

RESOURCES LISTING

A Vision to Effectively End and Prevent

Homelessness in the State of Tennessee

Created by the Tennessee Interagency Council on Homelessness

WINTER 2016-17

Tennessee's State Plan to End Homelessness incorporates primary and behavioral health care services with homeless assistance programs and housing to reduce people's vulnerability to and the impacts of homelessness. The following resources are available to Tennessee's most vulnerable populations.

Health Department Clinics

Each county in Tennessee has at least one Health Department, depending on the size of the county. Services within each health department vary. Every health department provides preventive care such as immunizations, WIC (Women, Infants, and Children), screenings and physicals for children, communicable disease services, home visiting/case management services, etc. Some health departments may also provide primary and/or dental care. Service charges are based on family size and income. No one is turned away, even if they are unable to pay for services.

In addition to services within the health department facilities, each health department employee is charged with going into the community to encourage healthy lifestyles and behaviors through the Department's Primary Prevention Initiative. Health department staffs are available to go out into the community to meet with community groups, conduct educational sessions and workshops, coordinate activities, etc. Entities or organizations desiring health department staff's assistance in providing education should contact their local health department.

Faith Based Clinics

Faith based clinics are typically not-for-profit entities providing primary or dental care on a sliding fee scale, flat fee, reduced cost, or free. Faith-based clinics are funded through a variety of sources including private donations, federal and state funds, etc., and focus on underserved populations with limited resources or in areas with a lack of providers.

Community Health Centers

Community Health Centers are community-based, patient-driven organizations that serve populations with limited access to health care. Health centers deliver care to the Nation's most vulnerable individuals and families including low-income populations, the uninsured, those with limited English proficiency, migrant and seasonal farmworkers, individuals and families experiencing homelessness, and those living in public housing. Community Health Centers deliver comprehensive, culturally competent, high-quality primary health care services. Health centers also often integrate access to pharmacy, mental health, substance abuse, and oral health services in areas where economic, geographic, or cultural barriers limit access to affordable health care services.

Mental Health Services

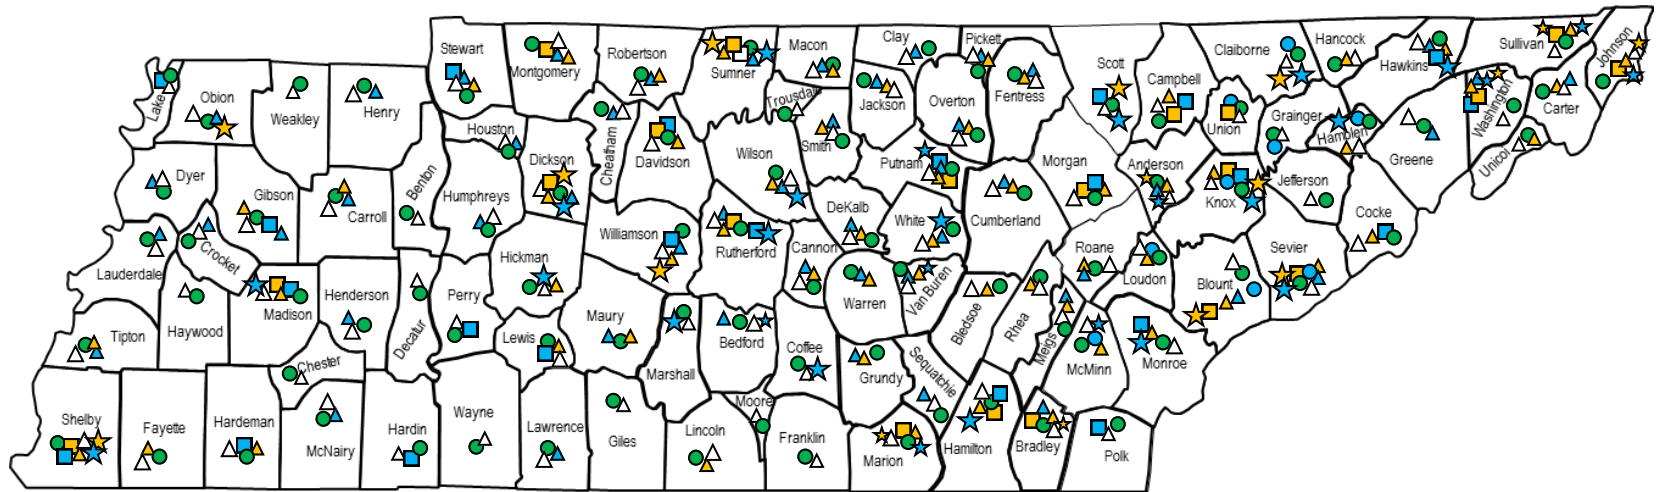

Tennessee has a network of mental health services for individuals and families dealing with mental health and substance abuse issues. If an individual is 19 years of age or older, a resident of Tennessee with a household income at or below 100% of the FPL, have a qualifying primary mental health diagnosis, and has no behavioral health insurance, they may qualify for the Behavioral Health Safety Net of TN (BHSN of TN) program. Services provided by this program include assessment, evaluation, diagnostic, therapeutic intervention, case management, peer support services, psychosocial rehabilitation services, psychiatric medication management, labs related to medication management and pharmacy assistance, and coordination. For more information regarding the BHSN of TN, visit: <http://www.tn.gov/behavioral-health/topic/behavioral-health-safety-net>. Facilities provide compassionate, prompt and effective treatment. Regardless of the complexity of the situation, individuals will not have to travel far to get the treatment and support they need to live a full and productive life.

Additional support is available for individuals and families in crisis. Confidential help from anywhere in Tennessee is only a phone call away at the state's toll-free Crisis Line 24 hours a day, 7 days a week 1-855-274-7471 or by dialing 911.

The following guide highlights resources available throughout each county in Tennessee.
