

Tennessee Early Learning Developmental Standards

Guiding Principles for the Tennessee Early Learning Developmental Standards

- **All children are capable of learning, achieving, and making developmental progress.**

The Early Learning Developmental Standards (ELDS) are intended for all children regardless of economic, linguistic, and cultural differences and/or physical, learning, and emotional challenges.

- **Children develop at different rates and each child is unique in his or her own development, growth, and acquisition of skills.**

Individualized, appropriate, and reasonable supports and accommodation must be provided to close the achievement gap and promote school readiness for all children.

- **Early experiences** have both cumulative and delayed effects on individual children's development; optimal periods exist for certain types of development and learning.

- **Four-year-old children are active, eager learners.**

A primary approach to learning is through purposeful, inquiry-based play. Optimal learning environments invite children's participation through hands-on, experiential exploration using all five senses. Four-year-olds are concrete learners who learn best through interactions with people and educational materials in multiple, varied contexts.

- **Development advances** when children have opportunities to practice newly acquired skills and when they experience a challenge just beyond the level of their present mastery, known as the zone of proximal development.

- **Multi-dimensional development is essential for optimal brain growth.**

Children's learning is integrated and occurs simultaneously across all developmental domains, which are interrelated and interactive with one another. Children's brain growth and cognitive development is accelerated when early education is focused and balanced among all eight areas of development included in the revised TN ELDS.

- **Children learn** in the context of interactions and relationships with family members, caregivers, teachers, other children, and adults in their immediate environment and greater community.

- **The family is the most significant contributor to children's lifelong learning and development.** Engaging families in the early education of their children is essential to continuing children's success in the elementary classroom and later learning.

Unpacking the Standards

Steps toward Effective Implementation

In order to plan for effective daily instruction that aligns with the expectations of the standards, it is important to begin with a clear understanding of what standards are asking students to learn and be able to do. To do so, teachers should “unpack” the standards in the following way:

1. Write the learning standard;
2. Identify what children need to know—knowledge/concepts—List the nouns and noun phrases
3. Identify what the children need to do—List the verbs and verb phrases;
4. Connect each verb with Bloom’s taxonomy:
 - a. Low: Remember and Understand
 - b. Middle: Apply and Analyze
 - c. High: Evaluate and Create
5. Consider
 - a. The sequencing of learning goals—what comes before or right after this skill?
 - b. Are there any vocabulary words which need to be identified or clarified?
 - c. What prior knowledge and skills are needed to master this learning goal?
6. Determine the ‘I Can’ statements—one for each—Laying a foundation, Mastery, and Going Beyond; and
7. Ideally, illustrate these statements for the learner.
