

FENTANYL TEST STRIPS FENTANYL TEST STRIPS FENTANYL TEST STRIPS

We're losing too many Tennesseans to drug overdose, mostly due to fentanyl in illicit drugs and fake pills. **Your life matters**, and we want you to live to see tomorrow. That's why we're providing these fentanyl test strips.

LEGAL PROTECTIONS

Starting March 31, 2022, Tennessee Code Annotated Section 39-17-402 made an exception in drug paraphernalia for "narcotic testing equipment used to determine whether a controlled substance contains a synthetic opioid". This includes fentanyl test strips.

HELP US SAVE MORE LIVES

Please help us show that fentanyl test strips are important tools by taking a short survey. All responses are anonymous and will not be released to law enforcement. Scan the code or visit bit.ly/TN-FTS

HOW TO TEST

No test strip can detect all forms of fentanyl or test all of your substance. It is important to have naloxone (Narcan) nearby no matter the results.

MOST ACCURATE METHOD

LESS ACCURATE METHOD

1. MIX a small sample with 2 spoonfuls of water. Use more water if you're testing meth.
2. DIP the strip into the water up to the MAX line and wait for the water to absorb up to where the FYL text starts. This will take about a minute.
3. DRY: Lay the strip flat and let it dry for at least 5 minutes.

1 LINE - FENTANYL DETECTED

2 LINES - NO FENTANYL DETECTED

2 FAINT LINES - NO FENTANYL DETECTED

People who use fentanyl test strips accept all responsibility for any injury, or death that could occur after taking drugs, whether they have been tested or not tested for fentanyl.
