TENNESSEE CONTROLLED SUBSTANCE DATA COLLECTION MANUAL

In accordance with Tennessee Annotated Code §53-10-301, et seq., the Tennessee Department of Health has established a program to monitor the prescribing and dispensing of Schedules II, III, IV & V controlled substances. Beginning 1/1/2016 Tennessee Code Annotated, Section 53-1 0-305(b)(2), states the information required to be submitted to the database shall be submitted "each business day but no later than the close of business on the following business day; provided, that a veterinarian shall submit information at least once every fourteen (14) days."

SUBMITTING THE DATA

Dispensers will report the required dispensing information as defined in Tenn. Code Ann.

§53-10-305 and by Rule to Bamboo Health. Bamboo Health, a private contractor, working on behalf of Tennessee will collect all required data and manage the technical aspects of the program.

For assistance please see the <u>Assistance and Support section</u> of this document.

Such reporting without individual authorization by the patient is allowed under HIPAA, 45CFR

§ 164.512, paragraphs (a) and (d). The Tennessee Board of Pharmacy is a health regulatory agency and Bamboo Health is acting as an agent of Tennessee Board of Pharmacy in the collection of these data.

Current required format is ASAP 4.2A (June 2017 version). If dispenser is not compliant, please contact the CSMD at CSMD.Admin@tn.gov or 615-253-1305 to discuss the dispenser's situation.

REPORTING PROCEDURES and FILE TYPES

All controlled substances contained in Schedules II, III, and IV which are dispensed, and all Schedule V controlled substances identified by the Controlled Substance Monitoring Database (CSMD) Committee as demonstrating a potential for abuse must be reported. Tenn. Code Ann. § 53-10-304(d). As of January 26, 2022, Schedule V controlled substances which may be dispensed without a prescription do not have to be reported to the database.

All dispensers licensed by the State of Tennessee that dispense Schedules II-V controlled substances are required to submit the information by one of the following data submission methods.

Website Upload/Prescription File Uploads

The user must use the login credentials provided to sign into the user account at the following website: www.tnrxreport.com. You may also register for account access at this website.

This secure website address is provided for uploading data to the TN Data Collection website, which utilizes 256-bit encryption. Dispensers can access the secure website via a web browser.

Please inform the software vendor submitting on dispenser's behalf that the dispenser's data must be in the ASAP 4.2A format (June 2017 version) as a .dat or .txt file.

The dispenser's file will need to be named according to the following rules: Dispenser DEA Number, the date submitted, followed by .dat or .txt. **Note**: The file extension is not case-sensitive and may be submitted as either ".DAT" | ".TXT" or ".dat" | ".txt"

Therefore, if the Dispenser DEA number is AB1234567 and the dispenser is submitting on April 1, 2013, the file name would look like this: *AB1234567040113.dat*.

Please name dispenser files accordingly when submitting controlled substance prescription information

to TN. This will assist the dispenser with keeping accurate records of the information reported to TN Data Collection and will assist with locating this information in a timely and efficient manner, should this be necessary.

Uploading Dispenser file

Create a file using the pharmacy software and save it to a computer's hard drive.

Login to <u>www.tnrxreport.com</u> with username and password.

Go to the <u>Data Collection menu</u> > Choose "<u>File Upload" from the dropdown menu</u>. <u>Click "Browse" or "Choose File"</u> to locate the file.

Highlight the File, then <u>Click Open</u> (the file will populate in the File Name field.)

Click "Upload" to send the file to TN Data Collection.

Confirmation will appear at the top of the window indicating the file was uploaded successfully and the file will be processed by the batch processor within 24 hours.

Once the batch processor has processed the file, you will be notified via the message center and email. A valid email address must be provided.

All uploaded files and file status may be viewed on the "View Uploaded files" tab on the File Upload page. This page will show a history of all files submitted to the program, their status, and any errors contained within the file. Corrections may also be made via the View

Uploaded Files tab. (See the section "Errors and Corrections".)

SFTP Transfer - Dispenser

If a dispenser will be submitting the prescription files automatically through a dispenser software via SFTP transmission, please go to www.tnrxreport.com and register. The information in the registration should be that of the individual who will be setting up the SFTP, submitting the files and responsible for error correction. During registration select in the form that a SFTP account is needed.

When the Data Collection account is approved, the individual who registered at the dispensing site will receive two (2) sets of credentials, one for access to the Data Collection application and the other set of credentials to use for the SFTP server. The registered individual, if using a software company to submit dispensations will need to provide the SFTP credentials to that software company to assist in setup to submit files.

Please use the below information to connect to the SFTP server: Host: www.tnrxreport.com

Port: 22 (SFTP), 991 (FTPS Implicit) or, 21 (FTPS Explicit) Please note: Not all pharmacy software systems can submit prescription data via a SFTP connection. Please contact your software company used for the dispensing site to determine the best method for data submission.

If a software company is registering to submit for multiple dispensing sites or if you are a corporate submitter registering, please go to www.tnrxreport.com and register. Please enter the individual's name in the profile who will be responsible for submitting the files and for error corrections. In the registration please select that a SFTP account is needed.

When the Data Collection account is approved, the individual who registered will receive two (2) sets of credentials. One set of credentials will be used for the TN Data Collection application and the other set will be used to set up the SFTP server to submit files.

Please use the information below to connect to the SFTP server: Host: www.tnrxreport.com

Port: 22 (SFTP), 991 (FTPS Implicit) or, 21 (FTPS Explicit) Please note: Not all pharmacy software systems can submit prescription data via a SFTP connection.

ALTERNATIVE REPORTING METHODS

Manual Entry (through the application - no waiver required)

If reporting using this manual entry method the entry screen in the application has been updated to the ASAP 4.2A (June 2017 version).

A sample of the information required to fill out in the entry screen if you are dispensing to human patients is located in <u>"Human Dispensations: What is required"</u> and if you are dispensing prescriptions for animals please refer to <u>Addendum 5</u>.

To Access the Manual Entry screen in the data collection website:

Login to <u>www.tnrxreport.com</u> with the username and password associated to the Data Collection User Profile.

Hover over Data Collection Menu → Click Manual Entry menu item

As explained in the 'WHAT DATA IS MANDATORY, WHAT IS OPTIONAL' section, the dispenser must have at least the mandatory data available to manually enter prescriptions. Enter the required fields and remember to save before entering additional prescriptions. Failure to save will create flawed/incorrect prescription records.

Alternative Reporting Methods

If the dispenser does not have an automated record keeping system and can show that electronic reporting by any of the above methods creates an undue hardship, a waiver may be granted by the CSMD Committee that would allow the dispenser to submit in the following alternative method. The application for the waiver must be completed and submitted to the CSMD Administrator via fax or email. Dispensers must begin reporting in the alternate approved method below. Waiver is subject to approval by the CSMD Committee.

Paper Submission of Prescription (s) (requires a waiver)

The alternative form of submission requires an approved waiver by the CSMD Committee. This alternative method utilizes a paper Submission Form. There are separate forms dependent on the type of dispensation. (Human patient (<u>Addendum 1</u>) or animal patient (<u>Addendum 2</u>)) Once a paper form is completed for either a human or animal patient, the paper form must be faxed to Bamboo Health. The fax number for this method of reporting is (866) 282-7076.

For assistance please see the Assistance and Support section of this document.

No reporting should be done by paper without the express permission of the CSMD Committee.

Online Data Reporting Web Service

A secured web service (https://www.webservices.tnrxreport.com/datareporting.asmx) is used to transmit controlled substance prescription information via the secured web service and requires an internet connection with 128-bit encryption Secure Socket Layer (SSL).

The web service provides the following method to submit the prescription data.

Method Name	Description
SubmitTransaction	The web method validates processes and uploads the submitted prescription data. In case of any error, it will return an error message.

Request:

Field Name	Туре	Description
Username	Text	Authorized username
ASAPBlock	Text	Complete ASAP V4.2A (June 2017 version)
Password	Text	Password

Response:

Field Name	Туре	Description
TransactionID	Number	Unique Identifier for the transaction
TransactionStatus	Number	Processed (1) / Rejected (0)
FatalError	Boolean	Yes (1) / No (0)
ErrorMessage	Text	Message describing the error

Transaction Response

The TN data collection web service will acknowledge the transaction with TransactionID, TransactionStatus and Success or Failure notification.

TransactionID - Unique Transaction Identifier

<TransactionID>9999999</TransactionID>

TransactionStatus - Status of the transaction - Processed or Rejected

<TransactionStatus>1/TransactionStatus> Success

<FatalError>0</FatalError>

<ErrorMessage></ErrorMessage> Failure

<FatalError>1</FatalError>

<ErrorMessage>The processing failed due to the invalid ASAP version. Please try again.

Error Correction

Submitter will be notified of errors contained in prescription submission (s) via reports sent to the e-mail address contained in the submitter's user profile and in the message center in the data collection application. If a software company or corporate is submitting on behalf of a dispenser it is the responsibility of the software company or corporate submitter to make the dispensing site aware of any errors.

Helpful tip: If the data to be revised is contained in RX Number (DSP02), Pharmacy DEA# (PHA03), Date Filled (DSP05), or Refill Number (DSP06) the best course of action is to delete the prescription and then submit the prescription with the appropriate information. This also applies if you need to revise a compound prescription reported and any of the above elements will be changed.

The error report file name will be in the following format:

<DEA Number or Username>_ErrorReport_<MMddyyyy>.csv [e.g., BC6459398_ErrorReport_04022013.csv]

The sample error report will look like the following:

The sample error rep	ne sample error report will look like the following:		
PRE03,DEA Number Suffix, Error, 'General Surgery', value exceeds the length allowed; The allowed length for the field is 7;	DSP 00 1494185 20130110 0 20130110 0 01 00406324301 30.0000 7 01 01 02 3 20130 110 ; PHA 1740295765 4435536 BW7777777 WALGREENS STORE Addess1 Address2 Columbus OH 373034907 4237457749 05790; PRE 1982684361 AC2222222 General Surgery Cox Charles ; AIR ;

Patient details does not match with previously submitted prescription(s) or refill(s)	DSP 00 18152 20121228 0 20121228 0 01 00527144510 60.0000 30 01 99		

Rejections

The data collection application will validate each file submitted, record by record, and will reject those

records which do not meet the validation requirements. If there are a limited number of errors, only those records with errors will be rejected. The user will be notified via email contained in the user profile & the message center within the data collection application of the status of the file, and the errors contained within. If a software company or corporate is submitting on behalf of a dispenser it is the responsibility of the software company or corporate to make the dispensing site aware of any errors.

If the records in a file do not meet the required data specifications, the entire file may be rejected. In this instance, the submitter will be notified via email contained in the user profile and the Message Center within the data collection application regarding the reason for this failure. (A valid email address is required in the user profile for email notifications.)

Bamboo Health is <u>not authorized to modify any data</u>; therefore, the dispenser will be required to correct these errors through the website manually or resubmit the entire file, if necessary.

Viewing Submission Errors and File Upload Status:

The Data Collection website allows registered users associated to the dispensing site DEA to log in and view the status of Uploaded Files. A history of all files submitted to the program can be viewed on the "View Uploaded Files" tab under the Data Collection Menu. This page will also show the user any errors associated with a particular file and will allow the user to make corrections to these errors through the website. Please follow the details below to view the uploaded files and any errors associated with those files.

If corporate or a software company are submitting files on the dispenser's behalf the communications will be sent to the submitter of the files. It is the responsibility of corporate submitter or the software company submitter to make the Pharmacist in Charge and/or prescribing dispenser associated to the dispensing site aware of any errors that require correction. Any questions by any of the responsible parties (corporate, software vendor, Pharmacist in Charge, or prescribing dispenser) should contact Bamboo Health for assistance.

View File Upload Errors

Login to www.tnrxreport.com with the username and password associated to the submitter account.

Go to the **Data Collection Menu** > Click on **File Upload**.

Click on the **View Uploaded Files** tab. This will display a history of all files submitted. Click on the **File** containing errors that you wish to correct.

Click on each individual error to see a detailed error description at the bottom of the page.

PRESCRIPTION CORRECTIONS

TN Data Collection Offers the Following Methods to Correct the Error

Option 1: Re-transmit with corrected data using ASAP format instructions

Correct the data in the dispensing site pharmacy management system software; regenerate the file and upload the data.

Please note this process may result in duplicate records as a portion of the records originally submitted were accepted. The duplicate records require no action on the part of the pharmacy or dispenser as the process will identify those records and not process them again.

You may also choose to correct only those records that were rejected and create a separate file to submit.

Option 2: Log into TN data collection and manually correct them

Correct the data online via the TN Data Collection website. This type of correction is manually performed and makes sense when there are minimal errors.

Login to www.tnrxreport.com with the username and password of the submitter account.

Go to the **Data Collection Menu** > Click on **File Upload**.

Click on the <u>View Uploaded Files</u> tab. This will display a history of all files submitted. Click on the File containing errors that you wish to correct

To the right of each error, click on the **paper/pencil icon**. You will then be shown a Prescription correction screen.

Correct the fields indicated, click the authorization checkbox, and then click Save. You will receive an online confirmation that the file was successfully saved.

For security purposes, data cannot be deleted by Bamboo Health once it is submitted to the program. To remedy any issues with prescription data submitted to TN Data Collection, go to the Prescription Maintenance page under the Data Management menu. Search for the prescription by the prescription number, Prescriber DEA, Date filled or any combination of these criteria. The registered user can then update the information by clicking on the prescription in question, correcting the information, checking the authorization check box, and clicking "save.' To delete the prescription, click on the prescription in question, check the authorization checkbox, and click "delete.'

TEST RUN UPLOAD FEATURE

This feature is provided to assist the user with identifying errors within a file, prior to submitting the information to TN Data Collection for reporting purposes. It is located under the Data Collection menu within the TN Data Collection website. The feature can be used for any type of file that it is submitted directly through the www.tnrxreport.com website.

The process is similar to submitting a dispensing site completed file, but will allow the user to see any errors, and correct those errors prior to the dispensing site's submission to TN Data Collection.

If the submitter has attempted to submit the dispensing site's file, and is receiving rejection notices or extensive errors, please utilize this function. This function may also assist the dispensing site's software vendor to identify any corrections that may be needed related to software or the format of the dispensing site's file.

This feature can also be used for files submitted via SFTP in the ASAP 4.2A (June 2017 version) by inserting "T" in TH07 File Type field. NOTE these files will not process to production but will provide notification back to submitter if there are any issues in the files. ONLY files with "P" in TH07 File Type field will process into production.

This feature will only test files that are in the ASAP 4.2A (June 2017 version) format.

TEST RUN USING SFTP

This feature allows a submitter to send Bamboo Health an ASAP file via SFTP. Bamboo Health will process the file according to the value submitted in TH07. If TH07 is submitted with a "P" then file will process, and data will be placed in production. If TH07 is submitted with a "T" the file will process **only** as a test file. Notification messages will be reported back to the submitter when submitting either a "P" or "T" in TH07.

EXEMPTIONS FROM REPORTING

- Any drug prescribed for administration directly to a patient during the course of
 inpatient or residential treatment in a hospital or nursing home licensed under
 title 68 or during the course of inpatient treatment in a hospital licensed under
 title 33. The drug is a complimentary package of medicinal drugs that are labeled
 as a drug sample or complimentary drug dispersed to the practitioner's own
 patients adequate to treat the patient for a maximum of forty-eight (48) hours in
 the regular course of practice without the payment of a fee or remuneration of
 any kind.
- The drug is a sample of a schedule IV or schedule V controlled substance that is provided to the patient without charge. In order to be exempt from reporting, a

sample of a Schedule IV drug must be in a quantity limited to an amount that is adequate to treat a patient for a maximum of seventy-two (72) hours. In order to be exempt from reporting, a sample of a Schedule V drug must be in a quantity limited to an amount that is adequate to treat a patient for a maximum of fourteen (14) days.

• The drug is dispensed by a licensed veterinarian and in a quantity limited to an amount that is adequate to treat the non-human patient for a maximum of five (5) days.

If you wish to submit a request an exemption from reporting, please fill out the exemption/waiver request form located on the CSMD web site: http://www.tn.gov/health/csmd

Navigate to the section called "Applications"

Select "Request an Exemption or a Waiver of Electronic Reporting (PH-4138)

The exemption request must be approved by the CSMD Committee before it is effective.

Controlled Substance Schedules II, III, IV and V - Summary of ASAP 4.A2 (June 2017 version)
Data Elements Note: ASAP Version 4• Release 2A (June 2017 version). The information in
the table is for controlled substances dispensed to humans, for more information
concerning mandatory prescription data for animals please review <u>Addendum 5.</u>

Visit <u>www.asapnet.org</u> to purchase a complete implementation guide for all ASAP formats. Navigate to publications to purchase.

Ref. Code	Data Element Name	Format	Attributes*	
		HEADER SEGMENTS		
	TH- TRANSACT	ION HEADER – REQUIRED	Required Data for human dispensations	
TH01	Version/Release Number	4.2A (June 2017 version)	Yes	
TH02	Transaction Control Number	Recommendation: Use a Globally Unique Identifier (GUID) or Other Nonrepeating Alphanumeric Combination to Populate this Field	Yes	
TH03	Transaction Type	Identifies the purpose of initiating the transaction. 01 Send/Request Transaction 02 Acknowledgment (Used in Response only.) 03 Error Receiving (Used in Response only.) 04 Void (Used to void a specific Rx in a real-time transmission, or an entire batch file that has been transmitted. When 04 is used the appropriate transaction control number in TH02 for the specific prescription or batch file must be included. When 04 is used only the TH Header Segment and the Transaction Trailer Segment are used.)	Situational	
TH04	Response ID	Contains the Transaction Control Number of a transaction that initiated the transaction. Required in response transaction only.	Situational	
TH05	Creation Date	Date the Transaction was Created Format: CCYYMMDD	Yes	
TH06	Creation Time	Time the Transaction was Created Format: HHMMSS or HHMM	Yes	
TH07	File Type	P = Production T = Test	Yes	
TH09	Segment Terminator Character	Examples: / or ~	Yes	
IS- INFORMATION SOURCE - REQUIRED				
ISO1	Unique Information Source ID	Example: Phone Number. However, if a Phone Number is Used to Populate this Field, Do Not Include Hyphens.	Yes	
ISO2	Information Source Entity Name	Entity Name of the Information Source (Pharmacy)	Yes	

Ref.			
Code	Data Element Name	Format	Attributes*
ISO3	Message	Freeform text message. Use of this field is defined by the PDMP. Many PDMPs may designate this field to hold the submission period date range of the file transmitted. When used to indicate the date range, it must be the first data text in the field and must be inserted with using the following layout (where "#" and "-" are those literal characters): #CCYYMMDD#-#CCYYMMDD# For example, a pharmacy may be submitting records for the reporting period of March 1, 2012 through March 7, 2012 but only filled reportable prescriptions on March 3, and March 5. The full submission period date range would be reported in ISO3 as #20120301#-#20120307# It is up to the PDMP to further define how to enter the submission date range for exceptional cases, such as for late submission records. Note: ISO3 can also be used to show the date range for Zero Reports.	Optional
	PHA-	- PHARMACY HEADER- REQUIRED	
PHA01	National Provider Identifier (NPI)	Identifier assigned to the pharmacy by CMS. Used if required by the PDMP	If Available
PHA02	NCPDP/NABP Provider ID	Identifier assigned to pharmacy by the National Council for Prescription Drug Programs. Used if required by the PDMP.	If Available
PHA03	DEA Number	Identifier assigned to the Pharmacy by the Drug Enforcement Administration	Yes
PHA04	Pharmacy or Dispensing Prescriber Name	Freeform name of the pharmacy. Note: If a dispensing prescriber, the prescriber's name, and professional degree should be entered, such as John Doe MD.	Yes
PHA05	Address Information – 1	Freeform text for address information	Yes
PHA06	Address Information – 2	Freeform text for additional address information	Optional
PHA07	City Address	Freeform text for city name	Yes
PHA08	State Address	U.S. Postal Service State Code	Yes
PHA09	ZIP Code Address	U.S. Postal Service ZIP Code. Use if available	Yes
PHA10	Phone Number	Complete phone number including area code. No parenthesis or hyphens	Yes
PHA11	Contact Name	Freeform name	Yes
PHA12	Chain Site ID	Store number assigned by the chain to the pharmacy location. Used when PDMP needs to identify the specific pharmacy from which information is required.	If Available
PHA13	Pharmacy's Permit Number/License Number	Used to help identify the sending pharmacy	If pharmacy include license

Ref. Code	Data Element Name	Format	Attributes*	
DETAIL SEGMENTS				
	PAT- P	ATIENT INFORMATION – REQUIRED		
PAT01	ID Qualifier of Patient Identifier	Code identifying the jurisdiction that issues the ID in PAT03. Used if the PDMP requires such identification.	Situational	
PAT02	ID Qualifier	Code to identify the type of ID in PAT03. If PAT02 is used, PAT03 is required. 01 Military ID 02 State Issued ID 03 Unique System ID 04 Permanent Resident Card (Green Card) 05 Passport ID 06 Driver's License ID 07 Social Security Number 08 Tribal ID 99 Other (Trading partner agreed upon ID, such as cardholder ID.)	Situational	
PAT03	ID of Patient	Identification number for the patient as indicated in PAT02. An example would be the driver's license number	Situational	
PAT04	ID Qualifier of Additional Patient Identifier	Code identifying the jurisdiction that issues the ID in PAT06. Used if the PDMP requires such identification.	Situational	
PAT05	Additional Patient ID Qualifier	Code to identify the type of ID in PAT06 if the PDMP requires a second identifier. If PAT05 is used, PAT06 is required. 01 Military ID 02 State Issued ID 03 Unique System ID 04 Permanent Resident Card (Green Card) 05 Passport ID 06 Driver's License ID 07 Social Security Number 08 Tribal ID 99 Other (Trading partner agreed upon ID, such as cardholder ID.)	Situational	
PAT06	Additional ID	Identification that might be required by the PDMP to further identify the individual. An example might be in that PAT03 driver's license is required and in PAT06 Social Security number is also required.	Situational	
PAT07	Last Name	Patient's Last Name	Yes	
PAT08	First Name	Patient's First Name	Yes	
PAT09	Middle Name	Patient's middle name or initial if available. Used if available in pharmacy system and required by the PDMP	If available	

Ref. Code	Data Element Name	Format	Attributes*
PAT10	Name Prefix	Patient's name prefix such as Mr. or Dr. Used if available in pharmacy system and required by the PDMP.	Yes. if applicable
PAT11	Name Suffix	Patient's name suffix such as Jr. or the III. Used if available in pharmacy system and if required by the PDMP	Yes, if applicable
PAT12	Address Information – 1	Freeform Text for Address Information	Yes
PAT13	Address Information – 2	Freeform Text for Address Information	Situational
PAT14	City Address	Freeform text for city name	Yes
PAT15	State Address	U.S. Postal Service state code if required by the PDMP. Note: Field has been sized to handle international patients not residing in the U.S.	Yes
PAT16	ZIP Code Address	Populate with Zeros if Patient Address is Outside the U.S.	Yes
PAT17	Phone Number	Complete phone number including area code when a state PDMP requires and is available in the pharmacy system. Note: Do not include hyphens in the number	Yes
PAT18	Date of Birth	Format: CCYYMMDD	Yes
PAT19	Gender Code	F = Female M = Male U = Unknown	Yes
PAT20	Species Code	Used if required by the PDMP to differentiate a prescription for an individual from one prescribed for an animal. 01 Human 02 Veterinary Patient	Yes
PAT21	Patient Location Code	Code indicating where patient is located when receiving pharmacy services if required by the PDMP. 01 Home 02 Intermediary Care 03 Nursing Home 04 Long-Term/Extended Care 05 Rest Home 06 Boarding Home 07 Skilled-Care Facility 08 Sub-Acute Care Facility 09 Acute-Care Facility 10 Outpatient 11 Hospice 98 Unknown 99 Other	If Available

Ref. Code	Data Element Name	Format	Attributes*		
PAT22	Country of Non-U.S. Resident	Used when the patient's address is a foreign country and PAT12 through PAT16 are left blank. This is a freeform text field. ASAP does not provide a list of countries for this field. PDMPs may permit some of the other address fields to not be used if this field is populated.	Situational		
PAT23	Name of Animal	Used if required by the PDMP for prescriptions written by a veterinarian and the pharmacist has access to this information at the time of preparing the prescription.	Situational Can be used, but animal name for TN must also be included in PAT08. PAT07 should contain the pet owner last name.		
	DSP -	DISPENSING RECORD - REQUIRED			
DSP01	Reporting Status	00 = New Record 01 = Revise 02 = Void	Yes		
DSP02	Prescription Number	Serial number assigned to the prescription by the pharmacy	Yes		
DSP03	Date Written	Date the prescription was written (authorized). Format: CCYYMMDD	Yes		
DSP04	Refills Authorized	Number of Refills Authorized by the Prescriber	Yes		
DSP05	Date Filled	Date prescription was prepared Format: CCYYMMDD	Yes		
DSP06	Refill Number	0 = Indicates Original Dispensing; 01-99 is the refill number	Yes		
DSP07	Product ID Qualifier	01 = National Drug Code 02 = UPC 03 = HRI 04 = UPN 05 = DIN 06 = Compound (Used to Indicate it is a Compound. The CDI Segment the Becomes a Required Segment.)	Yes		
DSP08	Product ID	Full Product Identification as Indicated in DSP07, Including Leading Zeros without Punctuation. If the product is a Compound, Use 99999999999 as the Product ID The CDI then becomes a required segment.	Yes		
DSP09	Quantity Dispensed	Number of Metric Units Dispensed in Metric Decimal Format Example: 2.5. Note: For compounds show the first quantity in CDI04	Yes		
DSP10	Days' Supply	The calculated or estimated number of days the medication will cover (must be a whole number)	Yes		

Ref.	Data Element Name	Format	Attributes*
DSP11	Drug Dosage Units Code	Identifies the unit of measure for the quantity dispensed in DSP09, if required by the PDMP. 01 Each (used to report solid dosage units or indivisible package) 02 Milliliters (ml) (for liters adjust to the decimal milliliter equivalent) 03 Grams (gm) (for milligrams adjust to the decimal gram equivalent)	Yes
DSP12	Transmission Form of Rx Origin Code	Code indicating how the pharmacy received the prescription, if required by the PDMP 01 Written Prescription 02 Telephone Prescription 03 Telephone Emergency Prescription 04 Fax Prescription 05 Electronic Prescription 06 Transferred/Forwarded Rx 99 Other	Yes
DSP13	Partial Fill Indicator	This field is used when the quantity in DSP09 is less than the metric quantity per dispensing authorized by the prescriber. This dispensing activity is often referred to as a split filling. On Not a Partial Fill Of First Partial Fill Note: For additional fills per prescription, increment by 1. So, the second partial fill would be reported as 02, up to a maximum of 99.	Yes
DSP14	Pharmacist National Provider Identifier (NPI)	Identifier assigned to the pharmacist by CMS. This number can be used to identify the pharmacist dispensing the medication.	lf available
DSP15	Pharmacist State License Number	Assigned to the pharmacist by the State Licensing Board. This data element can be used to identify the pharmacist dispensing the medication	Optional
DSP16	Classification Code for Payment Type	Code Identifying the Type of Payment, i.e. how it was paid for 01 = Private Pay (Cash/Charge/Credit Card) 02 = Medicaid 03 = Medicare 04 = Commercial Insurance 05 = Military Insurance and VA 06 = Workers' Compensation 07 = Indian Nations 99 = Other	Yes

Ref. Code	Data Element Name	Format	Attributes*
DSP17	Date Sold	This field is used to determine the date the prescription was dispensed (left the pharmacy), not the date it was prepared. This date could be captured from the point-of-sale (POS) system, if the pharmacy has a POS system, and there is a bidirectional flow with the pharmacy management system in order to capture and report this date. Or it could be captured and reported from a will-call management system, integrated with the pharmacy management system.	Yes
DSP18	RxNorm Product Qualifier	01 = Semantic Clinical Drug (SCD) 03 = Semantic Branded Drug (SBD) 03 = Generic Package (GPCK) 04 = Branded Package (BPCK) RxNorm code that is populated in the DRU-010- 09 field in the SCRIPT transaction. Note: DSP18 and DSP19 are placeholder fields pending RxNorm becoming an industry standard. These fields should not be required until such time	Optional
DSP19	RxNorm Code	Used for electronic prescriptions to capture the prescribed drug product identification, if required by the PDMP.	Optional
DSP20	Electronic Prescription Reference Number	This field should be populated with the Initiator Reference Number from field UIB-030-01 in the SCRIPT transaction	lf available
DSP21	Electronic Prescription Order Number	This field will be populated with the Initiator Control Reference from field UIH-030-01 in the SCRIPT standard. Note: DSP20 and DSP21 should be reported as a pair to the PDMP and the PDMP will decide which one, if not both, it decides to capture. By requiring the reporting of both, this avoids specification variations that would require custom programming to accommodate a PDMP. Also, the information reported by the pharmacy management system will depend on the information received at the pharmacy with an electronic prescription.	lf available
DSP22	Quantity Prescribed	This field has been added in order to add clarity to the value reported in DSP13 Partial Fill Indicator	Yes
DSP23	Rx Sig	This field would capture the actual directions printed on the prescription vial label. If the directions exceed 200 characters, truncation would be allowed.	Optional

Ref.	£					
Code	Data Element Name	Attributes*				
DSP24	Treatment Type	This field can be used to indicate treatment type associated if indicated on the prescription 01 = Not Used for Opioid Dependency	Situational (as set forth in T.C.A. § 63-1- 164)			
DSP25	Diagnosis Code	This field is used to report the ICD-10 code. If required by a PDMP, this field would be populated only when the ICD-10 code is included with the prescription (No decimals or other punctuation) SCRIBER INFORMATION – REQUIRED	Situational (ICD-10 code must be reported for any prescription that contains an ICD- 10.)			
PRE01	National Provider Identifier	Identifier assigned to the prescriber by CMS.	If available			
PRE02	DEA Number	Identifying Number Assigned to a Prescriber by an Institution by the Drug Enforcement Administration (DEA)	Yes			
PRE03	DEA Number Suffix	Identifying Number Assigned to a Prescriber by an Institution When the Institution's DEA Number is Used	If applicable			
PRE04	Prescriber State License Number	Identification assigned to the Prescriber by the State Licensing Board.	Optional			

Ref. Code	Data Element Name	Format	Attributes*	
PRE05	Last Name	Prescriber's last name.	Yes	
PRE06	First Name	Prescriber's first name.	Yes	
PRE07	Middle Name	Prescriber's middle name or initial.	Yes, if available	
PRE08	Phone Number	The prescriber's primary phone number	Yes	
PRE09	XDEA Number	This field gives a PDMP the option of requiring the XDEA Number (NADEAN) in the PRE Segment when the prescription is for opioid dependency	If applicable	
		ID DRUG INGREDIENT DETAIL- SITUATIONAL		
	If I	DSP07 = 06 all CDI segments required		
CDI01	Compound Drug Ingredient Sequence Number	The First Reportable Ingredient is 1. Each Additional Reportable Ingredient is Incremented by 1.	Required for Compound Prescription	
CDI02	Product ID Qualifier	01 = NDC 02 = UPC 03 = HRI 04 = UPN 05 = DIN	Required for Compound Prescription	
CDI03	Product ID	Full Product Identified as Indicated in CDI02, Including Leading Zeros Without Punctuation.	Required for Compound Prescription	
CDI04	Compound Ingredient Quantity	Metric Decimal Quantity of the Ingredient Identified in CDI03.	Required for Compound Prescription	
		01 = Each (Used to Report Solid Dosage Units or Indivisible Package)	Dogwined for	
CDI05	Compound Drug Dosage Units Code	02 = Milliliters (For Liters Adjust to the Decimal Milliliter Equivalent)	Required for Compound Prescription	
		03 = Grams (For Milligrams adjust to the Decimal Gram Equivalent)		
	AIR- ADDITIONA	L INFORMATION REPORTING – SITUATIONAL		
AIR01	State Issuing Rx Serial Number	U.S.P.S. state code of state that issued serialized prescription blank. This is required if AIRO2 is used	Not Applicable	
AIRO2	State Issued Rx Serial Number	Number assigned to state issued serialized prescription blank. Required if state issues serialized prescription pads for prescribers to use.	Not Applicable	
AIR03	ID Issuing Jurisdiction	Code identifying the jurisdiction that issues the ID contained in AIR05.	Situational	

Ref.	Data Element Name	Format	Attributes*
Code	Data Element Name		Attributes
AIR04	ID Qualifier of Person Dropping Off or Picking Up Rx	Code indicating the type of ID in AIRO5 if required by the PDMP. O1 Military ID O2 State Issued ID O3 Unique System ID O4 Permanent Resident Card (Green Card) O5 Passport ID O6 Driver's License ID O7 Social Security Number 08 Tribal ID 99 Other (Trading partner agreed upon ID)	Situational
AIR05	ID of Person Dropping Off or Picking Up Rx	ID number of the person dropping off or picking up the prescription, if required by the PDMP. Note: Because historically there has been a noticeable amount of extraneous information entered in this field, which has interfered with data analysis, it's important that every effort be made to ensure that only the unadorned customer ID and no additional information be entered into this field.	Situational
AIR06	Relationship of Person Dropping Off or Picking Up Rx	Code indicating the relationship to the person dropping off or picking up Rx, if required by the PDMP. 01 Patient 02 Parent/Legal Guardian 03 Spouse 04 Caregiver 99 Other	Situational
AIR07	Last Name of Person Dropping Off or Picking Up Rx	Last name of the person dropping off or picking up Rx	Situational
AIR08	First Name of Person Dropping Off or Picking Up Rx	First name of the person dropping off or picking up Rx	Situational
AIR09	Last Name or Initials of Pharmacist	Last name or initials of the pharmacist dispensing the medication	Situational
AIR10	First Name of Pharmacist	First name of the pharmacist dispensing the medication	Situational

HUMAN DISPENSATIONS: WHAT DATA IS MANDATORY, WHAT IS OPTIONAL?

Ref. Code	Data Element Name	Attributes*			
AIR11	Dropping Off/Picking Up Identifier Qualifier	Additional qualifier for the ID contained in AIRO5. 01 Person Dropping Off 02 Person Picking Up 98 Unknown/Not Applicable (An example of Unknown: Where the pharmacist does not know which person, it is. Or there is no ID to collect at drop- off, such as when a prescription is phoned in. An example of Not Applicable: When the prescription is delivered.) Note: Both 01 and 02 cannot be required by a PDMP. Usage of this field depends on whether a PDMP has interest in knowing whether the information supplied in fields AIRO4–AIRO8 is for the person dropping off or picking up the prescription.	Situational		
		SUMMARY SEGMENTS			
TP- PHARMACY TRAILER - REQUIRED					
TP01	Detail Segment Count	Number of Detail Segments Included for the Pharmacy Including the Pharmacy Header (PHA) Including the Pharmacy Trailer (T6P) Segments	Yes		
TT01	Transaction Control Number	Identifying Control Number that Must be Unique. Assigned the Originator of the Transaction. Must Match the Number in TH02.	Yes		
TT02	Segment Count	Total Number of Segments Included in the Transaction Including the Header and Trailer Segments	Yes		

This page constitutes a summary of the required ASAP information for controlled substance reporting for humans in TN; for more information regarding controlled substance reporting for animals please reference Addendum 5. Visit www.asapnet.org to purchase a complete implementation guide for all ASAP formats. Navigate to publications to purchase.

PASSWORDS AND SIGN-IN INFORMATION:

Does my password expire?

For security purposes, passwords will expire every 180 days. The registered user does not need to remember to update the user's password, as the system will automatically prompt the user to change the password after 180 days.

Please note that the user's account will require the user to update the password upon the user's initial sign-in. At this time, please answer the security questions provided. This will allow the user to change/update the user's password during the evening/weekend hours.

Have entered the password associated with the user account numerous times and not sure that it is correct? Unable to access the system?

If the data collection user is attempting to submit records of the dispensing site's controlled substances, please go to the TN Data Collection Website (Https://www.tnrxreport.com)click "Forgot/Reset Password?". Once the registered user provides the answers to the security questions the registered user provided during registration, the registered user will be able to reset the password using this feature.

If the individual is a registered user of the CSMD and is attempting to view patient information, or prescription history, please verify that that the correct URL is being used to access the CSMD (https://www.tncsmd.com) instead of the data collection website.

PRESCRIPTION DATA AND REPORTING REQUIREMENTS

What is the NDC Code?

The National Drug Code is an 11-digit number used to identify drug strength, name, quantity etc. This number is found on the medication bottle. The segments should be 11111-1111-11 if any segment in the dispensing information does not contain the appropriate amount of numbers, then zeros would be added at the beginning of the segment number that does not meet the format above until the segment meets the NDC 11 digit format.

What drugs should be reported?

All controlled substances contained in Schedules II, III, and IV which are dispensed, and all Schedule V controlled substances identified by the Controlled Substance Monitoring Database (CSMD) Committee as demonstrating a potential for abuse must be reported. Tenn. Code Ann. § 53-10-304. As of January 26, 2022, Schedule V controlled substances which may be dispensed without a prescription do not have to be reported to the database.

All dispensers licensed by the State of Tennessee that dispense Schedules II-V controlled substances are required to submit the prescription information

How often should I submit data?

Beginning 1/1/2016 Tennessee Code Annotated, Section 53-1 0-305(b)(2), states "for each business day but no later than the close of business on the following business day; provided, that a veterinarian shall submit information at least once every fourteen (14) days and shall not be required to use a computerized system in order to submit required information pursuant to this section".

How are compounded prescriptions to be recorded?

Prescriptions compounded by the pharmacist and containing a controlled substance must be reported. To submit a compound controlled substance, the field Product ID Qualifier (DSP07) must indicate this by the value "06" for compound. Subsequently, Product ID (DSP08) must then be reported as eleven "9's" or 9999999999. By reporting the value in DSP07 as '06', the Compound Drug Ingredient (CDI) segment then becomes a mandatory or required segment. Quantity Dispensed (DSP09) should be total quantity of all compounded ingredients and individual quantities are reported in the CDI segments.

The CDI segment will require that reportable controlled substances be reported in increments of 1 in field CDI01; the NDC code is reported as '01' in CDI02; and the NDC of those reportable ingredients is provided in CDI03. The quantity is provided in metric decimal format in CDI04; and the Drug Dosage Units Code is reported in CDI05.

Why is the system rejecting the input metric quantity?

The metric quantity should be the number of metric units dispensed in metric decimal format. (Ex: 3.5)

What should the dispenser do if one of the conditions to be considered exempt from reporting is met?

If exempt from reporting, please fill out the request for waiver or exemption found on the applications page of the CSMD Website https://www.tn.gov/health/csmd

Navigate to the Applications section and choose Request an Exemption or a Waiver of Electronic Reporting (PH-4138).

This request must be approved by the CSMD Committee before it becomes effective.

Frequently Asked Questions Regarding FILE ISSUES AND ERROR CORRECTIONS

What should the filename be?

The filename should be the DEA number, followed by the date of submission, followed by

<u>.dat or .txt</u>. Chain pharmacies may use the chain name, followed by the date of submission.

SFTP users should be certain to differentiate files by adding characters to the filename before the .dat or .txt extension. This will ensure that the contents of the file are not overwritten.

SFTPs submissions with the same filename, submitted on the same day will overwrite the previously submitted file.

What does the file status 'Pending' mean?

Uploaded files will be processed twice during the evening/overnight by a batch processor, therefore the files will be in 'Pending' status until the day following upload. The submitter will receive notification via the message center and email, if the submitter has supplied a valid email address. The registered user can update the email address in the My Account section of the website. If a software company or corporate is submitting on behalf of a dispenser it is the responsibility of the software company or corporate to make the dispensing site aware of any errors.

How does a dispenser submit controlled substance data when a software vendor is not utilized?

If the dispenser does not work with a software vendor, a Pharmacist in Charge, a Prescriber Dispenser or designee has to either generate a file that can be uploaded or manually enter controlled substance data. In the browser navigate to tnrxreport.com and register. Once registered the user will log into TN Data

Collection to upload the file or manually enter the dispensing site's dispensations and submit. Complete all required fields and click save; no further action is required.

How do I delete a file submitted accidentally with the incorrect reporting period?

If the wrong reporting period was uploaded, the file does not need to be deleted. Records that have already been processed by the system will be rejected as duplicate records. To remedy this issue, simply create a file with the correct reporting period and upload again.

What should submitter do if file was rejected?

If file uploaded by the submitter was rejected, do a Test Run Upload. To do this, go to the Data Collection Menu > Test Run Upload and submit the dispensing site's file. The bottom of the screen will list file format problems. Missing or invalid fields should be corrected by the dispensing site's submitter or software vendor. Test is only for ASAP 4.2A (June 2017 version) format.

How does the submitter know if a file uploaded?

Go to Data Collection > File Upload Click on the View uploaded files tab

The submitter will be able to view all files submitted

If the individual submitting the dispensing information is not receiving email notifications, the submitter will need to verify that the email address is listed **correctly** in the submitter account. Go to 'My Account' and enter the email address in the appropriate field, the submitter will also receive file status notifications in the section of the submitter's account titled 'messages'.

An email will be sent within 14 hours confirming the file's processing status and any errors contained within that file.

(Please be sure to add the domain: BambooHealth.com to the submitter's safe sender's list within the submitter's email client. This will ensure that the submitter receives communications from Bamboo Health in a timely manner.)

How to delete a record/entry if submitter accidentally submitted incorrect information?

The ASAP 4.2A (June 2017 version) formatting requirements allow for the following

functions: 'new, revise or delete'. For those sending electronic files, please refer to DSP01 in the formatting table.

For users that submit manual entries, the registered user can update previously submitted information. Please refer to the Addendum 3.

Even if registered user submits Files through SFTP the registered user can also make corrections/deletions through the website, please see the Addendum 3 of this manual for further information.

Why are there no menus displayed on the web page?

Check the browser version to ensure the registered user is using Edge, Firefox, or Chrome. Edge, Firefox, and Chrome in most cases automatically update to the latest versions.

How do I fix "duplicate" error messages?

A duplicate error message displays when a data record is received and processed more than once. This normally occurs when a file is uploaded after correcting errors in the dispensing site's prescription

software or when a file is uploaded twice in error for a different reporting period. The duplicate records occurring as a result of duplicate file uploads require no action on the part of the submitter.

OTHER QUESTIONS

How do I setup an SFTP account?

SFTP account requests must be made via the registration page on www.tnrxreport.com. An individual will need to register. The registered user will receive login credentials at the email address indicated in the submitter registration within 24-48 business hours.

How should the address for a patient not from the U.S. be entered to be accepted by the program?

Non-US zip codes or residents should have the value '00000' placed into the zip code category.

ASSISTANCE AND SUPPORT

On behalf of TN, Bamboo Health is available to provide assistance and information to individual pharmacies, chain pharmacies, software vendors, and other dispensers required to submit data. Technical support is available to meet the program requirements. Questions concerning interpretation of technical matters may be referred to Bamboo Health. Dispensers are advised to first contact their software vendor to obtain modifications and instructions on complying with the requirements of this manual and participation. Software vendors may also contact Bamboo Health directly for assistance.

Unresolved disagreements between a dispenser and Bamboo Health will be resolved by the CSMD Committee.

Tennessee Data Collection:

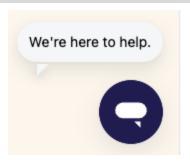

Toll-free number for Bamboo Health: 866-683-9771

If assistance is needed or there are questions you have another option to create a Zendesk ticket with Bamboo Health. When you click the following URL https://tennesseedatacollection.zendesk.com/hc/enus you will be redirected to the Bamboo Health Zendesk application. If this is the first time you are seeking assistance using this option an account will need to be created. When you click "Sign in" or "Submit a Ticket" it will ask you to sign in or underneath it says "New to Bamboo Health? Sign Up". Signing up initially only consists of your last name, first name and email address. Once signed up you can add a phone number to your profile to be used to assist anytime you submit a ticket.

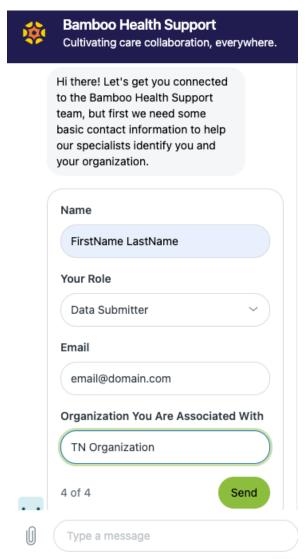

When creating the ticket please include CSMD.Admin@tn.gov in the cc section of the ticket form.

Another option for assistance from Bamboo Health is the Chat feature

1. To start a chat, locate the Chat widget in the bottom right-corner of the screen.

- 2. The chat pop-up will expand and VERDI, our Virtual Electronic Receptionist for Dispensation Issues, will collect your basic contact information and transfer you to an agent.
- 3. You can continue to browse around the TN Data Collection Support Center and view any open

requests. VERDI's chat pop-up will appear on every page within tennesseedatacollection.zendesk.com. Once you leave the help center for any reason, VERDI will be unable to follow you. An example of when you could leave this domain would be when you are submitting a ticket or viewing your requests page. These actions will route you to the main bamboohealth.zendesk.com domain.

If you are unable to see the conversation in your "My Activities" view, please check the URL and ensure that you see bamboohealth.zendesk.com in the URL.

Compound Drug Dosage Units Code Sequence 3		(For Liters Adjust to the Decimal Milliliter Equivalent) 03 = Grams (For Milligrams adjust to the Decimal Gram Equivalent)				
Compound Drug Dosage Units Code Sequence 4						

Two ways of deleting or correcting a prescription:

Once it has been accepted by the TN Data Collection website the two methods follow:

- 1. Create an ASAP 4.2A (June 2017 version) file with the prescriptions marked as either "revise" or "void," and submit the newly created file to the Data Collection website.
- 2. Delete/correct the prescription through the "Prescription Maintenance" portion of the Data Collection website

Method 1. ASAP Correction/Deletion File

A submitter can create a new ASAP 4.2A (June 2017 version) file and mark a previously submitted prescription as either "revise" or "void." The DSP01 field handles this by using the codes "01" for "revise" and "02" for "void" (this is all part of the ASAP Standard set by the American Society for Automation in Pharmacy.)

This would be a function of the dispenser software* used by the dispensing site. The dispensing site will need to contact their software vendor for instructions on how to build this type of file within their dispensing software. Once the file has been created the submitter would upload the file to TN Data Collection website as though the submitter were uploading a normal prescription file.

*There is no guarantee that all dispensing software vendors provide this function as part of their package. It varies by Software Company.

Method 2. Prescription Correction through the Data Collection Website

If the individual in the user profile of the Data Collection user profile wishes to correct a previously submitted prescription through the data collection website, the individual in the user profile that contains that DEA number will use the following steps:

The individual in the Data Collection user profile would log into the TN Data Collection application has the functionality to make revisions provided the account in Data Collection contains the DEA number of the dispenser for those prescription records.

Hover over the "Data Management" tab near the upper left hand corner:

^{*}If a dispenser submits files through SFTP linked to their Bamboo Health Data Collection Account it allows the individual in the account to use the "Prescription Maintenance" function.

The individual in the Data Collection user profile can enter a variety of search criteria (e.g. patient name or prescription number) in order to find the prescription, the individual in the Data Collection user profile containing the DEA number of the dispenser is choosing to make a correction via the functionality in the Data Collection application.t. Once the individual in the Data Collection user profile containing the DEA number corresponding to the prescription has entered their search criteria click "search." If the individual in the Data Collection user profile wishes to see all submitted prescriptions for that DEA, the individual in the Data Collection user profile would just click "search" without any additional criteria. This could lead to a very large number of results that would cause the application to time. It is suggested to put in the DEA number of the pharmacy and timeframe to reduce the issues when looking for prescription that needs to be revised.

The resulting list can be sorted by Rx Number, Date Filled, Date Written, Patient First Name or Patient Last name in either ascending or descending order.

To see the prescription details, the Data Collection user will need to click on the prescription number.

From the "Prescription Details" page the individual in the Data Collection user profile that contains the DEA number associated to the dispenser can correct any of the required fields. To save the corrected information, the individual in the Data Collection user profile that contains the DEA number associated to the dispenser will be required to click the box next to the statement "I hereby certify that the information I have entered above is accurate and complete" at the bottom of the page. Once the authorization box has been checked, the individual in the Data Collection user profile that contains the DEA number associated to the dispenser must click the orange "Save" button.

Once the individual in the Data Collection user profile that contains the DEA number associated to the dispenser clicks the "Save" button, the individual in the Data Collection user profile that contains the DEA number associated to the dispenser will receive a message either stating that the prescription has been saved successfully, or invalid information preventing the prescription from being saved should be identified in the messaging that appears at the top of the page.

(Example: If the individual in the Data Collection user profile that contains the DEA number associated to the dispenser entered an invalid prescriber DEA number, the individual in the Data Collection user profile that contains the DEA number associated to the dispenser would receive a message stating, "Invalid DEA Number," the individual in the Data Collection user profile that contains the DEA number associated to the dispenser would need to retype the DEA number, re- click the authorization box and then must click the orange "Save" button.)

Once the prescription has been saved, no further steps are required.

Prescription Deletion through the Data Collection Website

If an individual in the Data Collection user profile that contains the DEA number associated to the dispenser wishes to correct a previously submitted prescription through the data collection website, the individual in the Data Collection user profile that contains the DEA number associated to the dispenser will use the following steps:

The individual in the Data Collection user profile that contains the DEA number associated to the dispenser would log into their Data Collection account to make revisions.

Hover over the "Data Management" tab near the upper left hand corner.

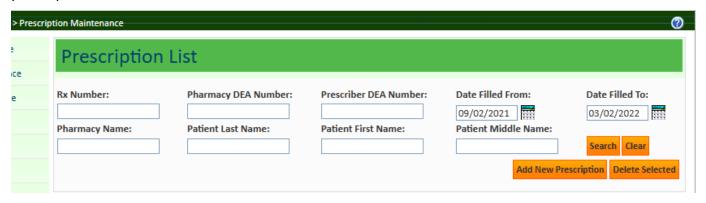

A dropdown menu will appear, click on "Prescription Maintenance"

The DEA number will be entered that is associated to the dispenser that dispensed the prescription that needs to be revised. Next the individual in the Data Collection user profile that contains the DEA number associated to the dispenser can enter a variety of search criteria (e.g. patient name or prescription number) in order to find the prescription, the individual in the Data Collection user profile that contains the DEA number associated to the dispenser wants to identify for correction. Once the individual in the Data Collection user profile that contains the DEA number associated to the dispenser has entered their search criteria click "search." If the individual in the Data Collection user profile that contains the DEA number associated to the dispenser wishes to see all their submitted prescriptions for that DEA, the

individual in the Data Collection user profile would just click "search" without any additional criteria. This could lead to a very large number of results that would cause the application to time. It is suggested to put in the DEA number of the pharmacy and timeframe to reduce the issues when looking for prescription that needs to be revised.

The resulting list can be sorted by: Rx Number, Date Filled, Date Written, Patient First Name or Patient Last name in either ascending or descending order.

To see the prescription details, the individual in the Data Collection user profile that contains the DEA number associated to the dispenser will click on the prescription number.

From the "Prescription Details" page, the individual in the Data Collection user profile that contains the DEA number associated to the dispenser will click the box next to the statement "I hereby certify that the information I have entered above is accurate and complete" at the bottom of the page. Once the authorization box has been checked, the individual in the Data Collection user profile that contains the DEA number associated to the dispenser must click the orange "Delete Button."

Once the prescription has been deleted the individual in the Data Collection user profile that contains the DEA number associated to the dispenser of the dispensing site will receive a message at the top of the page stating that the prescription has been successfully deleted.

No further steps are required by the pharmacy once the prescription has been deleted

Tennessee Controlled Substance Data Collection Manual

If a dispenser does not dispense any Schedule II-V prescriptions during a daily reporting period, a "zero" report shall be submitted. This may be done via the prescription upload website: www.tnrxreport.com under the Data Collection menu or through the dispensing site's software.

Zero reports can be submitted at any frequency, but Zero Report must be submitted no later than the last day of the current month. If the last day of the month is a weekend or holiday, then a Zero Report must be submitted by the next business day.

_(Beginning January 1, 2019, Zero Reports <u>via SFTP</u> can ONLY be submitted in the ASAP 4.2A (June 2017 version). If the dispensing site has been unable to comply with this requirement deadline, the dispensing site's Pharmacist in Charge, Prescriber Dispenser or designee must contact the CSMD at CSMD.Admin@tn.gov or 615-253-1305 for guidance.

Zero Reports - Submitting manually via the website

To Access the Zero Reporting screen in the data collection website:

Login to www.tnrxreport.com with the submitter's username and password. Go

to the **Data Collection menu**.

Click on the option **<u>Upload Pharmacy Zero Report.</u>**

Select the reporting period for zero report submission.

Click **Submit**.

Zero Reports - Submit via dispenser software

Chain pharmacies should seek direction from their corporate offices concerning how their data (zero reports) will be submitted. Beginning January 1, 2019, zero reports can only be submitted via a web account specific to the dispensers DEA # or via SFTP in ASAP v4.2A (June 2017 version).

Zero reports via SFTPs transmission in ASAP 4.2A (June 2017 version) format

The Zero Report standard is a complete transaction and includes all fields required by the TN Data Collection program according to the state's requirements.

Transaction Headers and Trailer Segments are completed as these segments would be completed with a normal controlled substance report. All required detail segments are to be sent and left blank with the exception of the PAT07; PAT08; and DSP05. The segments should be completed accordingly: PAT07 = Report; PAT08 = Zero; DSP05 = Date report is sent.

Zero Reports Electronic Submission Summary of Required Data Elements

ISO1	Unique Information Source ID	Example: Phone Number. However, if a Phone Number is Used to Populate this Field, Do Not Include Hyphens.	Yes
ISO2	Information Source Entity Name	Entity Name of the Information Source (Pharmacy)	Yes

Ref. Code	Data Element Name	Format	Attributes
ISO3	Message	Freeform text message. Use of this field is defined by the PDMP. Many PDMPs may designate this field to hold the submission period date range of the file transmitted. When used to indicate the date range, it must be the first data text in the field and must be inserted with using the following layout (where "#" and "-" are those literal characters): #CCYYMMDD#-#CCYYMMDD# For example, a pharmacy may be submitting records for the reporting period of March 1, 2012 through March 7, 2012 but only filled reportable prescriptions on March 3, and March 5. The full submission period date range would be reported in ISO3 as #20120301#-#20120307# It is up to the PDMP to further define how to enter the submission date range for exceptional cases, such as for late submission records. Note: ISO3 can also be used to show the date	Optional
	DHA	range for Zero Reports. – PHARMACY HEADER– REQUIRED	
PHA01	National Provider Identifier (NPI)	Identifier assigned to the pharmacy by CMS Used if	If available
PHA02	NCPDP/NABP Provider ID	Identifier assigned to pharmacy by the National Council for Prescription Drug Programs. Used if required by the PDMP.	If Available
PHA03	DEA Number	Identifier assigned to the Pharmacy by the Drug Enforcement Administration	Yes
PHA04	Pharmacy or Dispensing Prescriber Name	Freeform name of the pharmacy. Note: If a dispensing prescriber, the prescriber's name, and professional degree should be entered, such as John Doe MD.	Yes
PHA05	Address Information – 1	Freeform text for address information	Yes
PHA06	Address Information – 2	Freeform text for additional address information	Optional
PHA07	City Address	Freeform text for city name	Yes
PHA08	State Address	U.S. Postal Service State Code	Yes
PHA09	ZIP Code Address	U.S. Postal Service ZIP Code. Use if available	Yes
PHA10	Phone Number	Complete phone number including area code. No parenthesis or hyphens	Yes
PHA11	Contact Name	Freeform name	Yes
PHA12	Chain Site ID	Store number assigned by the chain to the pharmacy location. Used when PDMP needs to identify the specific pharmacy from which information is required.	If available
PHA13	Pharmacy's Permit Number/License Number	Used to help identify the sending pharmacy	Required if a pharmacy
		DETAIL SEGMENTS	
	PAT-	PATIENT INFORMATION – REQUIRED	
PAT01	ID Qualifier of Patient Identifier	Code identifying the jurisdiction that issues the ID in PAT03. Used if the PDMP requires such identification.	Situational

Ref.	Data Element Name	Format	Attributes
Code	Data Element Name	Torride	
PAT02	ID Qualifier	Code to identify the type of ID in PAT03. If PAT02 is used, PAT03 is required. Military ID State Issued ID 03 Unique System ID 04 Permanent Resident Card (Green Card) 05 Passport ID Driver's License ID Social Security Number 08 Tribal ID 99 Other (Trading partner agreed upon ID, such as cardholder ID.)	Situational
PAT03		Identification number for the patient as indicated in PAT02. An example would be the driver's license number	Situational
PAT04		Code identifying the jurisdiction that issues the ID in PAT06. Used if the PDMP requires such identification.	Situational
PAT05	Additional Patient ID Qualifier	Code to identify the type of ID in PAT06 if the PDMP requires a second identifier. If PAT05 is used, PAT06 is required. Military ID State Issued ID 03 Unique System ID 04 Permanent Resident Card (Green Card) 05 Passport ID Driver's License ID Social Security Number 08 Tribal ID 99 Other (Trading partner agreed upon ID, such as cardholder ID.)	Situational
PAT06	Additional ID	Identification that might be required by the PDMP to further identify the individual. An example might be in that PAT03 driver's license is required and in PAT06 Social Security number is also required.	Situational
PAT07		Patient's Last Name (Last name of Owner)	Yes
PAT08		Patient's First Name (First Name of Pet)	Yes
PAT09	Middle Name	Patient's middle name or initial if available. Used if available in pharmacy system and required by the PDMP	If available
PAT10	Name Prefix	Patient's name prefix such as Mr. or Dr. Used if available in pharmacy system and required by the PDMP.	Yes , If applicable
PAT11	Name Suffix	Patient's name suffix such as Jr. or the III. Used if available in pharmacy system and if required by the PDMP	Yes , If applicable
PAT12	Address Information – 1	Freeform Text for Address Information	Yes

	·				
Ref. Code	Data Element Name	Format	Attributes		
PAT13	Address Information – 2	Freeform Text for Address Information	Situational		
PAT14	City Address	Freeform text for city name	Yes		
PAT15	State Address	U.S. Postal Service state code if required by the PDMP. Note: Field has been sized to handle international patients not residing in the U.S.	Yes		
PAT16	ZIP Code Address	Populate with Zeros if Patient Address is Outside the U.S.	Yes		
PAT17	Phone Number	Complete phone number including area code when a state PDMP requires and is available in the pharmacy system. Note: Do not include hyphens in the number	Yes		
PAT18	Date of Birth	Format: CCYYMMDD	Yes		
PAT19	Gender Code	F = Female M = Male U = Unknown	Yes		
PAT20	Species Code	Used if required by the PDMP to differentiate a prescription for an individual from one prescribed for an animal. 01 = Human 02 = Veterinary Patient	Yes		
PAT21	Patient Location Code	Code indicating where patient is located when receiving pharmacy services if required by the PDMP. 01 01 Home 02 Intermediary Care 03 Nursing Home 04 Long-Term/Extended Care 05 Rest Home 06 Boarding Home 07 Skilled-Care Facility 08 Sub-Acute Care Facility 09 Acute-Care Facility 10 Outpatient 11 Hospice 98 Unknown 99 Other	If available		
PAT22	Country of Non-U.S. Resident	Used when the patient's address is a foreign country and PAT12 through PAT16 are left blank. This is a freeform text field. ASAP does not provide a list of countries for this field. PDMPs may permit some of the other address fields to not be used if this field is populated.	Situational		

Ref. Code	Data Element Name	Format	Attributes
PAT23	Name of Animal	Used if required by the PDMP for prescriptions written by a veterinarian and the pharmacist has access to this information at the time of preparing the prescription.	Situational Can be used, but animal name for TN must also be included in PAT08. PAT07 should contain the pet owner last name.
DSP - DIS	PENSING RECORD – REQUIRED		
DSP01	Reporting Status	00 = New Record 01 = Revise 02 = Void	Yes
DSP02	Prescription Number	Serial number assigned to the prescription by the pharmacy	Yes
DSP03	Date Written	Date the prescription was written (authorized). Format: CCYYMMDD	Yes
DSP04	Refills Authorized	Number of Refills Authorized by the Prescriber	Yes
DSP05	Date Filled	Date prescription was prepared Format: CCYYMMDD	Yes
DSP06	Refill Number	0 = Indicates Original Dispensing; 01-99 is the refill number	Yes
DSP07	Product ID Qualifier	01 = National Drug Code 02 = UPC 03 = HRI 04 = UPN 05 = DIN 06 = Compound (Used to Indicate it is a Compound. The CDI Segment the Becomes a Required Segment.)	Yes
DSP08	Product ID	Full Product Identification as Indicated in DSP07, Including Leading Zeros without Punctuation. If the product is a Compound, Use 9999999999 as the Product ID The CDI then becomes a required segment.	Yes
DSP09	Quantity Dispensed	Number of Metric Units Dispensed in Metric Decimal Format Example: 2.5. Note: For compounds show the first quantity in CDI04	Yes
DSP10	Days Supply	The calculated or estimated number of days the medication will cover (must be a whole number)	Yes

Ref. Code	Data Element Name	Format	Attributes
DSP11	Drug Dosage Units Code	Identifies the unit of measure for the quantity dispensed in DSP09, if required by the PDMP. Each (used to report solid dosage units or indivisible package) Milliliters (ml) (for liters adjust to the decimal milliliter equivalent) Grams (gm) (for milligrams adjust to the decimal gram equivalent)	Yes
DSP12	Transmission Form of Rx Origin Code	Code indicating how the pharmacy received the prescription, if required by the PDMP O1 Written Prescription O2 Telephone Prescription O3 Telephone Emergency Prescription O4 Fax Prescription O5 Electronic Prescription O6 Transferred/Forwarded Rx 99 Other	Yes
DSP13	Partial Fill Indicator	This field is used when the quantity in DSP09 is less than the metric quantity per dispensing authorized by the prescriber. This dispensing activity is often referred to as a split filling. OO Not a Partial Fill O1 First Partial Fill Note: For additional fills per prescription, increment by 1. So the second partial fill would be reported as 02, up to a maximum of 99.	Yes
DSP14	Pharmacist National Provider Identifier (NPI)	Identifier assigned to the pharmacist by CMS. This number can be used to identify the pharmacist dispensing the medication.	If available
DSP15	Pharmacist State License Number	Assigned to the pharmacist by the State Licensing Board. This data element can be used to identify the pharmacist dispensing the medication	Optional
DSP16	Classification Code for Payment Type	Code Identifying the Type of Payment, i.e. how it was paid for 01 = Private Pay (Cash/Charge/Credit Card) 02 = Medicaid 03 = Medicare 04 = Commercial Insurance 05 = Military Insurance and VA 06 = Workers' Compensation 07 = Indian Nations 99 = Other	Yes

Ref. Code	Data Element Name	Format	Attributes
DSP17	Date Sold	This field is used to determine the date the prescription was dispensed (left the pharmacy), not the date it was prepared. This date could be captured from the point-of-sale (POS) system, if the pharmacy has a POS system, and there is a bidirectional flow with the pharmacy management system in order to capture and report this date. Or it could be captured and reported from a will-call management system, integrated with the pharmacy management system.	Yes
DSP18	RxNorm Product Qualifier	01 = Semantic Clinical Drug (SCD) 02 = Semantic Branded Drug (SBD) 03 = Generic Package (GPCK) 04 = Branded Package (BPCK) RxNorm code that is populated in the DRU-010-09 field in the SCRIPT transaction. Note: DSP18 and DSP19 are placeholder fields pending RxNorm becoming an industry standard. These fields should not be required until such time.	Optional
DSP19	RxNorm Code	Used for electronic prescriptions to capture the prescribed drug product identification, if required by the PDMP.	Optional
DSP20	Electronic Prescription Reference Number	This field should be populated with the Initiator Reference Number from field UIB-030-01 in the SCRIPT transaction	If available
DSP21	Electronic Prescription Order Number	This field will be populated with the Initiator Control Reference from field UIH-030-01 in the SCRIPT standard. Note: DSP20 and DSP21 should be reported as a pair to the PDMP and the PDMP will decide which one, if not both, it decides to capture. By requiring the reporting of both, this avoids specification variations that would require custom programming to accommodate a PDMP. Also, the information reported by the pharmacy management system will depend on the information received at the pharmacy with an electronic prescription.	If available
DSP22	Quantity Prescribed	This field has been added in order to add clarity to the value reported in DSP13 Partial Fill Indicator	Yes
DSP23	Rx Sig	This field would capture the actual directions printed on the prescription vial label. If the directions exceed 200 characters, truncation would be allowed.	Optional

Ref. Code	Data Element Name	Format	Attributes
DSP24	Treatment Type	This field can be used to indicate treatment type associated if indicated on the prescription 01 = Not Used for Opioid Dependency Treatment 02 Used for Opioid Dependency Treatment 03 Pain Associated with Active and Aftercare Cancer Treatment 04 Palliative Care in Conjunction with a Serious Illness 05 End-of-Life and Hospice Care 06 A Pregnant Individual with a Pre-existing Prescription for Opioids 07 Acute Pain for an Individual with an Existing Opioid Prescription for Chronic Pain 08 Individuals Pursuing an Active Taper of Opioid Medications 09 = Patient is Participating in a Pain Management Contract 10 = Acute Opioid Therapy (only available for use in ASAP 4.2b) 11 = Chronic Opioid Therapy (only available for use in ASAP 4.2b) 99 = Other (TN has agreed this variable will be used to report "Medical Necessity" was indicated on the prescription) *Note: These new codes can only be reported if provided by the prescriber with the prescription.	Situational (as set forth in T.C.A. § 63-1- 164)
DSP25	Diagnosis Code	This field is used to report the ICD-10 code. If required by a PDMP, this field would be populated only when the ICD-10 code is included with the prescription (No decimals or other punctuation)	Situational (ICD-10 code must be reported for any prescription that contains an ICD- 10.)
		RESCRIBER INFORMATION – REQUIRED	
PRE01 PRE02	DEA Number	Identifier assigned to the prescriber by CMS. Identifying Number Assigned to a Prescriber by an Institution by the Drug Enforcement Administration DEA	If available Yes
PRE03	I DEA NUMBER SUTTIV	Identifying Number Assigned to a Prescriber by an Institution When the Institution's DEA Number is Used	If applicable
PRE04	i Prescriner State License Milmher	Identification assigned to the Prescriber by the State Licensing Board.	Optional

Ref. Code	Data Element Name	Format	Attributes
PRE05	Last Name	Prescriber's last name.	Yes
PRE06	First Name	Prescriber's first name.	Yes
PRE07	Middle Name	Prescriber's middle name or initial.	Yes, if available
PRE08	Phone Number	The prescriber's primary phone number	Yes
PRE09	XDEA Number	This field gives a PDMP the option of requiring the XDEA Number (NADEAN) in the PRE Segment when the prescription is for opioid dependency	If applicable
		ND DRUG INGREDIENT DETAIL- SITUATIONAL f DSP07 = 06 all CDI segments required	
CDI01	Compound Drug Ingredient Sequence Number	The First Reportable Ingredient is 1. Each Additional Reportable Ingredient is Incremented by 1.	Required for Compound Prescription
CDI02	Product ID Qualifier	01 = NDC 02 = UPC 03 = HRI 04 = UPN 05 = DIN	Required for Compound Prescription
CDI03	Product ID	Full Product Identified as Indicated in CDI02, Including Leading Zeros Without Punctuation.	Required for Compound Prescription
CDI04	Compound Ingredient Quantity	Metric Decimal Quantity of the Ingredient Identified in CDI03.	Required for Compound Prescription
CDI05	Compound Drug Dosage Units Code	01 = Each (Used to Report Solid Dosage Units or Indivisible Package) 02 = Milliliters (For Liters Adjust to the Decimal Milliliter Equivalent) 03 = Grams (For Milligrams adjust to the Decimal Gram Equivalent)	Required for Compound Prescription
	AIR- ADDITION	AL INFORMATION REPORTING – SITUATIONAL	
AIR01	State Issuing Rx Serial Number	U.S.P.S. state code of state that issued serialized prescription blank. This is required if AIRO2 is used	Not Applicable
AIRO2	State Issued Rx Serial Number	Number assigned to state issued serialized prescription blank. Required if state issues serialized prescription pads for prescribers to use.	Not Applicable
AIR03	ID Issuing Jurisdiction	Code identifying the jurisdiction that issues the ID contained in AIR05.	Situational

Ref. Code	Data Element Name	Format	Attributes
AIRO4	ID Qualifier of Person Dropping Off or Picking Up Rx	Code indicating the type of ID in AIRO5 if required by the PDMP. 01 Military ID 02 State Issued ID 03 Unique System ID 04 Permanent Resident Card (Green Card) 05 Passport ID 06 Driver's License ID 07 Social Security Number 08 Tribal ID 99 Other (Trading partner agreed upon ID)	Situational
AIR05	ID of Person Dropping Off or Picking Up Rx	ID number of the person dropping off or picking up the prescription, if required by the PDMP. Note: Because historically there has been a noticeable amount of extraneous information entered in this field, which has interfered with data analysis, it's important that every effort be made to ensure that only the unadorned customer ID and no additional information be entered into this field.	Situational
AIR06	Relationship of Person Dropping Off or Picking Up Rx	Code indicating the relationship to the person dropping off or picking up Rx, if required by the PDMP. 01 Patient 02 Parent/Legal Guardian 03 Spouse 04 Caregiver 99 Other	Situational
AIR07	Last Name of Person Dropping Off or Picking Up Rx	Last name of the person dropping off or picking up Rx	Situational
AIR08	First Name of Person Dropping Off or Picking Up Rx	First name of the person dropping off or picking up Rx	Situational
AIR09	Last Name or Initials of Pharmacist	Last name or initials of the pharmacist dispensing the medication	Situational
AIR10	First Name of Pharmacist	First name of the pharmacist dispensing the medication	Situational

Addendum 5 Animal Dispensations: What Data Is Mandatory, What IsOptional?

Ref.	Data Element Name	Format	Attributes	
AIR11	Dropping Off/Picking Up Identifier Qualifier	Additional qualifier for the ID contained in AIRO5. 01 Person Dropping Off 02 Person Picking Up 98 Unknown/Not Applicable (An example of Unknown: Where the pharmacist does not know which person, it is. Or there is no ID to collect at drop- off, such as when a prescription is phoned in. An example of Not Applicable: When the prescription is delivered.) Note: Both 01 and 02 cannot be required by a PDMP. Usage of this field depends on whether a PDMP has interest in knowing whether the information supplied in fields AIRO4—AIRO8 is for the person dropping off or	Situational	
		picking up the prescription.		
	SUMMARY SEGMENTS			
TP01	Detail Segment Count	Number of Detail Segments Included for the Pharmacy Including the Pharmacy Header (PHA) Including the Pharmacy Trailer (T6P) Segments	Yes	
TT- TRANSACTION TRAILER - REQUIRED				
TT01	Transaction Control Number	Identifying Control Number that Must be Unique. Assigned the Originator of the Transaction. Must Match the Number in TH02.	Yes	
TT02	Segment Count	Total Number of Segments Included in the Transaction Including the Header and Trailer Segments	Yes
