

# Cross Connection Control Basic Workshop

Fleming Training Center  
Course # 2103

## Who should attend?

Individuals working in water systems who are involved in backflow prevention programs, plumbers, employees of industries and institutions, irrigation personnel, and fire protection system personnel.

## Course Description

The course will give individuals an understanding of how backflow occurs and how backflow and cross connection hazards can be prevented or corrected. The individuals will also learn procedures for testing [Double Check Valve](#) and [Reduced Pressure Backflow Prevention](#) Assemblies.

## Major Topics Include

- Causes of backflow
- Proper installation of backflow devices
- Choosing the proper device
- Recordkeeping
- Testing RPBP and Double Check Valve assemblies.

## Course Materials

Please bring a highlighter, three ring binder, and pens or pencils to class.

Individuals are encouraged to bring a calibrated 3-valve or 5-valve test kits to class, and these may be used for the practical exam. Test kits will be available at the training center, as well for those that need them.

## Course Length

The course is three (3) class days.

## Experience Credit

Three (3) months for Grades 1-4 for all certifications.

## Continuing Education

Approved for up to twelve (12) hours of continuing education credit for all **certified** operators.

## Certification Issued

Individuals who successfully complete the written and practical exams will be issued a Certificate of Competency in testing backflow prevention devices.

## Fees:

\$335.00 for class and test

***If you are a full-time employee of a Tennessee public water system, your fee is only \$60.***
