

Going Forward

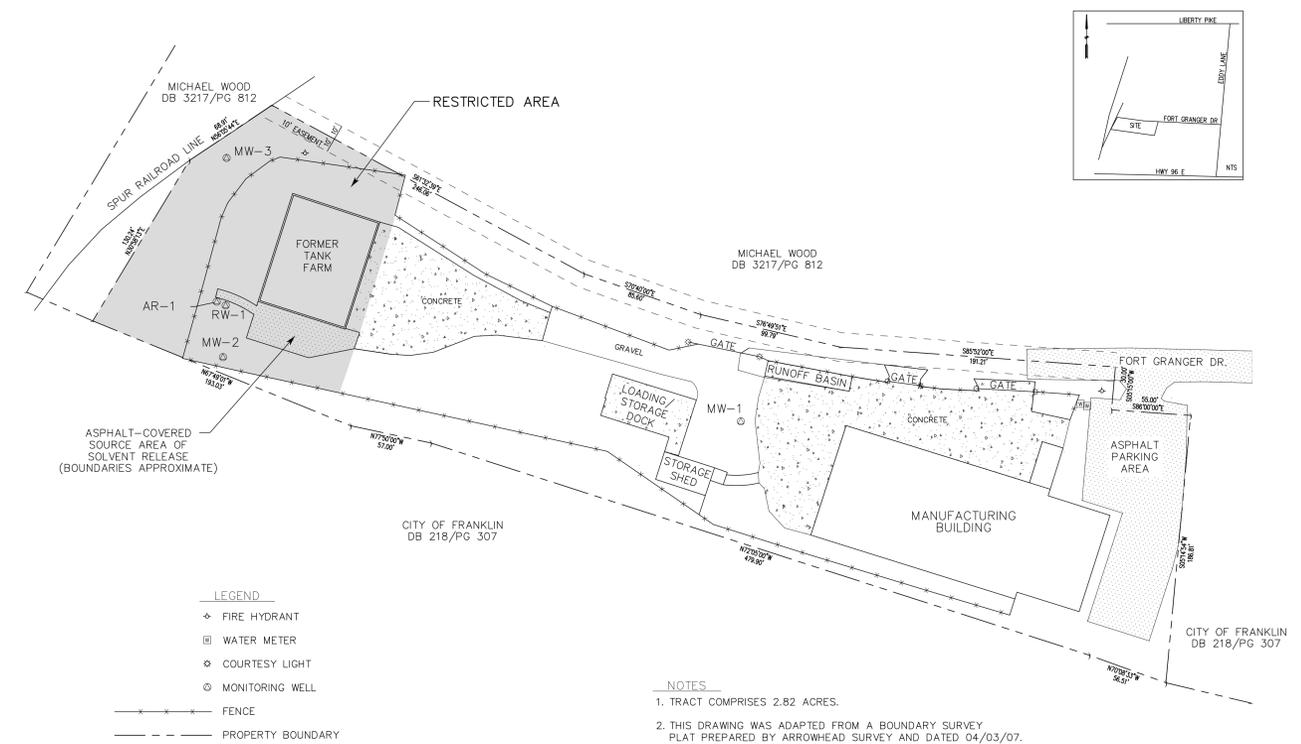

No Additional Active Remediation Necessary

- No unacceptable risk to human health or environment
- No unacceptable future risk unless site conditions change
- Natural biodegradation continues to occur as verified by data

Proposed Future Response Actions Limited To:

- Continued monitoring of groundwater and surface water
- Land use restrictions on western portion of ELMCO property (around source area)

TDEC Oversight Continues

- Periodic evaluation of monitoring data and site conditions
- Additional work may be required if needed
