

Tennessee Higher
Education Commission

Off-Campus Locations Report

Fall 2014

April 15, 2015

Tennessee Higher Education Commission

2014 – 2015 COMMISSION MEMBERS

Mr. Evan Cope, **Chair**, Murfreesboro, 4th Congressional District

Mr. Robert Fisher, voting student member, UT Chattanooga

Mr. Tre Hargett, Secretary of State

Ms. Sharon L. Hayes, **Vice-Chair**, Brownsville, 8th Congressional District

Dr. Sara Heyburn, non-voting ex-officio, Executive Director,
State Board of Education

Mr. Jon Kinsey, Chattanooga, 3rd Congressional District

Ms. Pam Koban, Nashville, 5th Congressional District

Mr. Bill Lee, Franklin, 7th Congressional District

Mr. David H. Lillard, Jr., State Treasurer

Mr. Alex Martin, non-voting student member, TTU

Ms. Pam Martin, Mt. Juliet, 6th Congressional District

Ms. Mintha E. Roach, Knoxville, 2nd Congressional District

Mayor A C Wharton, **Secretary**, Memphis, 9th Congressional District

Mr. Justin P. Wilson, State Comptroller

Mr. Keith Wilson, **Vice-Chair**, Kingsport, 1st Congressional District

EXECUTIVE SUMMARY

- In fall 2014, all public two- and four-year institutions (with the exception of the University of Tennessee Health Science Center) and 15 of the 27 Tennessee Colleges of Applied Technology (TCATs) offered for-credit courses at off-campus locations (**Tables 2, 3**).
- Community colleges account for more than 64 percent of the total number of off-campus locations, and represent the largest share (37 percent) of the duplicated off-campus headcount (**Table 5**).
- Total enrollment at universities and community colleges decreased by 2.7 percent from fall 2013 to fall 2014.¹ The pattern is similar for off-campus locations: the overall off-campus duplicated headcount decreased from 54,567 in 2013 to 52,378 students in 2014, a decrease of 4 percent (**Table 5**). Duplicated off-campus headcount decreased by 8.1 percent at TCATs and 7 percent at UT universities (**Table 5**).
- The institutions with the largest portions of their student population at off-campus locations are Motlow State Community College (65.3 percent), Roane State Community College (64.9 percent), Tennessee College of Applied Technology - Pulaski (58.9 percent), Walters State Community College (49.7 percent), Dyersburg State Community College (49.6 percent), and Tennessee College of Applied Technology - Dickson (45.2 percent). (**Table 1**).
- In each public postsecondary sector, with one exception, off-campus locations account for a greater share of headcount enrollment than full time equivalent enrollment (FTE), suggesting that students typically utilize off-campus locations on a part-time or as-needed basis. The inverse is true, however, among the Colleges of Applied Technology, where it appears that off-campus locations are integral to student training programs.

OFF-CAMPUS LOCATIONS REPORT

Off-campus locations play an important role in higher education throughout Tennessee. They meet the needs of Tennesseans who cannot take advantage of services provided on main campus locations, making higher education accessible to a greater number of students. It is the responsibility of the Tennessee Higher Education Commission to review and approve any new off-campus locations. The specific charge in T.C.A. § 49-7-202(c)(9) states that the Commission shall:

Review and approve or disapprove any proposals by an existing higher education institution to establish a physical presence at any location other than its main campus, or to extend an existing location that will be utilized for existing administrative purposes or to offer courses for which academic credit is offered... The Commission shall develop policies and procedures governing this process outlined in this subdivision. This subdivision (c)(9) shall apply to state colleges of applied technology.

It is first important to differentiate between an off-campus *center* and an off-campus *site*. An off-campus *center* must meet the following criteria:²

1. There is a continuing administrative presence, as evidenced by at least one full-time or part-time administrator housed on location, but with the institution's executive personnel housed on another campus;
2. Courses are offered every semester and there is at least one academic program fully available on location; and
3. The physical facility must be either (1) owned by the institution, (2) leased by the institution, (3) owned by another public institution of higher education, or (4) provided at no cost to the institution.

An off-campus *site* or *teaching site* is not required to meet any of the above criteria, and is a physical space often used for *credit enrollment only*. Typical offerings at off-campus sites include dual enrollment courses at high schools, workforce training opportunities, and/or other short-term, specific instructional needs.

² Definitions of off-campus *centers*, *sites*, and *teaching sites* pursuant to THEC academic policy #1.4.20. A complete listing of THEC's academic policies related to off-campus instruction is available at: http://tn.gov/thec/Divisions/PPR/policy/off_campus.

Locations

Students taking credit-bearing courses enrolled at 37 off-campus *centers* and 413 *sites* during the fall of 2014 (**Figure 1**). The total number of sites and centers enrolling at least one student in a credit-bearing course stayed roughly the same, increasing from 448 in fall 2013 to 450 in fall 2014 (**Figure 2**). Tennessee Board of Regents (TBR) universities were the only sector that experienced a noteworthy increase in the total number of off-campus locations; an 8.8 percentage point increase (8 off-campus locations) since fall 2013. The number of off-campus locations sponsored by Tennessee Colleges of Applied Technology (TCATs) and community colleges was largely unchanged (**Table 4**).

Headcount Enrollment

Duplicated headcount enrollment is reported because student participation at an off-campus location also requires that they be enrolled at the main campus. The total off-campus duplicated headcount across all sectors fell by 4 percentage points from fall 2013 (**Table 5**). During the fall of 2014, off-campus locations served 52,378 students, representing 19.2 percent of student enrollment in public higher education for the semester (**Table 5**). Thirty-seven percent of community college students enrolled in courses at an off-campus location. TCATs, TBR universities, and UT universities enrolled 11.7 percent, 10.4 percent, and 2.7 percent of their students at off-campus locations, respectively (**Table 5**).

Full-Time Equivalent (FTE) Enrollment

Not all institution types employ the same method to calculate full-time equivalent (FTE) enrollment. Community colleges and universities divide the total number of undergraduate credit hours by all students enrolled in a given semester by 15, the minimum number of credit hours necessary to be considered full-time. Similarly, TCATs sum the total number of contact hours and divide by 900.

Off-campus locations constituted 13.2 percent of overall for-credit FTE enrollment in fall 2014 (**Table 6**). Off-campus enrollees were less likely to be full-time students, as indicated by differences in their proportions of FTE enrollment (13.2 percent) and total enrollment (19.2 percent) (**Tables 5, 6**). Of note, more students enrolled full-time at community college off-campus locations than at those of any other institution type, with 32 percent of total community college full-time equivalent enrollment occurring off-campus (**Table 6**).

Notable Institutions

The proportion of institutional duplicated headcount enrolled at off-campus locations ranged from 0.6 percent at the University of Tennessee, Knoxville, to 65.3 percent at Motlow State Community College (**Table 2**). Several other institutions enrolled a significant portion of their total duplicated headcount at off-campus locations: Motlow State Community College (65.3 percent), Roane State Community College (64.9 percent), Tennessee College of Applied Technology - Pulaski (58.9 percent), Walters State Community College (49.7 percent), Dyersburg State Community College (49.6 percent), and Tennessee College of Applied Technology - Dickson (45.2 percent). These institutions have historically enrolled a high percentage of students at off-campus locations (**Table 1**). These high rates of off-campus enrollment may be attributed to industry partnerships, location-specific courses, and course offerings that are more amenable to adult students' schedules.

All community colleges and public institutions, excluding the University of Tennessee Health Science Center, offered courses at off-campus locations during the fall of 2014 (**Table 2**). Additionally, 15 of the 27 TCATs enrolled students at off-campus locations during the term (**Table 3**). Among universities, the University of Memphis and East Tennessee State University had 32 and 22 off-campus locations, respectively. University of Tennessee, Martin led the UT system in off-campus locations with 11. Among community colleges, Roane State and Jackson State Community Colleges operated the largest number of off-campus locations in fall 2014, with 38 and 37 locations, respectively (**Table 2**).

Summary

Off-campus locations continue to serve an integral purpose in Tennessee's higher education system. They provide opportunities for dual enrollment courses, offer courses that cannot be pragmatically delivered on a main campus, and broaden the geographic presence of higher education. Off-campus locations also offer schedules and industry-specific learning environments that attract returning students seeking to begin or advance their careers, making postsecondary education and training more accessible for all Tennesseans.
