June 30, 2010, are shown below (expressed in thousands):

Mortgage finance program revenue bonds, homeownership program, and housing program finance bonds, various Series, .6% to 7.93%, due in amounts of principal and interest ranging from \$362.922 million in 2011 to \$305.1 million in 2041

\$ 2,322,679

Less: Unamortized bond refunding costs Net Bonds Payable

\$ 2,316,748

Preserve Loan Program Note, 3% interest with principal maturing in December 2011 and August 2012

\$ 3,672

The revenue bonds and notes listed above are not obligations of the State. They are secured by pledge from the facilities to which they relate and by certain other revenues, fees and assets of the THDA.

Bond sales during the year ended June 30, 2010, included the following issues:

June 2010—Program bonds of \$74.71 million

On June 17, 2010, the agency issued \$74.71 million in Housing Finance Program Bonds, Issue 2010-A. The agency used \$20.595 million of these bonds to refund bonds.

Current Refundings

During the year ended June 30, 2010, bonds were retired at par before maturity in the Mortgage Finance Program in the amount of \$10.695 million and in the Homeownership Program in the amount of \$168.625 million. The respective carrying values of the bonds were \$10.652 million and \$170.94 million. This resulted in an expense to the Mortgage Finance Program of \$43 thousand and in income to the Homeownership Program of \$2.315 million.

On June 17, 2010, the agency used \$20.595 million in Housing Program bonds, 2010-A, to refund bonds previously issued in the Homeownership Program (this amount consists of \$20.595 million early redemption.) The carrying amount of these bonds was \$20.479 million. The refunding resulted in a difference of \$116 thousand between the reacquisition price and the net carrying amount of the old debt. The refunding reduced the agency's debt service by \$5.9 million over the next 15 years, and the agency realized an economic gain (difference between present values of old and new debt service payments) of \$2.8 million.

Debt Service requirements to maturity for revenue bonds payable at June 30, 2010, are as follows (expressed in thousands):

Reven	ue	_	Total

The debt principal in the preceding table is \$5.931 million more than that presented in the accompanying financial statements. This amount, which is a deduction from bonds payable for the deferred amount on refundings, is not reflected in the above presentation.

Notes Program

The Single Family Mortgage Notes Trust Indenture, dated December 1, 1997 (the "Trust Indenture"), provides for the issuance of agency drawdown notes with a maximum aggregate principal amount of \$65 million. On April 1, 1999, the Trust Indenture was supplemented providing for the maximum aggregate principal amount of \$200 million. On December 1, 2002, the Trust Indenture was supplemented to provide a maximum aggregate principal amount of \$450 million.

The notes bear interest, payable on the second Thursday of each succeeding month with respect to the principal amount drawn down by the agency. The interest rate is equal to ninety-nine percent (99%) of the bond equivalent yield as determined on the related rate date.

In October 2008, the Internal Revenue Service issued Notice 2008-88, amending Notice 2008-41. With an effective date of March 28, 2008, this notice provides temporary relief to issuers by allowing them to purchase their own bonds and commercial paper without causing an extinguishment of the debt for tax purposes. Therefore, on October 9, 2008, due to unstable credit markets, the agency purchased at par \$83.05 million of its Single Family Mortgage Notes Trust Indenture from Morgan Keegan. The agency is allowed to hold the outstanding notes through December 31, 2009, after which the notes will be available to reissue. However, in accordance with Financial Accounting Standards Board Statement No. 76, Paragraph 3, the outstanding notes are not recorded for financial reporting purposes.

Due to continuing unstable credit markets, on December 31, 2009, the Internal Revenue Service extended the amount of time the agency is allowed to hold its outstanding notes purchased from Morgan Keegan. The agency is allowed to hold the outstanding notes through December 31, 2010, after which the notes will be available to reissue.

On August 3, 2009, the agency borrowed \$500 thousand for the Preserve Loan Program, which is part of the Housing Trust Fund. Principal and interest are charged monthly with the principal maturing on August 4, 2012.

The following table is a summary of the note activity for the year ended June 30, 2010 (expressed in thousands).

Beginning Balance	ginning Balance Additions Reductions					Ending Balance		
\$ 3,250	\$	500	\$	78	\$	3,672		

The \$3.672 million of notes outstanding at year end consist of Preserve Loan Program notes, \$3.25 million will mature on December 22, 2011, and \$500 thousand will mature on August 4, 2012. Interest rates are 3% and are charged quarterly for the \$3.25 million and monthly for the \$500 thousand.

L. Nonmajor component units – long term debt

Tennessee Local Development Authority (TLDA)

Bonds Payable and Notes Payable at June 30, 2010, are shown below (expressed in thousands):

Revenue bonds, 3.3% to 5%, due in generally decreasing amounts of		
principal and interest from \$5.58 million in 2011 to \$26 thousand in 2034	\$	49,482
Less: Unamortized bond refunding costs	_	(1,240)
Net Bonds Payable	\$	48,242
Revenue bond anticipation notes,		
\$53.92 million at 2% due June 24, 2011	\$	53,919

The revenue bonds and revenue bond anticipation notes listed above are not obligations of the State. They are secured by pledge of resources from the facilities to which they relate and by certain other revenues, fees and assets of the TLDA.

Debt Service requirements to maturity for TLDA's revenue bonds payable at June 30, 2010, are as follows (expressed in thousands):

For the Year(s)		Reven	ue I	Bonds	_	Total
Ended June 30	_	Principal		Interest		Requirements
	_		=		=	
2011	\$	3,592	\$	1,988	\$	5,580
2012		3,367		1,865		5,232
2013		3,247		1,740		4,987
2014		3,377		1,602		4,979
2015		3,306		1,459		4,765
2016-2020		12,208		5,337		17,545

2026-2030		9,504		1,764		11,268
2031-2034		2,154	_	128	_	2,282
	\$	49,482	\$	19,507	\$	68,989

The above principal for revenue bonds does not reflect a \$1.24 million deduction from bonds payable for the deferred amount on refunding.

Tennessee State School Bond Authority (TSSBA)

Bonds and Commercial Paper Payable at June 30, 2010, are shown below (expressed in thousands):

Revenue bonds, various Series, 0% to 5.66%, due in decreasing amounts of principal and interest from \$93.592 million in 2011 to \$2.137 million in 2039	\$	1,093,370
Less: Unamortized bond refunding costs Net Bonds Payable	\$	(18,366) 1,075,004
Commercial paper, interest rates ranging from .15% to .55%, varying maturities	\$_	281,782

The revenue bonds and commercial paper listed above are not obligations of the State. They are secured by pledge of resources from the facilities to which they relate and by certain other revenues, fees and assets of the TSSBA.

On December 17, 2009, the authority issued 2009 Qualified School Construction Bonds ("2009 QSCB"). The 2009 QSCB proceeds in the amount of \$177 million were issued for the purposes of financing various qualifying QSCB projects and to pay the costs of issuance of the 2009 QSCBs.

<u>Prior-Year Defeasance of Debt.</u> In prior years, the authority defeased certain revenue bonds by placing the proceeds of new bonds in an irrevocable trust to provide for all future debt service payments on the old bonds. Accordingly, the trust account assets and the liability for the defeased bonds are not included in the authority's financial statements. On June 30, 2010, \$210.01 million of bonds outstanding are considered defeased.

Debt Service requirements to maturity for TSSBA's revenue bonds payable at June 30, 2010, are as follows (expressed in thousands):

For the Year(s) Ended June 30		Principal		Interest		Total Requirements
Elided Julie 30		Типстрат		micresi		Requirements
2011	\$	56,518	\$	37,074	\$	93,592
2012	-	42,578	-	35,488	•	78,066
2013		42,253		33,929		76,182
2014		43,538		32,069		75,607
2015		50,353		30,331		80,684
2016-2020		235,588		125,944		361,532
2021-2025		199,426		79,836		279,262
2026-2030		322,646		38,793		361,439
2031-2035		73,750		14,460		88,210
2036-2039		26,720	_	1,948		28,668
	\$	1,093,370	\$	429,872	\$	1,523,242

The above principal for revenue bonds is more than that presented on the accompanying financial statements by \$18.366 million, representing the deferred amount on bond refunding. This amount is the amount deducted from bonds payable in the accompanying financial statements but is included in the debt service schedule above.

<u>Commercial Paper Program</u>. The Tennessee State School Bond Authority issues short-term debt to finance certain capital projects for the State of Tennessee's higher education institutions. The maximum amount of principal may not exceed \$300 million. At June 30, 2010, \$139.55 million of tax-exempt and \$142.23 million of taxable commercial paper was outstanding.

The maturity of the paper may not exceed 270 days and the maximum interest rate may not exceed 12%. Interest rates vary ranging from .15% to .55% during the fiscal year. Upon maturity, the paper is remarketed by the

commercial paper dealer, redeemed, or extinguished with long-term debt. The Commercial Paper bears interest at a variable rate that is paid upon maturity. The Commercial Paper liquidity provider, under a Credit Agreement, is State Street Bank and Trust Company with a termination date of March 30, 2014, subject to extension and earlier termination. The total available commitment is \$304.594 million. The obligation of State Street Bank and Trust Company is to purchase unremarketed Commercial Paper. Commercial paper payable under this Program qualifies for reporting as a non-current liability because provisions in the Commercial Paper Resolution permit refinancing the paper on a long-term basis.

M. Component units – changes in long-term obligations

A summary of changes in long-term obligations for the year ended June 30, 2010, follows (expressed in thousands).

Changes In Long-Term Obligations

Component Units Long-Term Obligations	\$	4,531,011	\$ 1	,140,042	\$	(447,404) \$	5,223,649 \$	333,520

The Tennessee State School Bond Authority, a nonmajor component unit, issues revenue bonds to make loans to higher education institutions in the State. The nonmajor component units' bonds payable includes the indebtedness on which the University of Tennessee and the Tennessee Board of Regents' loans payable are based.

The University of Tennessee component units are not included in the above schedule. At year end, University of Tennessee foundations' long-term liabilities amounted to \$105.818 million (\$1.645 million due within one year).

N. Endowments – component units

If a donor has not provided specific instructions to the University of Tennessee and the Tennessee Board of Regents institutions, state law permits each institution to authorize for expenditure the net appreciation (realized and unrealized) of the investments of endowment funds. When administering its power to spend net appreciation, the institution is required to consider the institution's long-term and short-term needs, present and anticipated financial requirements, expected total return on its investments, price-level trends, and general economic conditions. Any net appreciation that is spent is required to be spent for the purposes for which the endowment was established.

The University of Tennessee chooses to spend only a portion of the investment income (including changes in the value of investments) each year. Under the spending plan established by the University, 5 percent of a three-year moving average of the fair value of endowment investments has been authorized for expenditure. The remaining amount, if any, is retained to be used in future years when the amount computed using the spending plan exceeds the investment income. At June 30, 2010, net appreciation of \$52.309 million is available to be spent, of which \$51.32 million is restricted to specific purposes.

While some Tennessee Board of Regents institutions/foundations spend all investment income, others choose to spend only a portion of the investment income (including changes in the value of investments) each year. Under the various spending plans established by each institution/foundation, different percentages and/or amounts have been authorized for expenditure. The remaining amounts, if any, are retained to be used in future years when the amounts computed using the spending plans exceed the investment income. At June 30, 2010, net appreciation of \$9.713 million is available to be spent, of which \$9.542 million is restricted to specific purposes.

NOTE 6 – Other information

A. Risk management

1. Teacher Group Insurance - The Teacher Group Insurance Fund, a public entity risk pool, was established in January 1986 to provide a program of health insurance coverage for the teachers and other education system employees of the political subdivisions of the State. In accordance with Tennessee Code Annotated 8-27-302 all local education agencies are eligible to participate. Fund members at June 30, 2010, included 124 local education agencies and two education cooperatives, with 50,550 active teachers and support personnel enrolled in one of three health care options: preferred provider organization plan (PPO), point of service plan (POS), or a health maintenance organization (HMO). The State does not retain any risk for losses by this fund.

The Teacher Group Insurance Fund assumes responsibility for: determining plan benefits and eligibility, establishing premiums sufficient to fund plan obligations, recording and reporting financial transactions accurately, reporting enrollment to vendors, processing of claims submitted for services provided to plan participants, communicating with plan participants, and complying with appropriate state and federal laws and regulations. Plan participants are required to: pay premiums on time, file claims for services received, report changes in eligibility of themselves or their dependents, and ensure that only eligible expenses are paid by the plan. Individuals who cancel coverage may be required to demonstrate a qualifying event to rejoin the plan. Employers must wait twenty-four months before rejoining the plan should the employer elect to withdraw from the plan. In the case of individuals or groups rejoining the plan, a preexisting condition exclusion currently applies.

The Teacher Group Insurance Fund establishes claims liabilities for self-insured options based on estimates of the ultimate cost of claims that have been reported but not settled, and of claims that have been incurred but not reported. Teachers and providers have 13 months to file medical claims. The process used to compute claims liabilities does not necessarily result in an exact amount. Claims liabilities are recomputed periodically using actuarial and statistical techniques to produce current estimates. Adjustments to claims liabilities are charged or credited to expense in the period in which they are made. The Teacher Group Insurance Fund considers investment income in determining if a premium deficiency exists.

The Teacher Group Insurance Fund issues separate financial statements that may be obtained by writing the Department of Finance and Administration, Division of Accounts, 312 Rosa L. Parks Avenue, 14th Floor William R. Snodgrass Tennessee Tower, Nashville, TN 37243-0298 or by calling (615) 532-5823.

As discussed above, the Teacher Group Insurance Fund establishes a liability for both reported and unreported insured events, which includes estimates of both future payments of losses and related claim adjustment expenses. The following represents changes in those aggregate liabilities during the past two years (expressed in thousands):

	2010	2009
Unpaid Claims at Beginning of Year	\$ 28,257 \$	3 27,201
Incurred Claims:		
Provision for insured events of the current year Increase (decrease) in provision for	383,088	387,693
insured events of prior years	(896)	1,755
Total Incurred Claims Expenses	382,192	389,448
Payments:		
Claims attributable to insured events of the current year Claims attributable to insured events	352,408	359,437
of prior years	27,360	28,955
Total Payments	379,768	388,392
Total Unpaid Claims at End of the Year	\$ 30,681 \$	28,257

2. Local Government Group Insurance - The Local Government Group Insurance Fund, a public entity risk pool, was established in July 1991 to provide a program of health insurance coverage for employees of local governments and quasi-governmental organizations that were established for the primary purpose of providing services for or on the behalf of state and local governments. In accordance with Tennessee Code Annotated 8-27-207 all local governments and quasi-governmental organizations described above are eligible to participate. Fund members at June 30, 2010, included 34 counties, 79 municipalities and 247 quasi-governmental organizations, with 12,936 active employees maintaining coverage through one of four options: preferred provider plan, PPO limited plan, point of service plan, or a health maintenance organization. The State does not retain any risk for losses by this fund.

The Local Government Group Insurance Fund assumes responsibility for: determining plan benefits and eligibility, establishing premiums sufficient to fund plan obligations, recording and reporting financial transactions accurately, reporting enrollment to vendors, the processing of claims submitted for services provided to plan participants, communicating with plan participants, and complying with appropriate state and

federal laws and regulations. Plan participants are required to: pay premiums on time, file claims for services received, report changes in eligibility of themselves or their dependents, and ensure that only eligible expenses are paid by the plan. Individuals who cancel coverage may be required to demonstrate a qualifying event to rejoin the plan. Employers must wait twenty-four months before rejoining the plan should the employer elect to withdraw from the plan. In the case of individuals or groups rejoining the plan, a preexisting condition exclusion currently applies.

The Local Government Group Insurance Fund establishes claims liabilities for self-insured options based on estimates of the ultimate cost of claims that have been reported but not settled, and of claims that have been incurred but not reported. Employees and providers have 13 months to file medical claims. The process used to compute claims liabilities does not necessarily result in an exact amount. Claims liabilities are recomputed periodically using actuarial and statistical techniques to produce current estimates. Adjustments to claims liabilities are charged or credited to expense in the period in which they are made. The Local Government Group Insurance Fund considers investment income in determining if a premium deficiency exists.

The Local Government Group Insurance Fund issues separate financial statements that may be obtained by writing the Department of Finance and Administration, Division of Accounts, 312 Rosa L. Parks Avenue, 14th Floor William R. Snodgrass Tennessee Tower, Nashville, TN 37243-0298 or by calling (615) 532-5823.

As discussed above, the Local Government Group Insurance Fund establishes a liability for both reported and unreported insured events, which includes estimates of both future payments of losses and related claim adjustment expenses. The following represents changes in those aggregate liabilities during the past two years (expressed in thousands):

	_	2010	2009
Unpaid Claims at Beginning of Year	\$	7,427 \$	5,832
Incurred Claims:			
Provision for insured events of the current year		105,944	96,377
Increase (decrease) in provision for insured events of prior years	_	(201)	1,192
Total Incurred Claims Expenses	_	105,743	97,569
Payments:			
Claims attributable to insured events of the current year		98,228	88,950
Claims attributable to insured events of prior years		7,226	7,024
Total Payments	_	105,454	95,974
Total Unpaid Claims at End of the Year	\$_	7,716 \$	7,427

3. Risk Management - It is the policy of the State not to purchase commercial insurance for the risks of losses for general liability, automobile liability, professional malpractice and workers' compensation. The State's management believes it is more economical to manage its risks internally and set aside assets for claim settlement in its internal service fund, the Risk Management Fund (RMF). The State purchases commercial insurance for real property, flood, earthquake, and builder's risk losses and surety bond coverage on the State's officials and employees. The RMF is also responsible for claims for damages to state owned property up to the amount of the property insurance aggregate deductible amount. The insurance policy deductibles vary from \$25,000 per occurrence to an aggregate of \$5 million. Settled claims resulting from these risks have not exceeded commercial insurance coverage in any of the past three fiscal years. All agencies and authorities of the State participate in RMF, except for the Dairy Promotion Board and the Certified Cotton Growers' Organization (a component unit). The Tennessee Education Lottery Corporation (a component unit) participates in the RMF for general liability purposes but is responsible for its own workers' compensation coverage. RMF allocates the cost of providing claims servicing and claims payment by charging a premium to each agency based on a percentage of each organization's expected loss costs which include both experience and exposures. This charge considers recent trends in actual claims experience of the State as a whole.

RMF liabilities are reported when it is probable that a loss has occurred and the amount of that loss can be reasonably estimated. Liabilities include an amount for claims that have been incurred but not reported. Because actual claims liabilities depend on such complex factors as inflation, changes in legal doctrines, and damage awards, the process does not result in an exact amount. Claims liabilities are reevaluated annually to take into consideration recently settled claims, the frequency of claims, and other economic and social factors. The estimate of the claims liability also includes amounts for incremental claim adjustment expenses related to specific claims and other claim adjustment expenses regardless of whether allocated to specific claims. Estimated recoveries, such as salvage or subrogation, are another component of the claims liability estimate. At June 30, 2010, the present value of the casualty liability as actuarially determined was \$84.577 million (discounted at 2.5%). Changes in the balances of claims liabilities during fiscal years 2009 and 2010 were as follows (expressed in thousands):

	Beginning	Current Year		Advance of	Balance at
	of Fiscal Year	Claims and	Claim	Insurance	Fiscal
	Liability	Changes in Estimates	Payments	Proceeds	Year-End
2009-2010 \$	93,156	\$ 41,086	\$ (32,612)	\$ 5,000	\$ 106,630
2008-2009 \$	92,877	\$ 30,129	\$ (29,850)		\$ 93,156

At June 30, 2010, RMF held \$114.5 million in cash and cash equivalents designated for payment of these claims.

4. Employee Group Insurance - The Employee Group Insurance Fund, an entity other than a pool, was established in 1979 to provide a program of health insurance coverage for the employees of the State with the risk retained by the State, therefore it is accounted for as an Internal Service Fund. In accordance with Tennessee Code Annotated 8-27-201 all state employees and former employees with work related injuries are eligible to participate. Fund members at June 30, 2010, included 66,233 active employees enrolled in one of three options: preferred provider organization plan (PPO), point of service plan (POS), or health maintenance organization (HMO).

The Employee Group Insurance Fund establishes claims liabilities for self-insured options based on estimates of the ultimate cost of claims that have been reported but not settled, and of claims that have been incurred but not reported. Employees and providers have 13 months to file medical claims. The process used to compute claims liabilities does not necessarily result in an exact amount. Claims liabilities are recomputed periodically using actuarial and statistical techniques to produce current estimates. Adjustments to claims liabilities are charged or credited to expense in the period in which they are made. The Employee Group Insurance Fund considers investment income in determining if a premium deficiency exists.

As discussed above, the Employee Group Insurance Fund establishes a liability for both reported and unreported insured events, which includes estimates of both future payments of losses and related claim adjustment expenses, both allocated and unallocated. The following represents changes in those aggregate liabilities during the past two years (expressed in thousands):

	2010	2009
Unpaid Claims at Beginning of Year	\$ 47,768 \$	51,968
Incurred Claims:		
Provision for insured events of		
the current year	672,642	654,939
Increase (decrease) in provision for insured events of prior years	(1,760)	(5,506)
Total Incurred Claims Expenses	670,882	649,433
Payments:		
Claims attributable to insured events		
of the current year	622,502	607,171
Claims attributable to insured events		
of prior years	46,009	46,462
Total Payments	668,511	653,633
Total Unpaid Claims at End of the Year	\$ 50,139	47,768

5. Component Unit—AccessTN – The AccessTN insurance fund, a public-entity risk pool, was established in 2006 to provide health insurance options for the state's uninsured. In accordance with Tennessee Code Annotated 56-7-2901, the target population is those Tennessean residents unable to obtain health insurance because of their health conditions. Enrollment began on April 1, 2007, and at June 30, 2010, the plan had 3,872 participants. Three plans exist with deductibles of \$1,000, \$3,000, and \$5,000. The benefit plans are based on PPO plans with an 80% in-network benefit and 60% out-of-network benefit and modeled after the state employee plans. The State does not retain any risk for losses by this fund.

This insurance fund provides health care financing based in part upon member premiums, and uses traditional insurance components, including deductibles, co-insurance, pre-existing conditions exclusion periods, and benefit limits to moderate medical claims to a level which can be supported by an affordable premium. The State's enabling statute provides for an assessment on insurers, third-party administrators, and other insurance arrangements. The latest assessment for AccessTN is projected following the end of fiscal year 2010, approximately September 13, 2010. Based upon actuarial medical claims projections, AccessTN has adequate funding established by state appropriations to conduct operations through that period. Investment income is considered for premium deficiency calculations.

The following represents changes in those aggregate liabilities during the current year (expressed in thousands):

		2010	2009
Unpaid Claims at Beginning of Year	\$	6,166 \$	5,696
Incurred Claims:			
Provision for insured events of			
the current year		42,814	43,976
Increase (decrease) in provision for		(1.271)	(1.075)
insured events of prior years		(1,371)	(1,275)
Total Incurred Claims Expenses	•	41,443	42,701
Payments:			
Claims attributable to insured events			
of the current year		39,086	37,841
Claims attributable to insured events			
of prior years		4,792	4,390
Total Payments	-	43,878	42,231
Total Unpaid Claims at End of the Year	\$	3,731 \$	6,166

B. Related organizations

The State's officials are also responsible for appointing the members of the boards of other organizations, but the State's accountability for these organizations does not extend beyond making appointments. The State appoints the board members of the Beech River Watershed Development Authority, Carroll County Watershed Authority, Watkins Institute Commission, Tennessee Alliance for Fitness and Health, Tennessee Insurance Guaranty Association, Tennessee Life and Health Insurance Guaranty Association, Tennessee Sports Hall of Fame, Local Neighborhood Development Corporations, Tennessee Holocaust Commission, Inc., and the Tennessee Automobile Insurance Plan.

C. Jointly governed organizations

The State in conjunction with 37 other states and Puerto Rico are members of the Pest Control Compact.

The State in conjunction with 12 other states is a member of the Southern Growth Policies Board. Tennessee paid \$44,586 in fiscal year 2010 for membership dues.

The Southern Regional Education Compact was entered into with 15 other states. Tennessee paid \$21,000 in fiscal year 2010 for membership dues.

The Compact for Education was entered into with 48 other states, plus Puerto Rico, the Virgin Islands, American Samoa and the District of Columbia. Tennessee paid \$77,300 in fiscal year 2010 for membership dues.

The Interstate Mining Compact has 19 member states, including Tennessee. Tennessee paid \$18,131 in fiscal year 2010 for membership dues.

The Southern States Nuclear Compact is comprised of 16 member states, including Tennessee, plus Puerto Rico and the Virgin Islands. Tennessee paid \$34,267 in fiscal year 2010 for membership dues.

The Southeast Interstate Low Level Radioactive Waste Compact has 6 member states, including Tennessee.

The Interstate Insurance Product Regulation Commission is comprised of 35 member states and Puerto Rico.

The Interstate Compact for Juveniles is comprised of 41 member states, including Tennessee.

The Interstate Compact for Supervision of Adult Offenders is comprised of all 50 states, plus the District of Columbia, Puerto Rico and the Virgin Islands.

D. Joint ventures

The State is a participant in a joint venture, the Tennessee-Tombigbee Waterway Development Compact, with the states of Alabama, Kentucky and Mississippi. The purpose of this compact is to promote the development of a navigable waterway connecting the Tennessee and Tombigbee Rivers and provide a nine foot navigable channel. The fiscal year end of the Tennessee-Tombigbee Waterway is December 31. Financial statements for the Tennessee-Tombigbee Waterway may be obtained at: P.O. Drawer 671, Columbus, MS 39703.

Presented below is summary financial data for this joint venture (expressed in thousands):

		2009	2008

E. Other postemployment benefits (OPEB)

Employer

Plan Description

The State of Tennessee administers and participates in the Employee Group Plan and the Medicare Supplement Plan for retired employees' healthcare benefits. For accounting purposes, the plans are agent multiple-employer defined benefit OPEB plans. Benefits are established and amended by an insurance committee created by Tennessee Code Annotated (TCA) 8-27-201 for the state plan and TCA 8-27-701 for the Medicare Supplement Plan. Prior to reaching the age of 65, all members have the option of choosing a preferred provider organization (PPO), point of service (POS), or health maintenance organization (HMO) plan for healthcare benefits.

Subsequent to age 65, members who are also in the state's retirement system may participate in the Medicare Supplement Plan. That plan does not include pharmacy.

Special Funding Situation

The state is legally responsible for contributions to the Teacher Group and Medicare Supplement Plans that cover the retirees of other governmental entities. The state provides a subsidy for retired teachers in each plan. The state is not the sole "employer" contributor in the Teacher Group Plan since some Local Education Agencies provide a level of support. However, the state is the sole contributor for the teachers that participate in the Medicare Supplement Plan and, therefore, is acting as the employer.

Funding Policy

The premium requirements of plan members are established and may be amended by the insurance committee. The plans are self-insured and financed on a pay-as-you-go basis with the risk shared equally among the participants. Claims liabilities of the plan are periodically computed using actuarial and statistical techniques to establish premium rates. Administrative costs of the plan are allocated to plan participants. Retired employees who have not reached the age of 65 pay the same base premium as active employees in the plan adjusted for years of service. Retirees with 30 years of service are subsidized 80 percent; 25 years, 70 percent; and 20 years, 60 percent. Retired employees who are 65 years of age or older have flat rate premium subsidies based on years of service. Retirees with 30 years of service receive \$50 per month; 25 years, \$37.50; and 20 years, \$25.

<u>Annual OPEB Cost and Net OPEB Obligation—Primary Government</u> (expressed in thousands)

Funded Status and Funding Progress

The funded status of the plans as of July 1, 2009, was as follows (expressed in thousands):

Primary Government

	Employee Group Plan		Teacher Group Plan (State Share)		Medicare Supplement Plan			
		-			State		Teachers	
Actuarial valuation date	7/1/2009		7/1/2009		7/1/2009		7/1/2009	
Actuarial accrued liability (AAL)	\$ 1,104,073	\$	240,910	\$	209,622	\$	158,789	
Actuarial value of plan assets								
Unfunded actuarial accrued								
liablility (UAAL)	\$ 1,104,073	\$	240,910	\$	209,622	\$	158,789	
Actuarial Value of Assets								
as a % of the AAL	0.00%		0.00%		0.00%		0.00%	
Covered payroll								
(active plan members)	\$ 1,729,937		N/A		N/A		N/A	
UAAL as a percentage								
of covered payroll	63.82%		N/A		N/A		N/A	

Covered payroll is N/A for the Teacher Group as the state does not have any payroll information for the participants. The state is assuming a liability because of a special funding situation that exists between the state and the Teacher Group Plan. Covered payroll for the Medicare Supplement plan is N/A as this plan only has retirees enrolled.

Component Units

	Employee Group Plan			
Actuarial valuation date Actuarial accrued liability (AAL) Actuarial value of plan assets	7/1/2009 \$ 577,744			
Unfunded actuarial accrued liability (UAAL)	\$ 577,744			
Actuarial Value of Assets as a % of the AAL Covered payroll (active plan members) UAAL as a percentage of covered payroll	0.00% \$1,371,949 42.11%			

Actuarial valuations involve estimates of the value of reported amounts and assumptions about the probability of events far into the future, and actuarially determined amounts are subject to continual revision as actual results are compared to past expectations and new estimates are made about the future. The schedule of funding progress, presented as Required Supplementary Information following the notes to the financial statements, presents multiyear trend information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liability for benefits.

Actuarial Methods and Assumptions

Calculations are based on the types of benefits provided under the terms of the substantive plan at the time of each valuation and on the pattern of sharing of costs between the employer and plan members to that point. Actuarial calculations reflect a long-term perspective. Consistent with that perspective, actuarial methods and assumptions

used include techniques that are designed to reduce short-term volatility in actuarial accrued liabilities and the actuarial value of assets.

In the July 1, 2009, actuarial valuation for each plan, the Projected Unit Credit actuarial cost method was used. The actuarial assumptions included a 4.5 percent investment rate of return (net of administrative expenses) and an annual healthcare cost trend rate of 6 percent in fiscal year 2010 for the employee Group plan, 4 percent for the Local Education plan and 1 percent for the Medicare Supplement plan. In all plans, the rate increased to 10 percent in fiscal year 2011, and then reduced by decrements to an ultimate rate of 5 percent in fiscal year 2021. All rates include a 3 percent inflation assumption. The unfunded actuarial accrued liability is being amortized as a level percentage of payroll on a closed basis over a 30 year period beginning with July 1, 2007.

Plan

Healthcare is the only "other postemployment benefit" (OPEB) provided to employees. The following plans, administered by the State, are reported as Agency Funds and are financially independent.

Beginning in the fiscal year ending June 30, 2008, each participating employer is required by GASB Statement 45, *Accounting and Financial Reporting by Employer for Postemployment Benefits Other Than Pensions*, to disclose additional information with regard to funding policy, the employer's annual OPEB cost and contributions made, the funded status and funding progress of the employer's individual plan, and actuarial methods and assumptions used.

1. Retiree Health Plan—State Plan

- a. Plan description—State and higher education retired employees participate in the State Employee Group Insurance Plan. For accounting and financial reporting purposes, the balances and transactions for these retirees have been removed from the State Employee Group Insurance Plan internal service fund and reported in an agency fund. The Employee Group Insurance Plan is a cost-sharing, multiple-employer defined benefit health insurance plan. Approximately 64 employers contribute to the plan.
 - All retired employees and disability participants of the primary government and component units, who are eligible and choose coverage, are included in this plan. Retirees and disability participants prior to the age of 65 participate in this plan. At June 30, 2010, there were 7,919 retirees and disabled participants enrolled in one of three options: preferred provider organization plan (PPO), point of service (POS), or health maintenance organization (HMO). The State insurance committee establishes premiums annually.
- b. Summary of significant accounting policies—Premiums are recognized when due and benefits are paid when incurred using the accrual basis of accounting. Premium refunds reduce premium revenue and claims recoveries reduce claims expense.
- c. Contributions and reserves—An insurance committee created in accordance with Tennessee Code Annotated (TCA) 8-27-201, establishes the contributions to the plan by member employers and employees. Both active and pre-age 65 retired members of the Employee Group Insurance Plan pay the same premium rate. Claims liabilities of the plan are periodically computed using actuarial and statistical techniques to establish premium rates. Administrative costs of the plan are allocated to plan participants. Retiree premiums are based on years of service; therefore, retirees with 30 years of service are subsidized 80 percent; 25 years, 70 percent; and 20 years, 60 percent. This plan is funded on a pay-as-you-go basis.

2. Retiree Health Plan—LEA Plan

a. Plan description—Retired teachers participate in the Teacher Group Insurance Plan. For accounting and financial reporting purposes, the balances and transactions for these retirees have been removed from the Teacher Group Insurance Plan enterprise fund and reported in an agency fund. The Teacher Group Insurance Plan is a cost-sharing, multiple-employer defined benefit health insurance plan that is

considered to be an agent multiple-employer plan for accounting purposes. Approximately 125 local education agencies and two education cooperatives participate in the plan.

All retired teachers and disability participants of the local education agencies, who are eligible and choose coverage, are included in this plan. Retirees and disability participants prior to the age of 65 participate in this plan. At June 30, 2010, there were 5,733 retirees and disability participants enrolled in one of three options: preferred provider organization plan (PPO), point of service (POS), or health maintenance organization (HMO). The insurance committee establishes premiums annually.

- b. Summary of significant accounting policies—Premiums are recognized when due and benefits are paid when incurred using the accrual basis of accounting. Premium refunds reduce premium revenue and claims recoveries reduce claims expense.
- c. Contributions and reserves—An insurance committee created in accordance with Tennessee Code Annotated (TCA) 8-27-302, establishes the contributions to the plan by member employers and employees. Both active and pre-age 65 retired members of the Teacher Group Insurance Plan pay the same premium rate. Claims liabilities of the plan are periodically computed using actuarial and statistical techniques to establish premium rates. Administrative costs of the plan are allocated to plan participants. Not all employers contribute to retirees' healthcare premiums. Those employers who do contribute to the retirees' premiums primarily do so based on years of service. This plan is funded on a pay-as-you-go basis.

3. Retiree Health Plan—Local Plan

a. Plan description—Local government retired employees participate in the Local Government Group Insurance Plan. For accounting and financial reporting purposes, the balances and transactions for these retirees have been removed from the Local Government Group Insurance Plan enterprise fund and reported in an agency fund. The Local Government Group Insurance Plan is a cost-sharing, multiple-employer plan that is considered to be an agent multiple-employer plan for accounting purposes. Approximately 43 counties, 75 municipalities, and 244 quasi-governmental organizations participate in the plan.

All retired employees and disability participants of the local governments, who are eligible and choose coverage, are included in this plan. Retirees and disability participants prior to the age of 65 participate in this plan. At June 30, 2010, there were 319 retirees and disability participants enrolled in one of three options: preferred provider organizations plan (PPO), point of service (POS), or health maintenance organization (HMO). The insurance committee establishes premiums annually.

- b. Summary of significant accounting policies—Premiums are recognized when due and benefits are paid when incurred using the accrual basis of accounting. Premium refunds reduce premium revenue and claims recoveries reduce claims expense.
- c. Contributions and reserves—An insurance committee created in accordance with Tennessee Code Annotated (TCA) 8-27-207, establishes the contributions to the plan by member employers and employees. Both active and pre-age 65 retired members of the Teacher Group Insurance Plan pay the same premium rate. Claims liabilities of the plan are periodically computed using actuarial and statistical techniques to establish premium rates. Administrative costs of the plan are allocated to plan participants. Not all employers contribute to retirees' healthcare premiums. Those employers who do contribute to the retirees' premiums primarily do so based on years of service. This plan is funded on a pay-as you-go basis.

4. Retiree Health Plan—Medicare Supplement

- a. Plan description—Post-65 retired employees of the state, higher education, local education agencies, and certain local governments may participate in the Medicare Supplement Insurance Plan. This plan is reported in an agency fund. Prior to July 1, 2006, this plan was reported as an enterprise fund. The Medicare Supplement Plan is a cost-sharing, multiple-employer defined benefit health insurance plan that is considered to be an agent multiple-employer plan for accounting purposes. Employers who participate in the State Plan, LEA Plan, and Local Plan may participate in this plan. All retired employees who are Medicare eligible, by virtue of age and receive a retirement benefit from the Tennessee Consolidated Retirement System, and choose coverage, are included in this plan. At June 30, 2010, there were 27,613 retirees and disabled members enrolled. The State insurance committee establishes premiums annually.
- b. Summary of significant accounting policies—Premiums are recognized when due and benefits are paid when incurred using the accrual basis of accounting. Premium refunds reduce premium revenue and claims recoveries reduce claims expense.
- c. Contributions and reserves—In accordance with Tennessee Coded Annotated 8-27-701, the state insurance committee establishes the contributions to the plan by member employers and employees. Claims liabilities of the plan are periodically computed using actuarial and statistical techniques to establish premium rates. Administrative costs of the plan are allocated to plan participants. Not all employers contribute to retirees' healthcare premiums. Employers contribute a fixed amount to retirees' premiums based on years of service; therefore, retirees with 30 years of service are subsidized \$50 per month; 25 years, \$37.50; and 20 years, \$25. This plan is funded on a pay-as-you-go basis.

5. Cobra—Federal law requires large employers to continue health insurance benefits to employees who have terminated employment for up to 18 months. The former employees must pay 102 percent of the total premium (employee plus employer share), funded on a pay-as-you-go basis. Insurance coverage is not mandatory if the former employee is eligible for Medicare or has coverage with another group medical plan. The State covered an average of 626 former employees during fiscal year 2009-2010, and the State Plan paid approximately \$5.5 million in benefits to this group.

F. Pension plans

1. State Defined Benefit Plan - The State of Tennessee contributes to the State Employees, Teachers, and Higher Education Employees Pension Plan (SETHEEPP), a cost-sharing multiple employer defined benefit pension plan administered by the Tennessee Consolidated Retirement System (TCRS) and consisting of 140 participating employers. The TCRS provides retirement benefits as well as death and disability benefits to plan members and their beneficiaries. Benefits are determined by a formula using the member's high five-year average salary and years of service. Members become eligible to retire at the age of 60 with five years of service or at any age with 30 years of service. A reduced retirement benefit is available to vested members who are at least 55 years of age or have 25 years of service. Disability benefits are available to active members with five years of service who become disabled and cannot engage in gainful employment. There is no service requirement for disability that is the result of an accident or injury occurring while the member was in the performance of duty. Members joining the plan on or after July 1, 1979, are vested after five years of service. Members joining prior to July 1, 1979, are vested after four years of service. Benefit provisions are established by state statute found in Title 8, Chapters 34-37 of the Tennessee Code Annotated (TCA). State statutes are amended by the Tennessee General Assembly. Cost of living adjustments (COLA) are provided each July based on the percentage change in the Consumer Price Index (CPI) during the previous calendar year. No COLA is granted if the CPI increases less than one-half percent; a COLA of one percent will be granted if the CPI increases between one-half percent and one percent; the maximum annual COLA is capped at three percent.

Plan member contributions are recognized in the period of time for which the contributions are assessed. Plan employer contributions are recognized when due and the employer has made a formal commitment to provide the contributions. Benefits and refunds are recognized when due and payable in accordance with the terms of each plan.

Most plan members are noncontributory. The State of Tennessee is required to contribute at an actuarially determined rate. The current rate is 13.02% of annual covered payroll. The contribution requirements of the State of Tennessee are established and may be amended by the TCRS Board of Trustees. The State's contributions to TCRS for the years ending June 30, 2010, 2009, and 2008, were \$578.404 million, \$583.985 million, and \$593.412 million respectively, equal to the required contributions for each year.

The TCRS issues a publicly available financial report that includes financial statements and required supplementary information for SETHEEPP. That report is available on the TCRS website at www.treasury.tn.gov/TCRS/ or by calling (615) 741-7063.

2. Political Subdivision Defined Benefits Plan - TCRS administers the Political Subdivision Pension Plan (PSPP), which is an agent multiple-employer defined benefit pension plan that covers employees of 482 participating political subdivisions. The PSPP provides retirement benefits as well as death and disability benefits to plan members and their beneficiaries. Benefits are determined by a formula using the member's high five-year average salary and years of service. Members become eligible to retire at the age of 60 with five years of service or at any age with 30 years of service. A reduced retirement benefit is available to vested members who are at least 55 years of age or have 25 years of service. Disability benefits are available to active members with five years of service who become disabled and cannot engage in gainful employment. There is no service requirement for disability that is the result of an accident or injury occurring while the member was in the performance of duty. Members joining the plan prior to July 1, 1979, are vested after four years of service.

Members joining on or after July 1, 1979, are vested upon completion of 10 years of service, unless five years vesting is authorized by resolution of the chief governing body. Benefit provisions are established and amended by state statute. Cost of living adjustments (COLA) are the same as provided by SETHEEPP except that the local government may elect (a) to provide no COLA benefits or (b) to provide COLA benefits under a non-compounding basis rather than the compounded basis applicable under SETHEEPP. Pursuant to Article Two, Section 24 of the Constitution of the State of Tennessee, the State cannot mandate costs on local governments. Any benefit improvement may be adopted by the governing body of a governmental entity participating in the TCRS.

Plan member contributions are recognized in the period of time for which the contributions are assessed. Plan employer contributions are recognized when due and the employer has made a formal commitment to provide the contributions. Benefits and refunds are recognized when due and payable in accordance with the terms of each plan.

The TCRS issues a publicly available financial report that includes financial statements and required supplementary information for PSPP. The PSPP report is available on the TCRS website at www.treasury.tn.gov/TCRS/ or by calling (615) 741-7063.

3. <u>Defined Contribution Plan</u> - The Optional Retirement Plan (ORP) as administered by the Tennessee Treasury Department is a defined contribution plan. The ORP was established by state statute in Title 8, Chapter 35, Part 4 of the TCA. This statute also sets out the plan provisions. State statutes are amended by the Tennessee General Assembly. The ORP was designed to provide benefits at retirement to faculty and staff of the Tennessee Board of Regents institutions and the University of Tennessee system who are exempt from the overtime provision of the Fair Labor Standards Act and who waive membership in the TCRS. In a defined contribution plan, benefits depend solely on amounts contributed to the plan plus investment earnings. Plan members are noncontributory. The State of Tennessee contributes 10% of the employee's base salary up to the social security wage base and 11% above the social security wage base. The required contributions made by the State of Tennessee to the ORP were \$83.9 million for the year ended June 30, 2010.

Members are immediately 100 percent vested in the employer contributions made pursuant to the ORP. The Treasury Department has selected three investment vendors who offer a variety of investment products in which members are responsible for selecting how the contributions are invested. Each member makes the decision when to reallocate future contributions or when to transfer funds from one investment product to another. Funds are held by the investment vendor in the name of the member, not in the name of the State of Tennessee. The State of Tennessee has no discretion over these funds other than to make the initial contributions. Accordingly, the State of Tennessee is not acting in a trustee capacity nor does it have a fiduciary responsibility for the funds held by the investment vendors.

4. <u>Deferred Compensation</u> - The State offers its employees two deferred compensation plans, one established pursuant to IRC Section 457 and the other pursuant to IRC Section 401(k). All costs of administering and funding these programs are the responsibility of plan participants.

The Section 401(k) and Section 457 plan assets remain the property of the contributing employees, they are not presented in the accompanying financial statements. IRC Sections 401(k) and 457 establish participation, contribution and withdrawal provisions for the plans. During the year ended June 30, 2010, contributions totaling \$139.7 million were made to the plans.

G. Investment pool

The State Pooled Investment Fund (SPIF) is an external investment pool sponsored by the State of Tennessee. The external portion of SPIF is the Local Government Investment Pool (LGIP) and is reported as a separate investment trust fund. The internal portion, consisting of funds belonging to the State and its component units, has been included in the various funds and component units.

A copy of the SPIF report can be obtained by writing Tennessee Treasury Department, Accounting Division, 9th Floor Andrew Jackson Building, Nashville, TN 37243-0231 or by calling (615) 741-7063.

H. Loan guarantees

The Tennessee Student Assistance Corporation (TSAC), a component unit, operates the Guaranteed Student Loans Program. The U. S. Department of Education (USDE) reinsures a majority of the student loans for at least 75% of their principal amounts. At June 30, 2010, TSAC was guaranter of \$4.456 billion in student loans. TSAC has minimal obligation under these student loan guarantees in the event of default.

I. Nashville correctional facilities revenue bonds

In June 1991, revenue bonds were issued by the Metropolitan Government of Nashville that were refunded in February 2002. The refunding bonds have an outstanding balance at June 30, 2010, of \$3.87 million. These bonds are obligations of the Metropolitan Government of Nashville. The State is committed to pay Nashville for the housing of locally sentenced inmates, including debt service on the bonds.

J. Contingencies

1. Litigation

The State is a defendant in multiple legal proceedings. Included in these claims are cases associated with the legality and compliance of the policies and practices of the State's Medicaid agency.

The State is also involved in other litigating matters that include claims which normally recur in governmental operations. Some of these lawsuits, including the ones referred to above, may have a future budgetary programmatic impact. They will be addressed in future budgets. Other potential losses resulting from unfavorable verdicts in legal proceedings are estimated to cost the State approximately \$204 million.

2. Tobacco settlement

In November 1998, Tennessee joined 45 other states, the District of Columbia and five territories in a settlement agreement against the nation's largest tobacco manufacturers, to seek redress against the tobacco companies for violations of state consumer and antitrust laws. The Master Settlement Agreement (MSA) includes base payments to all states and territories through 2025, and continues in perpetuity. Tennessee's share of the base payments was originally projected at \$4.8 billion through the year 2025. Since the agreement is complex, the annual payments have, and will continue to be, subject to a number of adjustments including inflation, volume, previously settled states and non-participating manufacturers. Some of these adjustments, such as the inflation adjustment, result in the State receiving higher payments. Other factors, such as volume adjustment and the market share adjustment can work to reduce annual payments. The non-participating manufacturers' adjustment is currently the subject of dispute, and some of the sums related to it are being withheld from the payments to the States. Furthermore, there is a possibility that additional amounts, which were paid in previous years, could be subject to refund as a result of these ongoing disputes. These refunds could reduce future payments received by some of the MSA participants. Third party lawsuits may also affect future payments. The net effect of these adjustments on future payments is unclear.

3. Pollution Remediation Obligations

The State implemented GASB Statement No. 49 which provides guidance on estimating and reporting pollution remediation obligations. A pollution remediation obligation is a liability to address the current or potential detrimental effects of existing pollution by participating in pollution remediation activities such as site assessments, site cleanups, and postremediation monitoring. The recognition of pollution remediation obligation is required when any of the following obligating events occur:

- The State is compelled to take remediation action because of imminent danger to the public;
- The State is in violation of pollution related permit or license;
- The State is identified as a responsible party or potentially responsible party by a regulator;

- The State is named or has evidence that it will be named in a lawsuit; or
- The State commences or legally obligates itself to commence pollution remediation activities.

The pollution remediation obligation is an estimate and this estimate is subject to change resulting from price increases or decreases, changes in technology, or changes in legal or regulatory requirements. In addition, recoveries from other responsible parties can reduce the State's obligation. Several agencies within state government have programs to investigate and oversee remediation activities. These program personnel have the expertise to estimate the remediation obligations based on prior experience with similar remediation activities. These obligations are measured at current value using the expected cash flow technique. In addition, historical data is used in the estimation process for common sites with which the State has experience.

The State's pollution remediation obligations are primarily from chemical, fuel, and asbestos contamination. These obligations are the result of violations of various federal and state environmental laws.

During the fiscal year, the State spent \$4.2 million for remediation activities and had an expected recovery of \$1.6 million from responsible parties. At June 30, 2010, the State had a pollution remediation obligation of \$116.2 million and an estimated potential recovery of \$5.9 million from other responsible parties.

4. Federal grants

The State receives significant financial assistance from the federal government in the form of grants and entitlements. The receipt of federal grants is generally conditioned upon compliance with terms and conditions of the grant agreements and applicable federal regulations. Substantially, all federal grants are subject to either federal single audits or financial and compliance audits by grantor agencies or their representatives. Questioned costs as a result of these audits may become disallowances after the appropriate review of federal agencies. Material disallowances are recognized as fund liabilities when the loss becomes probable and reasonably estimable.

K. Subsequent events

Primary Government

Subsequent to June 30, the State issued \$110 million in general obligation commercial paper. Also, in October 2010, the State issued 2010 Series A tax-exempt general obligation bonds in the amount of \$186.5 million at a premium of \$12.9 million and 2010 Series B taxable general obligation bonds in the amount of \$44.9 million at a premium of \$2.2 million. The Series A issuance was used to redeem commercial paper and to finance the purchase of capital assets and the Series B issuance was used to refund a portion of 2003 Series B tax-exempt general obligation bonds.

Component Units

Subsequent to June 30, Tennessee Housing Development Agency (THDA) had the following revenue bond issuances: (2010-1) in October 2010 in the amount of \$120.7 million, (2010-B) in November 2010 in the amount of \$40 million, and the (2009-B, Subseries B-2) in November 2010 in the amount of \$60 million. In January 2011, the THDA Board of Directors authorized the issuance of (2011-A) for an amount not to exceed \$40 million and (2009-B) for an amount not to exceed \$60 million. The agency used mortgage prepayments, foreclosures proceeds, and note proceeds to redeem \$78.7 million of outstanding bonds in July 2010, \$51.8 million in October 2010, \$99.8 million in November 2010, and \$43.8 million in January 2011.

Subsequent to June 30, the Tennessee State School Bond Authority (TSSBA) issued \$77.2 million in commercial paper. In September 2010, TSSBA issued 2010 Series A tax-exempt bonds in the amount of \$213.9 and 2010 Series B taxable bonds in the amount of \$18 million. Also, in October 2010, TSSBA issued \$212.4 million in Qualified School Construction Bonds (QSCB). The 2010 Series A and B were used to redeem commercial paper and finance new construction projects, and the QSCB proceeds were used by K-12 schools for renovation and rehabilitation projects, equipment purchases, new building construction, and land acquisition.

Subsequent to June 30, the Metropolitan Government of Nashville and Davidson County notified the Tennessee Local Development Authority (TLDA) of its intention to defease its current TLDA outstanding debt. As of December 2010, \$38.5 million in long-term debt and \$53 million in bond anticipation notes were defeased.

REQUIRED SUPPLEMENTARY INFORMATION

STATE OF TENNESSEE REQUIRED SUPPLEMENTARY INFORMATION (RSI)

Infrastructure Assets Reported Using the Modified Approach

ROADWAYS

Measurement Scale

The state uses a Maintenance Rating Index (MRI) that addresses all elements of the roadway system. A statistical sample of randomly selected highway segments, representative of the entire subsystem, is inspected annually and rated in accordance with the MRI criteria. The following elements are rated: traveled pavement; shoulders; various roadside elements such as debris, grass height, slope erosion, and fencing; drainage elements such as culverts, cross drain pipes, and drain inlets; and traffic services such as signage, pavement markings, and guardrails. The MRI is a numerical score from 1 to 100, with 100 being a perfect score. The average MRI of all the rated segments is the reported condition level.

Established Condition Level

The state intends to maintain roadways so that the reported condition level each year does not fall below 75.

Assessed Conditions

The following table presents the average MRI of all rated segments.

For the Period Ended	Maintenance Rating Index
June 30, 2010	89.40
June 30, 2009	89.60
June 30, 2008	89.20

BRIDGES

Measurement Scale

The state maintains information on its 8,163 bridges in compliance with the National Bridge Inventory (NBI) guidelines established by the Federal Highway Administration. Bridges are inspected at least once every two years and the results are coded on a 0 to 9 scale (with 9 being the most desirable). A bridge coded 4 or less for its deck, superstructure, or substructure, or coded 2 or less for its structural evaluation or waterway adequacy, is classified as "structurally deficient." A structurally deficient bridge is inadequate to carry legal loads, whether caused by structural deterioration, obsolete design standards, or an insufficient waterway opening. A bridge coded 3 or less for its structural evaluation, deck geometry, vertical or horizontal underclearance, water adequacy, or approach roadway alignment is classified as "functionally obsolete." A functionally obsolete bridge cannot properly accommodate the current traffic.

Established Condition Level

The state intends to maintain bridges so that 75 percent or more of the total deck area is not classified as structurally deficient or functionally obsolete.

Assessed Conditions

The following table presents the percentage of deck area whose condition assessment did not meet the criteria of structurally deficient or functionally obsolete according to the NBI.

Percentage of Deck Area
Not Structurally Deficient
or Functionally Obsolete
82.00%
81.00%
85.80%

STATE OF TENNESSEE REQUIRED SUPPLEMENTARY INFORMATION (RSI) (Continued)

ESTIMATED AND ACTUAL COSTS TO MAINTAIN

The following table presents the state's estimate of spending to preserve and maintain the roadways and bridges at, or above, the "Established Condition Level" cited above, and the actual amount spent (in thousands):

For the Period				
Ended	Road	ways	Brid	dges
<u>June 30</u>	Estimated	<u>Actual</u>	Estimated	<u>Actual</u>
2010	\$259,147	\$425,681	\$39,707	\$44,312
2009	374,003	405,439	40,217	46.815
2008	270,331	310,355	36,224	29,196
2007	236,556	286,663	35,624	28,183
2006	224,472	277,442	33,052	38,327
2005	261,846	229,414	35,372	23,054

Actual and estimated maintenance/preservation expenses are determined using the accrual basis of accounting.

State of Tennessee AccessTN Insurance Fund Required Supplementary Information Ten-Year Claims Development Table

(Expressed in Thousands)

The table below illustrates how the AccessTN Insurance Fund's earned revenues and investment income compared to related costs of loss and other expenses assumed by the AccessTN Insurance Fund as of the end of each of the last four fiscal years since inception of the fund in April 2007. The rows of the table are defined as follows: (1) This line shows the total of each fiscal year's earned contribution revenues and investment revenues. (2) This line shows each fiscal year's other operating costs of the fund including overhead and claims expense not allocable to individual claims. (3) This line shows the fund's incurred claims and allocated claim adjustment expenses (both paid and accrued) as originally reported at the end of the first year in which the event that triggered coverage under the contract occurred (policy year). (4) This section shows the cumulative net amounts paid as of the end of successive years for each year. (5) This section shows how each year's net incurred claims increased or decreased as of the end of successive years. This annual reestimation results from new information received on known claims, reevaluation of existing information on known claims, as well as emergence of new claims not previously known. (6) This line compares the latest reestimated net incurred claims amount to the amount originally established (line 3) and shows whether this latest estimate of claims cost is greater or less than originally thought. As data for individual policy years mature, the correlation between original estimates and reestimated amounts is commonly used to evaluate the accuracy of net incurred claims currently recognized in less mature policy years. The columns of the table show data for successive fiscal and policy years.

	2007	2008	2009	2010
(1) Required contribution and investment revenue earned				
(fiscal year)	877	21,847	23,777	15,773
(2) Unallocated expenses	3,520	2,830	2,085	1,195
(3) Estimated claims and expenses, end of policy year,				
net incurred	8,922	38,764	39,811	*
(4) Net paid (cumulative) as of:				
End of policy year	6,591	34,095	36,859	*
One year later	9,044	38,791	*	*
Two years later	9,056	*	*	*
(5) Reestimated net incurred claims and expenses:

State of Tennessee Required Supplementary Information Reconciliation of Budget to GAAP Note to RSI For the Fiscal Year Ended June 30, 2010

(Expressed in thousands)

1. Explanation of differences between budgetary inflows and outflows and GAAP revenues and expenditures

		General Fund	Education Fund	Highway Fund
Sources of financial resources		10.060.000	5.21 0.066 0	2 (55 (0)
Actual amounts (budgetary basis)	\$	19,862,022 \$	7,219,966 \$	2,655,696
Differences - budget to GAAP:				
The fund balance at the beginning of the fiscal year is a budgetary				
resource but is not a current-year revenue for financial statement				
purposes.		(1,746,694)	(524,165)	(613,431)
			, , ,	, , ,
Other financing sources are inflows of budgetary resources,				
but are not revenues for financial statement purposes.		(140,541)	(997,768)	(108,600)
Total revenues as reported on the Statement of Revenues,				
Expenditures, and Changes in Fund Balances - Governmental Funds	\$	17,974,787 \$	5,698,033 \$	1,933,665
Uses of financial resources				
Actual amounts (budgetary basis)	\$	17,995,030 \$	6,674,918 \$	2,647,279
Differences - budget to GAAP:				
Certain construction contract commitments are reported in				
the year of federal appropriation for budgetary purposes,				
but in the year the services are received for financial				
reporting purposes.				(494,894)
Transfers to other funds are outflows of budgetary resources,				
but are not expenditures for financial statement purposes.		(1,132,174)	(402)	(1,336)
	-			·
Total expenditures as reported on the Statement of Revenues,				
Expenditures, and Changes in Fund Balances - Governmental Funds	\$	16,862,856 \$	6,674,516 \$	2,151,049

2. Budgetary process

Legislation requires the Governor to present his proposed budget to the General Assembly at the beginning of each annual session. Annual budgets are adopted for the general fund, special revenue funds (except Fraud and Economic Crime and Dairy Promotion Board), and debt service fund. The General Assembly enacts the budget through passage of specific departmental appropriations, the sum of which may not exceed estimated revenues. Before signing the Appropriations Act, the Governor may veto or reduce any specific appropriation, subject to legislative override. Once passed and signed, the budget becomes the State's financial plan for the coming year.

Budgetary control is maintained at the departmental level. Budget revisions during the year, reflecting program changes or intradepartmental transfers of an administrative nature, may be affected with certain executive and legislative branch approval. Only the legislature, however, may transfer appropriations between departments.

Most appropriations generally lapse at the end of each fiscal year. There were no outstanding encumbrances reported as of June 30, 2010. In order to provide sufficient funding for several programs during the year, supplemental appropriations of \$51.178 million were required.

The State's annual budget is prepared on the modified accrual basis of accounting with several exceptions, principally the effect of contract obligations and certain budgetary commitments in the highway fund. Because these exceptions represent departures from generally accepted accounting principles (GAAP), actual amounts, in the accompanying budgetary comparison schedule, are presented on the budgetary basis. Appropriations for contract obligations in the highway fund do not lapse at year-end, but are carried forward for subsequent year expenditures. In addition, it is the State's budgetary practice to appropriate matching dollars for jointly funded projects in the year of federal apportionment. These appropriations do not lapse at year-end but are also carried forward for subsequent year expenditure.

SUPPLEMENTARY INFORMATION

This Page Intentionally Left Blank

NONMAJOR GOVERNMENTAL FUNDS

Special Revenue Funds—A description of these funds is found later in this section.

<u>Debt Service Fund</u>—The Debt Service Fund is maintained to account for accumulation of resources for, and the payment of, principal and interest on general long-term debt.

<u>Capital Projects Fund</u>—The Capital Projects Fund is maintained to account for the acquisition or construction of major governmental capital assets financed principally by long-term bonds.

Permanent Funds—A description of these funds is found later in this section.

NONMAJOR SPECIAL REVENUE FUNDS

Specific revenues, earmarked to finance particular activities of government, are accounted for in the Special Revenue Funds. A brief description of each fund follows.

<u>Wildlife Resources Agency</u>—This agency is responsible for the preservation, management, enhancement and protection of the state's wildlife resources and their environs. An additional responsibility is the enforcement of boating safety on state lakes and streams. Revenues are derived principally from hunting and fishing licenses, fees and permits.

<u>Criminal Injuries Compensation</u>—The Treasury Department administers this fund for the award of compensation to victims (or their dependents) who suffer personal injury or death as a result of a criminal act. The primary revenue source is the privilege tax levied by the courts at the time of conviction of the offender.

<u>Solid Waste</u>—This program is administered by the Department of Environment and Conservation. Revenues collected for a tipping fee on solid waste are used to provide grants to local governments to reduce the solid waste going into landfills.

<u>Job Skills</u>—This program is administered by the Department of Economic and Community Development. Revenues are collected from a tax on employer's wages. The revenues will be used to enhance employment opportunites and to meet the needs of existing and new industries in the state.

<u>Help America Vote</u>—This program is administered by the Secretary of State. Federal funds, along with state matching dollars, are used in implementing the provisions of the federal Help America Vote Act. The provisions of the act require the funds be used to improve election administration and to replace punch card and lever voting machines.

<u>Environmental Protection</u>—This program is administered by the Department of Environment and Conservation. Revenues collected from the various fees under the environmental protection fund are used to offset the cost of administering regulatory environmental programs.

<u>Hazardous Waste</u>—This program is administered by the Department of Environment and Conservation. Revenues collected from applicants and holders of storage, treatment or disposal permits of hazardous waste are used to supervise the construction, operation, maintenance, closure and, where necessary, the post-closure care of hazardous waste facilities.

<u>Parks Acquisition</u>—This program is administered jointly by the Departments of Environment and Conservation, Agriculture and Wildlife Resources. Revenues collected from the transfer of real property are used to acquire parks by both local and state governments.

<u>Supreme Court Boards</u>—This organization was formed by the Tennessee Supreme Court to consider and investigate any alleged ground for discipline or alleged incapacity of any attorney, and to provide continuing legal education for attorneys. Revenues are collected from attorneys.

<u>Underground Storage Tanks</u>—This program is administered by the Department of Environment and Conservation. Revenues are collected primarily from a tax of four tenths of a cent per gallon on petroleum products and an annual fee on owners and operators of underground storage tanks containing petroleum substances.

<u>Enhanced Emergency 911 Service</u>—This program is administered by the Department of Commerce and Insurance. Revenues are collected from a monthly fee on users of cellular telephone services. This fee is used to enhance the effectiveness of response times when a cellular user calls 911.

<u>Driver Education</u>—This program is designed and coordinated by the Department of Safety. Highway safety is promoted by providing driver education, instruction and training in schools, colleges and community organizations. The \$2 fee for moving traffic violations is the source of funding for this program.

<u>Abandoned Land Program</u>—This program is administered by the Department of Environment and Conservation. Revenues collected from surface mining permit fees and forfeited performance bonds are used to reclaim and restore lands affected by abandoned mining operations.

<u>Agricultural Non-Point Water Pollution</u>—This program is administered by the Department of Agriculture. Revenues collected from the transfer of real property are used to abate pollution from agricultural sources.

<u>Regulatory Boards</u>—This program is administered by the Department of Commerce and Insurance. Revenues are collected from fees assessed on licenses to real estate brokers, affiliate real estate brokers or auctioneers. These revenues are used to pay court judgments for violations by brokers, contractors or auctioneers of the applicable acts or of any rules promulgated by the appropriate officials.

<u>Salvage Title Enforcement</u>—This program is administered by the Department of Revenue. Revenues are collected on the titlement of salvage vehicles and are used to enforce motor vehicle title and salvage laws and inspection of rebuilt vehicles.

<u>Dairy Promotion Board</u>—This Board was formed to promote the consumption of milk and milk products. Revenue is derived from an assessment against commercial milk and milk product producers.

<u>Drycleaner's Environmental Response</u>—This program is administered by the Department of Environment and Conservation. Revenues collected from drycleaners are an annual registration fee and a fee for the various dry-cleaning solvents used.

<u>Agricultural Regulatory Fund</u>—This program is administered by the Department of Agriculture. Revenues are collected from fees on the various agricultural related industries regulated by the department. These fees are then used in the administration of this regulatory function.

<u>Tennessee Regulatory Authority</u>—The authority is responsible for executing and enforcing all statutes governing utilities. Revenues are derived principally from inspection and supervision fees.

<u>Small and Minority Owned Business Assistance</u>—This program provides loans and loan guarantees and technical assistance to small and minority-owned companies. Revenues collected during fiscal years 1997-2001, were derived from a fee on telecommunication service providers.

<u>Sex Offender Treatment Program</u>—This program was formed to standardize the evaluation, identification, treatment and continued monitoring of sex offenders. Revenue is derived from a fine on those convicted of a sex offense.

<u>Pre-need Consumer Protection</u>—This program is administered by the Department of Commerce and Insurance. Revenues are collected from fees on every pre-need cemetery and funeral contract entered into by a registered seller of pre-need funeral and cemetery contracts. These fees are used to fund the pre-need registration programs and to fund any receivership action initiated against a cemetery or funeral establishment.

<u>Fraud and Economic Crime</u>—This program is administered by the District Attorneys General of the State. Revenues are collected from individuals prosecuted for bad checks. These monies are used to increase resources available to prosecute bad check cases.

PERMANENT FUNDS

<u>Chairs of Excellence Fund</u>—This fund was created by the General Assembly in 1986. Its purpose is to endow faculty chairs at the Tennessee Board of Regents and University of Tennessee campuses in order to attract more highly qualified professors. For a chair to be established, private contributions which a school collects are matched by monies the state has appropriated to fund this program. The chair also receives the interest earned from investment of these matched monies.

<u>Academic Scholars Fund</u>—This fund is used to account for the academic scholars program. An endowment was established in 1986 to provide scholarships to superior students from the interest earnings.

Other—This column includes various smaller funds in which legal restrictions require that the principal remain intact and only the earnings may be spent.

NONMAJOR ENTERPRISE FUNDS

The Enterprise Funds are used to account for the operations of state agencies that provide goods or services to the general public on a user charge basis. The state's nonmajor enterprise operations are described below.

State Loan Program—Operated since the early 1970's through the Department of Environment and Conservation, this program has provided financial assistance to local governments and utility districts for the construction of sewage treatment, solid waste recovery and waterworks facilities. In order for these borrowing entities to generate funds necessary to repay the loans, the imposition of a user's fee by the local systems was authorized. In order to finance this program, general obligation bonds were sold which, although remaining full faith and credit obligations of the state, are being retired from resources of this fund. Future financing for this program will be generated from the sale of revenue bonds or notes by the Local Development Authority.

<u>Energy Loan Program</u>—Created in 1988, this program makes loans to small businesses and local governments to improve energy efficiency.

<u>Teacher Group Insurance</u>—Established in January 1986, this fund is used to account for revenues received and claims paid on behalf of currently employed teachers of political subdivisions of the state who have elected coverage under a group medical plan similar to that offered state employees.

<u>Local Government Group Insurance</u>—Established in July 1991, this fund is used to account for revenues received and claims paid on behalf of active employees of local governments and quasi-governmental organizations established for the primary purpose of providing services for or on the behalf of state and local governments. This plan is similar to the plan offered to state employees.

<u>Drinking Water Loan</u>—Created in 1998, this fund provides loans to local governments and utility districts for the improvement of drinking water systems. The initial sources of the monies are federal grants and state appropriations.

<u>Grain Indemnity</u>—This program is administered by the Department of Agriculture. Revenues are collected from fees on grain sold by producers. These revenues are to be used to protect commodity producers in the event of the financial failure of a commodity dealer or warehouseman.

<u>Property Utilization</u>—This agency, a division of the Department of General Services, receives surplus federal property and redistributes it to civil defense units, health and educational institutions and other eligible donees within the state. The agency collects fees from the donees to offset operating costs. In addition, this agency handles surplus property by the various State agencies.

<u>Client Protection</u>—Created by the Tennessee Supreme Court, this fund provides services to protect clients from dishonest conduct by attorneys. Revenue is mainly generated through annual registration fees for attorneys.

INTERNAL SERVICE FUNDS

Internal Service Funds are used to account for the operations of state agencies that provide goods or services to other state agencies on a cost-reimbursement basis. The following operations are included in these funds:

Office for Information Resources—a division of the Department of Finance and Administration, functions as the data and voice service bureau for state government.

<u>Risk Management</u>—administered by the Treasury Department, this fund is used to pay awards for claims made against the state and for damage to state owned property.

<u>Motor Vehicle Management</u>—a division of the Department of General Services, is responsible for administering a uniform program for the operation and maintenance of all state vehicles.

<u>General Services Printing</u>—a division of the Department of General Services, operates a printing facility to provide such services as general printing, typesetting and binding for state agencies located in Nashville. In addition, this division provides photographic services to the various state agencies.

<u>Facilities Revolving Fund</u>—Created in 1989, this fund provides the maintenance, repair and total housing needs of state government for all office and warehouse space in the state, except institutional space.

Employee Group Insurance Fund—Established in January 1978, this fund is used to account for transactions pertaining to the state's self-insured group medical plan. This fund primarily includes employees of the state, University of Tennessee, and the Tennessee Board of Regents System. Group life and accident insurance premiums, dental premiums, and long-term care premiums paid to private insurance companies are also recorded in this fund.

<u>Food Services</u>—a division of the Department of General Services, is responsible for the preparation and distribution of certain food to the various state institutions. This consists of food that is cooked and then immediately frozen and is then reheated at the institution.

<u>Postal Services</u>—a division of the Department of General Services, is responsible for processing and distributing incoming, outgoing and interdepartmental mail for state agencies located in Nashville.

<u>Capitol Print Shop</u>—a division of the Office of the Comptroller, is responsible for providing printing, mailing and other office services for the state agencies located in the Capitol.

<u>Purchasing</u>—a division of the Department of General Services, is responsible for the procurement of supplies, equipment and certain specialized services.

<u>Central Stores</u>—a division of the Department of General Services, is responsible for the purchasing and distribution of office supplies to all state government and quasi-governmental entities that opt to use this service.

Records Management—a division of the Department of General Services, is responsible for the retention and disposal of official records.

<u>Division of Accounts</u>—a division of the Department of Finance and Administration, is responsible for the centralized accounting function for the state.

<u>TRICOR</u> (Tennessee Rehabilitative Initiative in Correction)—Manages correctional industry, agriculture, and service operations. Its purpose is to employ and train inmates and provide products and services to state agencies, local governments, and not-for profit organizations.

<u>Edison</u>—maintained by the Department of Finance and Administration's Enterprise Resource Planning division, is the state's integrated software package for administrative business functions such as financials and accounting, procurement, payroll, benefits, and personnel administration.

FIDUCIARY FUNDS

The Fiduciary Funds are used to account for assets held by the state in a fiduciary capacity.

Pension and Other Employee Benefit Trust:

Pension Trust Fund—The Tennessee Consolidated Retirement System was established in July 1972 superseding seven former retirement systems. The accounts of each superseded system were transferred to the new system wherein separate accounting is maintained for assets and liabilities attributable to the various classes of members and beneficiaries. Benefits under the system are funded by contributions of members and employers. Effective July 1981, contributions of up to 5% of the retirement credible compensation of most classes of state employees, formerly paid by those employees, were assumed by the state pursuant to non-contributory legislation. The level of contributions is determined by actuarial valuation, the latest having been performed as of July 1, 2009. As of that date there were 214,950 active members and 110,875 retired members representing a 1.05% and 12.87% increase, respectively, since the previous actuarial valuation in 2007.

Employee Flexible Benefits—Established in January 1988, this fund is used to account for monies contributed by employees under the IRC Section 125 cafeteria plan.

Private-Purpose Trust Funds:

<u>Baccalaureate Education</u>—This trust was created by the General Assembly in 1996, for the purpose of allowing parents and other interested persons to purchase tuition units on behalf of a designated beneficiary. These units entitle the beneficiary to the payment of qualified tuition, room and board, fees, costs of books, supplies and equipment required for the enrollment or attendance at any accredited public or private, in-state or out-of-state institution. Funds in this trust may only be provided to named individuals who are participants in the program. No other State programs are supported from this trust.

<u>Children in State Custody</u>—This fund accounts for monies held and used for the benefit of children in the custody of the state. Monies held are from various sources including the Social Security Administration.

Oak Ridge Monitoring—Created in 2000 through a consent order won by the state with the United States Department of Energy (DOE), this fund is used to account for monies paid annually through fiscal year 2014 by the federal government to the state for future expenses at the Environmental Management Waste Management Facility at Oak Ridge. After the federal landfill is closed, the income generated from the corpus is to be used for monitoring and maintenance of the facility to ensure there is no radioactive leakage.

<u>TNInvestco</u>—Established in 2009, this fund was created by the General Assembly for the purpose of increasing the flow of capital to innovative new companies in Tennessee that are in the early stages of development. This fund accounts for proceeds held and used to carry out the provisions of the Tennessee Small Business Investment Company Credit Act.

Other—These funds account for trust arrangements under which the principal and income benefit individuals or private organizations.

Agency Funds:

<u>Local Government Fund</u>—The purpose of the Local Government Fund is to serve as a clearing mechanism for state-shared taxes and other funds distributed to the various counties and cities of the state.

<u>Contingent Revenue Fund</u>—This fund is used to account for refundable deposits and other receipts held in trust until the state has the right to transfer them to operating funds or until there is proper authorization to disburse them directly to others.

<u>Retiree Health Funds</u>—These funds are used to account for funding received and claims paid on behalf of retirees who elect coverage. Pre- and post-65 retired employees of the state, local education, and local government employers are included.

COMPONENT UNITS

<u>Tennessee Student Assistance Corporation</u>—This fund is used to account for the guaranteed loans program administered by Tennessee Student Assistance Corporation (TSAC).

<u>Tennessee Community Services Agency</u>—In 1989, the Legislature created twelve Community Services Agencies which are to provide a mechanism to coordinate health care for indigents. In 1996, the title and focus of these agencies changed to that of facilitating the providing of services to children and other citizens from state agencies. The State has significant oversight responsibilities for these agencies, therefore, they have been incorporated into the Comprehensive Annual Financial Report. In 2009, all CSAs merged operations into one agency.

Housing Development Agency—Created by the legislature in 1973, the purpose of this agency is to improve the quality of housing available to lower and moderate income Tennesseans. This objective is accomplished in part by (1) making funds available for loans for residential construction or rehabilitation, (2) making or participating in the making of insured mortgage loans and (3) purchasing existing mortgages from lending institutions. These programs are funded primarily from the sale of revenue bonds or notes.

<u>Tennessee Education Lottery Corporation</u>—Created by the General Assembly in 2003, the purpose of the corporation is to operate a state lottery with net proceeds to be transferred to the State to be used for education programs and purposes in accordance with the Constitution of Tennessee, consisting primarily of financial assistance to Tennessee citizens to enable such citizens to attend post-secondary educational institutions within Tennessee.

<u>Tennessee Board of Regents</u>—The Tennessee University and Community College System was created by the General Assembly in 1972. Its member institutions (six universities, thirteen community colleges, and twenty-seven technology centers) serve the state and its citizenry by providing education opportunities, research, continuing education and public activities. As a system, the institutions span the state and operate as a coordinated network of public education with each campus offering unique characteristics and services. The system consists of the following institutions:

UNIVERSITIES

Austin Peay State University, Clarksville East Tennessee State University, Johnson City Middle Tennessee State University, Murfreesboro Tennessee State University, Nashville Tennessee Technological University, Cookeville University of Memphis, Memphis

COMMUNITY COLLEGES

Chattanooga State Technical Community College, Chattanooga Cleveland State Community College, Cleveland Columbia State Community College, Columbia Dyersburg State Community College, Dyersburg Jackson State Community College, Jackson Motlow State Community College, Tullahoma Northeast State Technical Community College, Blountville

Nashville State Technical Community College, Nashville Pellissippi State Technical Community College, Knoxville Roane State Community College, Harriman Southwest Tennessee Community College, Memphis Volunteer State Community College, Gallatin Walters State Community College, Morristown

TECHNOLOGY CENTERS

Athens	Crump	Hartsville	Knoxville	Memphis	Newbern	Ripley
Chattanooga	Dickson	Hohenwald	Livingston	Morristown	Oneida	Shelbyville
Covington	Elizabethton	Jacksboro	McKenzie	Murfreesboro	Paris	Whiteville
Crossville	Harriman	Jackson	McMinnville	Nashville	Pulaski	

The purpose of the technology centers is to provide occupational and technical training for current and future employees of existing and prospective industries and businesses of this state.

<u>The University of Tennessee Board of Trustees</u>—The University of Tennessee was first established in 1794 by the Legislature of the Federal Territory. Since that time, it has grown into an institution of twenty-four different colleges and schools. The locations of its four

primary campuses, various experimental stations and extension services have made the university state-wide in physical presence as well as in services. The main campus is located in Knoxville. The other primary campuses are located in Memphis, Martin and Chattanooga.

<u>Local Development Authority</u>—This authority was created in 1978 for the purpose of providing to local governments, through the issuing of revenue bonds or notes, the financing assistance previously provided by the State Loan Program. The Authority has also issued bonds to assist non-profit corporations in the construction of mental health, mental retardation, or alcohol and drug facilities. In addition, the Authority may assist small business concerns in financing pollution control facilities, farmers in financing certain capital improvements and airport authorities and municipal airports in financing improvements.

<u>Veterans' Homes Board</u>—Created in 1988, the primary purpose of the homes is to provide support and care for honorably discharged veterans of the United States Armed Forces. The revenue sources are the Veterans' Administration, Medicaid, and a user fee.

Tennessee State School Bond Authority (TSSBA)—Established in 1965, the TSSBA provides a mechanism for financing building projects for the state's universities. Agreements are executed between the governing boards of the institutions and the TSSBA, and revenue bonds are issued using the constructed facilities as collateral. Charges levied on the universities provide the funds necessary for payment of principal and interest on bonds. In addition, the Authority issues Qualified Zone Academy Bonds, which are part of a federal government program to finance loans to qualifying K-12 schools in the state.

<u>Certified Cotton Growers' Organization</u>—This organization was formed to aid in the eradication of the boll weevil. Revenues are collected from assessments on cotton growers and from state appropriations.

Access Tennessee—Established in 2007, this health insurance pool offers health insurance coverage to eligible citizens of the state who are considered uninsurable because of health conditions.

STATISTICAL SECTION

STATISTICAL SECTION

This part of the State of Tennessee's comprehensive annual financial report presents detailed information as a context for understanding what the information in the financial statements, note disclosures, and required supplementary information says about the state's overall financial health.

<u>Contents</u>	Page
Financial Trends These schedules contain trend information to help the reader understand how the state's financial performance and wellbeing have changed over time.	196
Revenue Capacity These schedules contain information to help the reader assess the state's most significant local revenue sources, the sales tax.	200
Debt Capacity These schedules present information to help the reader assess the affordability of the state's current levels of outstanding debt and the state's ability to issue additional debt in the future.	202
Demographic and Economic Information These schedules offer demographic and economic indicators to help the reader understand the environment within which the state's financial activities take place.	204
Operating Information These schedules contain service and infrastructure data to help the reader understand how the information in the state's financial report relates to the services the state provides and the activities it performs.	205
Component Units These schedules contain debt information related to the University of Tennessee and the Tennessee Board of Regent's institutions – component units of the state. The schedules assist in understanding the resources available to pay debt service.	207
Index Page references for Securities and Exchange Commission disclosures contained in this report.	212

Sources: Unless otherwise noted, the information in these schedules is derived from the comprehensive annual financial reports for the relevant year. The State implemented GASB Statement 34 in fiscal year ended June 30, 2002; schedules presenting government-wide information include information beginning in that year.

- (1) The increase in program revenues of the health and social services function between fiscal years 2003 and 2004 resulted from the reclassification of certain revenues from operating grants and contributions to charges for services. The effect of the decrease in operating grants and contributions was neutralized by an increase in federal funding to the Tennare program to compensate for rising healthcare costs.
- (2) The increase in expenses of the recreation and resources development function between fiscal years 2007 and 2008 resulted from the acquisition of conservation easements for wilderness protection.
- (3) The increase in expenses of the Employment Security program between fiscal years 2008 and 2009 and between 2009 and 2010 was due to a significant increase in the demand for unemployment benefits.
- (4) The significant increase in Operating grants and contributions revenue for both Governmental and Business-type activities between fiscal years 2008 and 2009 and between 2009 and 2010 was due to the increase in federal funds received as a result of the American Recovery and Reinwestment Act.

- (1) The increase in unrestricted net assets between fiscal years 2004 and 2005 is attributable, in part, to the implementation of GASB Statement 46 which caused a reduction in restricted net assets. In addition, because the state lottery was operational for only six months during fiscal year 2004, fewer funds were restricted for lottery scholarships when compared fiscal year 2005.
- (2) The increase in unrestricted net assets between fiscal years 2005 and 2006 and between 2006 and 2007 is attributable, in part, to the overall increase in the net assets resulting from governmental activities, specifically those activities associated with teh General fund, which had a \$698 million and \$662 million increase in fund balance for 2006 and 2007, respectively.
- (3) The decrease in unrestricted net assets between fiscal years 2008 and 2009 was mostly attributable to the decrease in cash and cash equivalents caused by a reduction in revenue collections from business and sales taxes and interest on investments.

(1) The increase in the fund balance of the general fund between fiscal years 2003 and 2004 resulted from higher revenue collections. A favorable economy caused increases in sales, excise, franchise, business, and income tax collections. However, expenditures in fiscal year 2004 did not increase at the same rate. The result was an increase of \$625 million in the General Fund total fund balance. A majority of the increase in the *reserved component was from the Reserve for Unencumbered Balance and the Reserve for Federal Tax Relef. The largest part of the increase in the *unreserved* component resulted in the Reserve for Supplemental Appropriations and the Reserve for Future Requirements.

(2) The increase in the fund balance of the general fund between fiscal years 2005 and 2006 and between 2006 and 2007 resulted from higher revenue collections. A favorable economy caused increases in sales, excise, and franchise tax collections.

The increase in expenditures in the Education function between 2001 and 2002 resulted primarily from implementing GASB Statement 34. Amounts reported as a transfer to component units in fiscal year 2001 were recorded as Ξ

The increase in transfers in and transfers out between 2007 and 2008 was due to transfers from the General fund to the Education Trust fund for an increase in appropriation requirements and to the Capital Projects fund for capital outlay appropriations. 6

⁽³⁾ The increase in federal revenue between 2009 and 2010 is the result of funding provided by the American Recovery and Reinvestment Act.
