

Asbestos Management 101

Know your Regulations
and Best Practices

April 21, 2016

Presenter:

Pete Frederick, CIEC

National Technical
Expert

- 25 years experience in regulated building materials consulting, specializing in asbestos
- Extensive experience with US and international asbestos regulations
- Developed and implemented several national and international asbestos management programs
- Subject Matter Expert
- Quality Director

Lexington, KY

Today's Discussion

- Risks of asbestos for both building owners and employers
- Asbestos is present in most buildings and structures in the United States, even potentially those constructed recently
- Regulations are written to account for this fact, and therefore asbestos is an important compliance risk that should and can be managed properly

Why is Asbestos Still a Concern Today?

Why Do I Need an Asbestos Survey?

When are Asbestos Surveys Required?

What Could Happen if I Don't do a Survey?
