

SD2 Instructions

The SD2 is required for all injuries on after July 1, 2014 **every time** a settlement is presented. Multiple SD2s will be filed for one claim if there are multiple settlement hearings. For example: for the payment of an original award at the first settlement hearing, the payment of increased benefits at a second settlement hearing, and a closure of medical benefits at a third settlement hearing.

SD2 forms reflect only the benefits being paid for the **present** settlement agreement. They do not reflect the cumulative total of amounts paid in earlier settlements.

Submit separate orders, agreements and SD2 forms when settling multiple claims for the same injured worker at the same hearing. Each claim has a separate State File Number, and each requires its own set of documents. A filing fee is due for each individual claim.

The latest versions of the Order and Agreement templates are [here](#). The SD2 is [here](#).

We prefer that the SD-2 be typewritten. If handwriting is required, clearly print in black or blue ink.

Fully complete the form, enter a response on every field, or mark Yes, No, or N/A. Complete dates in the format mm/dd/yyyy.

A C20 First Report of Injury must be filed electronically before the settlement hearing. It is not necessary to include a copy of the C20 with the settlement documents, but the date of injury and social security number should match on both the C20 and the settlement documents. If this information does not match, the insurance carrier or third-party administrator must either file a corrected C20 (SROI) to match the settlement documents or the attorney must amend the settlement documents to match the C20.
