ACCRA Cost-of-Living Index- Third Quarter 2011

The American Chamber of Commerce Researchers Association (ACCRA) Cost-of-Living Index is a quarterly report that is designed to measure the relative differences among urban areas in the cost of consumer goods and services appropriate for professional and managerial households. This Index compares costs of a particular standard of living in all areas. It does not matter whether that standard of living is typical of the overall population in a particular area. This is accomplished by collecting the costs of uniform products/services in all areas. These data are published by the Council for Community and Economic Research (C2ER).

Methodology

The data are for urban areas whose chambers of commerce have agreed to participate in a survey. The average of all participating cities equals 100.0, and each participant's index is read as a percentage of the average for all places. The index does not measure inflation (price change over time) because each quarterly report is a separate snapshot of prices at a single point in time.

Staffs from local chambers of commerce conduct these cost surveys on a volunteer

basis in their particular area. This is why not all metropolitan areas report in every quarter. These data are a snapshot of costs at a particular time. Index data from different quarters cannot be compared, and the ACCRA Cost-of-Living index does not measure changes over time.

While items seem self-descriptive for most categories, the miscellaneous goods and services grouping needs to be enumerated because of the vagueness of the heading and the weight carried (33.1 percent). This category includes men's clothes and underwear, fast food items, health and beauty items, dry cleaning, major appliance repair, newspapers, entertainment, and alcoholic beverages.

Taxes, both state and local, are an integral part of the cost-of-living and vary widely between state and metro areas. Due to the multiplicity of state and local taxes, taxing jurisdictions, and assessment procedures, the ACCRA leadership felt it was not feasible to measure taxes levied on real and intangible property, retail sales, and income.

The Data

The data provided on page

two include local urban areas as well as some of the high and low indices in each sub-category. In this small sampling the highest and lowest costs by group are Grocery Items: New York (Manhattan) (148.8) and Harlingen, Texas (79.5); Housing: New York (Manhattan) (413.0) and Nashville-Franklin, Tennessee (71.0); Utilities: Honolulu, Hawaii (158.5) and Murfreesboro-Smyrna, Tennessee (83.0); Transportation: Honolulu, Hawaii (125.9) and Knoxville, Tennessee (84.4); Health Care: New York (Manhattan) (127.0) and Birmingham, Alabama (83.3); and Miscellaneous Goods and Services: New York (Manhattan) (144.0) and Harlingen, Texas (77.6).

ACCRA Cost-of-Living Index annual subscriptions are \$165 while single issues are \$82.50 per copy. Electronic subscriptions (in Excel) are also available. To purchase the entire cost-of-living survey and other products provided write to C2ER, P.O. Box 100127, Arlington, VA 22210 or visit their Web site at www.c2er.org. Special thanks go to Ms. Ramay Winchester at Retire Tennessee. You can get more information on their Web site at www.retiretennessee.org.

How to use the ACCRA Cost-of-Living Index: Assume that City A has a composite index of 98.3 and City B has a composite index of 128.5. If you live in City A and are contemplating a job offer in City B, how much of an increase in your after-tax income is needed to maintain your current lifestyle? $100 * \{(City\ B - City\ A) / City\ A\} = 100 * \{(128.5 - 98.3) / 98.3\} = 100 * (.3072) = 30.72\%$, or about a 31% increase. Conversely, if you are considering a move from City B to City A, how much of a cut in after-tax income can you sustain without reducing your present lifestyle? $100 * \{(City\ A - City\ B) / City\ B\} = 100 * \{(98.3 - 128.5) / 128.5\} = 100 * (-.235) = -23.5\%$, or about a 24% reduction.

NONFARM EMPLOYMENT AND LABOR FORCE IN TENNESSEE

Total nonfarm employment increased by 31,200 jobs from December 2010 to December 2011. This includes seasonal increases in local government educational services (up 11,200 jobs); mining/logging/construction (up 7,100 jobs); professional/business services (up 6,600 jobs), which includes increases of 5,900 jobs in administrative/support/waste management and 1,200 jobs in management of companies/enterprises; food services/drinking places (up 3,700 jobs); health care/social assistance (up 3,500 jobs), which includes increases of 3,100 jobs in nursing/residential care facilities and 1,700 jobs in ambulatory health care services; transportation equipment manufacturing (up 3,300 jobs); machinery manufacturing (up 2,300 jobs); and fabricated metal products (up 2,200 jobs). This was partially offset by decreases in retail trade (down 3,800 jobs), which includes a decline of 1,400 jobs in gasoline stations; wholesale trade (down 1,800 jobs), which includes a drop of 1,500 jobs in wholesale trade nondurable goods; and information (down 1,300 jobs).

During December, nonfarm employment decreased by 4,700 jobs. This included seasonal declines in leisure/hospitality (down 3,500 jobs), which includes drops of 2,100 jobs in accommodation/food services and 1,400 jobs in arts/entertainment/recreation; state government (down 2,600 jobs); mining/logging/construction (down 1,900 jobs); and educational/health services (down 1,700 jobs), which includes decreases of 1,000 jobs in educational services and 800 jobs in nursing/residential care facilities. This was offset by an increase in professional/business services (up 5,400 jobs), which includes increases of 3,000 jobs in administrative/support/waste management and 2,200 jobs in professional/scientific/technical services.

Tennessee's seasonally adjusted estimated unemployment rate for December 2011 was 8.7 percent, down 0.4 percentage point from the revised November 2011 rate. The last time the unemployment rate was lower was in December 2008.

The United States unemployment rate was 8.5 percent in December 2011. In December 2010, the national and state unemployment rates were both 9.4 percent.

Across Tennessee, the unemployment rate decreased in 56 counties, increased in 27 counties, and remained the same in 12 counties. There were 55 counties with an unemployment rate less than 10 percent of which nine had a rate below 7 percent, and two counties had a rate at or above 15 percent. In December, the lowest rate occurred in both Williamson and Lincoln counties at 5.4 percent. Williamson declined by 0.4 percentage point and Lincoln was down by 0.2 percentage point from the previous month. The highest rate was Scott County's 18.8 percent, up from 17.5 percent in November 2011.

The data from all the nonfarm employment estimates tables include all full- and part-time nonfarm wage and salary employees who worked during or received pay for any part of the pay period that includes the 12th of the month. This is a count of jobs by place of work. Agricultural workers, proprietors, self-employed persons, workers in private households, and unpaid family workers are excluded. These numbers may not add due to rounding. Data is based on the 2010 benchmark.

Total nonfarm employment decreased by 400 jobs from November 2011 to December 2011. There were seasonal declines in both leisure/hospitality (down 500 jobs) and trade/transportation/utilities (down 200 jobs). There were small increases (under 100 jobs) in many industries to offset the larger losses.

During the past 12 months, nonfarm employment increased by 1,500 jobs. During that time, goods-producing jobs increased by 200, while service-providing jobs increased by 1,300.

Knoxville MSA –Anderson, Blount, Knox, Loudon, Union

Total nonfarm employment increased by 400 jobs from November 2011 to December 2011. There were seasonal increases in professional/ business services (up 600 jobs) and durable goods manufacturing (up 300 jobs). This was partially offset by declines in state government (down 400 jobs) and retail trade (down 200 jobs).

Over the past 12 months, nonfarm employment increased by 5,700 jobs. During that time, goods-producing jobs increased by 2,600, while service-providing jobs increased by 3,100.

Total nonfarm employment increased by 3,700 jobs from November 2011 to December 2011. There were seasonal increases in professional/business services (up 3,700 jobs), which includes an increase of 1,900 jobs in administrative/support/waste management and 1,800 jobs in professional/scientific/technical services; and mining/logging/construction and educational/health services (both up 200 jobs). This was partially offset by seasonal declines in retail trade (down 1,100 jobs), state government (down 700 jobs), leisure/hospitality and nondurable goods manufacturing (both down 300 jobs) and wholesale trade and other services (both down 200 jobs).

During the past 12 months, nonfarm employment increased by 16,700 jobs. During that time, goods-producing jobs increased by 1,600, while service-providing jobs increased by 15,100.

Total nonfarm employment decreased by 4,100 jobs from November 2011 to December 2011. There were seasonal declines in educational/health services (down 1,200 jobs), which includes drops of 600 jobs in both health care/social assistance and educational services; leisure/hospitality (down 1,100 jobs); administrative/support/waste management (down 800 jobs); professional/scientific/technical services and financial activities (both down 600 jobs); mining/logging/construction (down 300 jobs); and state government (down 200 jobs). This was partially offset by increases in local government (up 300 jobs) and other services and information (both up 200 jobs).

During the past 12 months, nonfarm employment increased by 3,700 jobs. During that time, goods-producing jobs increased by 2,900, while service-providing jobs increased by 800.
