# MEMORANDUM

- **TO:** TACIR Commission Members
- FROM: Harry A. Green Executive Director
- **DATE:** September 16, 2008

#### **SUBJECT:** Bridge Conditions and Needs

Concern about bridge safety heightened across the country in the wake of the disaster last year in Minneapolis. As a result, TACIR staff is taking a closer look at the information in our public infrastructure needs inventory and additional information from the Department of Transportation. TACIR staff worked with the Department of Transportation this past year to obtain additional bridge condition and need data. This data will be included in the July 2007 inventory that is near the final stages of review by TACIR staff, the inclusion of this data will significantly increase the amount of bridge needs reported.

Bridge needs identified by local officials for the inventory covering the period of July 2006 through June 2027 totals \$851 million. This is a \$63 million increase from the needs reported for the July 2002 inventory. These reported needs are expected to increase with the 2007 inventory because of additional data received from the Department of Transportation. The county with the largest bridge need in dollar terms is Shelby County, which totaled nearly \$165 million for the July 2006 inventory. This amount includes \$55 million for the I-40 Bridge over the Mississippi River.

Attachment A is a summary of the estimated cost of all bridge needs in the Public Infrastructure Needs Inventory organized by county. These needs are from the July 2002 and July 2006 inventories. The first two columns, July 2002 needs, show the amount of the 2002 needs that have been completed and the amount that is still a need in July 2006. The last column is the estimated cost of the needs identified since 2002, reported for the July 2006 inventory. The table on the following page contains the statewide totals from Attachment A.

#### Total Estimated Cost of Bridge Needs July 2002 through June 2023 and July 2006 through June 2027

July 2002	July 2006 Needs	
Completed Before July 2006	Still Needed in July 2006	Identified After July 2002
\$198,477,342	\$495,558,579	\$355,574,530

Attachment B presents information provided by the Tennessee Department of Transportation listing the estimated costs to replace, widen, or rehabilitate all bridges rated structurally deficient or functionally obsolete for 2007. This data is presented in six separate tables organized by system (owned, operated or maintained by the state) and on-system (owned, operated or maintained by local governments) and by type of need, and summarized by county and region.

Attachment C is a map comparing Tennessee to its neighbors in percentage and number of structurally deficient bridges. Tennessee has the second lowest, after Florida, percentage of bridges that are structurally deficient. This does not include bridges considered functionally obsolete. The term structurally deficient means there is a part of the bridge's structure that needs repair or replacement. Functionally obsolete status indicates that the bridge has inadequate width or vertical clearance for its associated system.
